

## Validating a Security Policy (NSM Procedure)

---

Validating a security policy can identify potential problems before you install it.

To validate a security policy:

1. In the navigation tree, select **Device Manager**. The Device manager appears.
2. Select **Validate > Validate IDP Policy** and select the device. A Job Manager window displays job information and progress.
3. Click **OK**.

For more information, see either the *IDP Concepts & Examples Guide* or the *Network and Security Manager Administration Guide*.
