

Supported Add Device Workflows for M-series and MX-series Devices

An M-series or MX-series device can be added using the following methods or workflows:

- Import device with static IP address
- Import device with dynamic IP address
- Model and activate device
- Rapid deployment (configlets)
- Device discovery
- Import many devices (CSV file) with static IP addresses
- Import many devices (CSV file) with dynamic IP addresses

The model many devices (CSV file) workflow is not supported.
