

ESAP 1.4.5

Important Note:

The following note is for Admins upgrading from ESAP 1.4.4 to an ESAP version 1.4.5 or greater and that have the Predefined AntiSpyware rule configured.

"BitDefender Internet Security 2009 (Anti Spyware) (12.x)" as listed in ESAP 1.4.4 is no longer supported. This product is now supported under the product name, "BitDefender Internet Security 2009" (as listed in ESAP versions 1.4.5 and greater).

Since support for the product as listed in ESAP 1.4.4 has been dropped, the upgrade from ESAP 1.4.4 to ESAP 1.4.5 and greater will fail if the Host Checker policy is configured in one of the following ways:

SA (IVE) versions lower than 6.2

Configuration in the Predefined AntiSpyware rule:

"BitDefender Internet Security 2009 (Anti Spyware) (12.x)" is selected.

Solution:

Remove this product from the product list. Then upgrade the ESAP package.

SA (IVE) versions 6.2 and greater:

Configuration in the Predefined AntiSpyware rule: "Require Specific Products" is selected and "BitDefender Internet Security 2009 (Anti Spyware) (12.x)" is a selected product.

Solution:

Remove this product from the product list. Then upgrade the ESAP package.

Known Issues/Limitations NOT Fixed in ESAP 1.4.5:

1. Check fails Norton 360 v2 with UAC Enabled on Vista (386088)
 2. DllGetClassObject() is returning "Unspecified Error" (397464)
