

# Juniper Partner Advantage Champion Program

At A Glance

Juniper Champion

The Champion program is a multilevel program that enables the Juniper partner technical community to develop expertise in Juniper products, software, and technologies in order to effectively position Juniper solutions in routing, switching, and security. It provides unique access to Juniper resources and consists of a prescriptive curriculum of product courses, technical certifications, network design courses, and accreditations with a multidiscipline focus for the enterprise or service provider, or a focused discipline in routing, switching, or security. The program contains three consecutive levels—Aspiring, Innovative, and Ingenious—with increased expertise and skill required for each level.

## Winning Business and Building Mutually Connected Relationships

Participation in the Champion Program can help you win more business faster, develop new skills and capabilities, and create a truly exceptional customer experience through advanced expertise in Silicon, Systems and Software.

Although certifications are a key part of the construct, the true essence of the program is a mutually connected relationship designed to enable growth, coverage and scale for our Partners and Juniper together as one.

## Becoming a Juniper Champion

- Improve your ability to solve complex networking and security challenges through a deeper understanding of Juniper's products, architectures, and solutions
