

For instructions on installing or replacing a Services and Routing Engine (SRE) for the SRX650 Services Gateway, see the “Replacing Hardware Components on the SRX650 Services Gateway” chapter in the *SRX650 Services Gateway Hardware Guide*. This guide is available on the SRX650 Services Gateway Documentation webpage at www.juniper.net/techpubs/hardware/junos-srx/srx650/index.html .

CAUTION:

- For important safety information about the SRX650 Services Gateway, see the “Safety and Regulatory Compliance Information” appendix in the *SRX650 Services Gateway Hardware Guide*.
- The SRE is not hot-swappable. You must power off the services gateway before removing or inserting an SRE.
- The SRX650 Services Gateway must have one SRE installed. The SRE is rear-pluggable and must be installed in the horizontal slot labeled SRE0 (full-length slot). Dual SREs are not supported on the SRX650 Services Gateway chassis.
- If a slot is not occupied by a card, a blank panel must be installed to shield the empty slot and maintain proper cooling of the services gateway.

Accessing Juniper Networks Technical Documentation

To find documentation on other devices, see www.juniper.net/techpubs .

Contacting Juniper Networks

For technical support, see www.juniper.net/support/requesting-support.html .
