

PHYSICAL INTERFACE MODULE (PIM) COMPATIBILITY MATRIX FOR J SERIES ROUTERS AND SSG SERIES SECURE SERVICES GATEWAYS

Juniper Networks® offers customers a variety of choices when connecting remote, branch, and regional offices to the corporate network, including the Juniper Networks J Series Services Routers and Juniper Networks SSG Series Secure Services Gateways. Both of these product portfolios offer support for a variety of physical interface modules (PIMs) including T1, E1, FE, Serial, DS3, E3, ADSL, G.SHDSL, ISDN BRI, and enhanced Ethernet connectivity.

Juniper Networks Services and Support

Juniper Networks is the leader in performance-enabling services and support, which are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to bring revenue-generating capabilities online faster so you can realize bigger productivity gains and faster rollouts of new business models and ventures. At the same time, Juniper Networks ensures operational excellence by optimizing your network to maintain required levels of performance, reliability, and availability. For more details, please visit www.juniper.net/us/en/products-services/.

About Juniper Networks

Juniper Networks, Inc. is the leader in high-performance networking. Juniper offers a high-performance network infrastructure that creates a responsive and trusted environment for accelerating the deployment of services and applications over a single network. This fuels high-performance businesses. Additional information can be found at www.juniper.net.
