Introduction

The SA Platform uses Web and security technologies, giving users ubiquitous remote access to corporate resources using a Web browser. This document describes the platforms (operating system/browser combinations) that have been qualified for use with the SA.

SA Hardware Requirements

Service Package Version 6.3 is supported on the following SA platforms:

Juniper Networks Secure Access 700
Juniper Networks Secure Access 2000
Juniper Networks Secure Access 2500
Juniper Networks Secure Access 4000
Juniper Networks Secure Access 4000-FIPS
Juniper Networks Secure Access 4500
Juniper Networks Secure Access 6000
Juniper Networks Secure Access 6000-FIPS
Juniper Networks Secure Access 6000 Service Provider
Juniper Networks Secure Access 6500

Functionality Tested

The SA Platform supports the following functionalities.

- Web browsing for HTML/JavaScript content
- File browsing
- Client-side Java applets, including Citrix, Hob, VNC, and WRQ
- Secure Terminal Access, including Telnet and SSH
- Secure Application Manager (W-SAM and J-SAM), which provides support for client/server applications such as Citrix, Microsoft Terminal Services, Microsoft Exchange MAPI, and Lotus Notes
- Network Connect, enables secure network access into defined enterprise resources.
- Secure Meeting, enables cross-platform secure on-line meetings.
- Host Checker, evaluates the endpoint for a broad range of security constraints, and appropriately enforces dynamic access policies before and during the authenticated session.
- Cache Cleaner, ensures that all residuals left behind during an authenticated SA session will be cleaned up periodically during and after the authenticated SA session.
- Terminal Services, enables a terminal emulation session on a Windows server or a Citrix Presentation Server.
- Mobile Devices

Platform Support

Juniper Networks tests the aforementioned functionalities of the SA Platform on most widely used corporate and consumer platforms to qualify each platform as either qualified or compatible.

The platforms in this list are divided into two categories: compatible and qualified. The complete list of platforms/browsers in the document is supported. If problems are encountered on either a qualified or a compatible platform then Juniper support will attempt to resolve the issue.

Qualified Platform

The platforms listed in the “qualified” category have been systematically tested by QA department as part of the release covered by the Supported Platforms document.

Compatible Platform

The platforms listed in the “compatible” category have not been systematically tested by our QA department in this release but based on testing in previous releases and knowledge of the platform Juniper expects that the functionality will work and will fully support these platforms.

Multiple Language Support

All the end-user functionality has been localized in German, French, Japanese, Traditional Chinese, Simplified Chinese, Spanish, and Korean. The administrator user interface is supported in English only.

Web and File Browsing

Qualified platforms:

Platform	Operating System : list of browsers and Java Environment
Windows	<ul style="list-style-type: none"> XP Professional SP2 32 bit: Internet Explorer 6.0, Internet Explorer 7.0 and Firefox 2.0.Sun JRE 6 Vista Enterprise 32 bit: Internet Explorer 7.0 and Firefox 2.0.Sun JRE 6 Vista Enterprise 64 bit: Internet Explorer 7.0 and Firefox 2.0.Sun JRE 6 Vista Enterprise SP1 32 bit: Internet Explorer 7.0 and Firefox 2.0.Sun JRE 6 Vista Enterprise SP1 64 bit: Internet Explorer 7.0 and Firefox 2.0.Sun JRE 6
Mac	<ul style="list-style-type: none"> Mac OS X 10.5.0, 32 bit and 64 bit: Safari 3.0 Sun JRE 6 Mac OS X 10.4.3, 32 bit only: Safari 2.0. Sun JRE 5 Mac OS X 10.3.2, 32 bit only: Safari 1.1. Sun JRE 5

Adaptive Delivery for Juniper client applications

In cases where ActiveX is disabled or is not available due to platform or privilege limitations, the client application is installed using Java. Adaptive delivery is available for WSAM, Network Connect, Windows Terminal Services, and Secure Meeting clients.

Microsoft JVM, or Sun JRE 1.4.1 or greater must be installed on the client system to utilize adaptive Delivery for Juniper client applications.

Juniper Installer Service

Juniper Installer Service is supported for the following client applications: Network Connect, Windows Secure Application Manager (W-SAM), Host Checker, Cache Cleaner, and Terminal Services.

Qualified platforms:
