

MX480 Router Grounding Cable Lug Specifications

The accessory box shipped with the router includes one cable lug that attaches to the grounding cable (see Figure 1) and two UNC 1/4–20 screws used to secure the grounding cable to the grounding points.

Figure 1: Grounding Cable Lug

CAUTION: Before router installation begins, a licensed electrician must attach a cable lug to the grounding and power cables that you supply. A cable with an incorrectly attached lug can damage the router.

NOTE: The same cable lug is used for the DC power cables.
