

interfaces

Syntax `interfaces interface-name {
 disable;
 polling-interval seconds;
 sample-rate number;
}`

Hierarchy Level [edit protocols sflow]

Release Information Statement introduced in JUNOS Release 9.3 for EX-series switches.

Description Configure sFlow network traffic monitoring on the specified interface on the switch. You can configure sFlow parameters such as polling interval and sample rate with different values on different interfaces, and you can also disable sFlow monitoring on individual interfaces.

The remaining statements are explained separately.

Options *interface-name*—Name of the interface on which to configure sFlow parameters.

Required Privilege Level routing—To view this statement in the configuration.
routing-control—To add this statement to the configuration.
