 }
password-protocol *mschap-v2*;

Hierarchy Level [edit system]

Release Information Statement introduced in JUNOS Release 8.3. The MS-CHAPv2 password protocol configuration option introduced in JUNOS 9.2.

Description Configure RADIUS options for NAS-IP address for outgoing RADIUS packets and password protocol used in RADIUS packets.

Options *nas-ip-address*—IP address of the network access server (NAS) that requests user authentication.

mschap-v2—Password protocol MS-CHAPv2, used in RADIUS packets.

Required Privilege Level system—To view this statement in the configuration.
system-control—To add this statement to the configuration.
