

Juniper Networks Academic Alliance

Keep pace with rapidly changing technologies through industry leading education and training programs that build your technical IP expertise. Juniper Networks Educational Services provides the courses; training and knowledge enterprises need to operate and maintain successful networks. We have expert training staff with deep technical and industry knowledge and hands-on classes focused on real-world problems and solutions.

Become a member of the Juniper Networks Academic Alliance now and be recognized as an institution that offers the latest in Enterprise networking classes. Equip your students with in-depth, solid hands-on training with Juniper Networks Enterprise routers and switches to provide the best educational and real world experience possible.

The Juniper Networks Academic Alliance program is designed specifically for colleges and universities to offer Juniper Networks Enterprise Networking courses to their students. Certified networking professionals are now in greater demand than ever commanding higher salaries and adding more value to high-end enterprises. Because of this increased need, we are pleased to provide your school with the opportunity to offer your students courseware that aids them in becoming certified in Juniper Networks JUNOS software. By establishing your school as an institution that offers the latest in enterprise networking technology education, you will be helping to advance your students' careers in the networking field as part of your institution's curriculum.

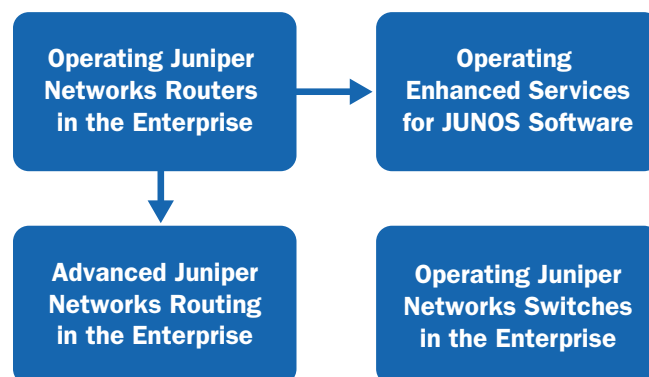

The Academic Alliance program offers all of the tools you need to successfully implement Juniper Networks Enterprise Networking courses at your school. Specifically, we provide you with:

- The Juniper Networks Education Services Enterprise Networking courseware, lab guides and diagrams, and technical manuals
- Discounts on courseware, technical support and hardware
- Course design templates that provide a guideline for translating our day-based courses into semester or trimester-based curriculum
- Access to the Juniper Networks education services staff of professional course developers and teams that will assist you with tips and feedback, as well as certified instructors who are industry recognized IP and security networking experts
- Full access to our Juniper Technical Assistance Center (JTAC) for any hardware or software issues

Student Benefits

Deploying enterprise networks that can securely and reliably deliver high-speed services is a must for setting businesses apart in today's highly competitive world. The Academic Alliance program prepares your students to keep pace with a rapidly changing networking technology landscape by providing them with the technical detail and capabilities needed to ensure their ability to operate successful networks.

Our classes consist of in-depth, hands-on training based on real world experience with Juniper Networks hardware and JUNOS software. Upon completion of these courses, your students will be able to advance their networking careers with the passing of the relevant technical certification exams.

Juniper Networks Academic Alliance Enterprise Networking Courseware

Juniper Networks education services has developed enterprise networking courseware and certifications that are specifically designed for experienced network professionals with beginner to advanced knowledge of Juniper Networks enterprise networking deployments. Specifics include:

- **Operating Juniper Networks Routers in the Enterprise** – This is an introductory-level course that focuses on installation, configuration and operational analysis of Juniper routers in the enterprise environment. This course prepares you to take the Juniper Networks Certified Internet Associate – Enterprise Routing (JNCIA-ER) exam.
- **Advanced Juniper Networks Routers in the Enterprise** – This lab-intensive course provides an advanced look at routing and services configurations on Juniper routers commonly used in the enterprise environment. This course prepares you to take the Juniper Networks Certified Internet Specialist – Enterprise Routing (JNCIA-ES) exam.
- **Operating Enhanced Services for JUNOS Software** – This four-day course is designed to provide students with the knowledge and skills necessary to use JUNOS software with enhanced services. It covers advanced security features and configurations of Juniper Networks platforms, focusing specifically on the enhanced services of JUNOS software. This course prepares you to take the Juniper Networks Certified Internet Specialist – Enhanced Services (JNCIA-ES) exam.
- **Operating Juniper Networks Switches in the Enterprise** – This four-day course discusses the configuration of Juniper Networks EX-series switches in a typical network environment. This course prepares you to take the Juniper Networks Certified Internet Associate – Enterprise Switching (JNCIA-EX) exam.
