

## boot-server

---

**Syntax** boot-server (*address* | *hostname*);

**Hierarchy Level** [edit access address-assignment pool *pool-name* family inet dhcp-attributes]

**Release Information** Statement introduced in JUNOS Release 9.0.

**Description** Configure the name of the boot server advertised to DHCP clients. The client uses a boot file located on the boot server to complete DHCP setup. This is equivalent to DHCP option 66.

- Options**
- *address*—The IPv4 address of a boot server.
  - *hostname*—The fully qualified hostname of a boot server.

**Required Privilege Level** admin—To view this statement in the configuration.  
admin-control—To add this statement to the configuration.
