Must download software before using the 5000-8G or 5000-2G24FE Secure Port Module (SPM) with 5000-M2

To utilize either the 5000-8G or 5000-2G24FE First Generation Secure Port Modules (SPM) in a Juniper Networks NetScreen-5200 or NetScreen-5400 device, you **MUST** download the software on the 5000-M2 Management Module. The **ScreenOS 5.0.0-M2.r9.c.3** software (or later) can be downloaded from the Juniper Networks support site (<http://www.juniper.net/support>).

System Configuration Notes:

- The 5000-2XGE and 5000-8G2 SPMs require the management of the 5000-M2 Management Module.
 - The 5000-2XGE and 5000-8G2 SPMs **CAN NOT** be mixed with the 5000-8G or 5000-2G24FE SPMs in an NetScreen-5400 device.
