JUNIPER CARE SERVICES

Product Description
Receive best-in-class traditional 24x7 support. Take advantage of award-winning online support that is rated one of the ten best Web support sites for an industry unprecedented six consecutive years, according to the Association of Support Professionals (ASP). No other networking company has won more than three consecutive ASP awards.

- Is maximized network availability a priority for your organization?
- Is your internal IT staff stretched too thin?
- Do you need to reduce network-based risk while increasing the value of your network investment?
- Would you like to reduce your current support costs?

If you answered "yes" to any or all of these questions, you will benefit from Juniper Care Services. Experts in achieving network availability levels, our engineers and technicians can help your organization meet the most aggressive network demands through operational support that ensures maximum uptime, utility, and value.

Service Description
Juniper Care combines traditional 24x7 remote technical support, hardware replacement services, and online support. More than a simple break-fix service, Juniper Care helps you meet network demands with technical and operational support designed to keep your network running reliably, while at the same time protecting your high-performance networking investment.

- Integrate your customer relationship management (CRM)/ticketing systems with Juniper’s through a set of easy-to-use and well-defined Juniper Support APIs to provide B2B integration.
- Juniper Care improves staff productivity and decreases operational costs through award winning 24x7 support and automation
- Easily migrate to Juniper Advanced Care or Juniper Premium Care as your network grows and you require more features.

Figure 1: The Juniper Care Services portfolio allows you to choose the support level that’s right for you.
Features and Benefits

Table 1. Juniper Care Services Features and Benefits

<table>
<thead>
<tr>
<th>Feature</th>
<th>Feature Description</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical support</td>
<td>Gain access to Juniper Networks technical support engineers, software updates, online access to our knowledge base, online tools, and hardware replacement options.</td>
<td>Tailor a comprehensive range of post-deployment technical support plans to meet the specific requirements of your network environment.</td>
</tr>
<tr>
<td>MyJuniper</td>
<td>Provides a highly customizable Customer Service portal that rapidly delivers essential, up-to-date support data to users, including accurate case, contract, and notifications specific to the purchased products.</td>
<td>Enable more personal, proactive, and efficient management of product support needs.</td>
</tr>
<tr>
<td>Support API – Case API</td>
<td>Integrate with a set of fully supported secure Juniper Support Case APIs providing full case lifecycle management through a B2B integration via an established onboarding process.</td>
<td>Clients integrating their support CRM/ticketing system with Juniper via this channel avoid duplicating data. The integration simplifies the process and reduces effort since users only need to enter data once in their CRM/ticketing system.</td>
</tr>
<tr>
<td>Juniper Software Support Evaluation Tool (JSSET)</td>
<td>Offers a secure portal that provides Proactive Bug Notifications (PBNs) for Junos software defects based on configurable customer profiles.</td>
<td>Alerts you to known critical/major issues that can impact the devices in your network. Helps determine the impact on and potential exposure of different Junos versions.</td>
</tr>

Juniper also offers Next-Day Ship service level to customers who are in Brazil, Russia, India and China. Please see the Juniper Care Service Description Document for details.

For all hardware replacement options, please follow Juniper’s then-current RMA Policy and Procedures which are posted at www.juniper.net/support/rma-procedure.html.

Return the defective Field Replaceable Unit (FRU) to a Juniper Networks-specified RMA return depot locations, which can be found at www.juniper.net/support/rma-locations.html. Depot Locations are subject to change and replacements may be new or refurbished. Please note that actual delivery times may be affected by events beyond Juniper’s reasonable control or by applicable export or import controls and licensing requirements or by local customs processes.

JTAC Access

With Juniper Networks Technical Assistance Center (JTAC) support, you have unlimited 24x7 access to JTAC engineers by phone and online. As a single point of contact for all of your support needs, JTAC engineers have extensive experience supporting large-scale networks. JTAC engineers can help you diagnose system problems, configure, troubleshoot, and provide work-around solutions. To ensure that JTAC responds as quickly as possible, automatic escalation alerts to senior management are triggered on all priority issues.

Software Releases

Juniper Networks provides you with access to all new software releases as soon as they are made available for general release.
CSC Online E-Support
The Customer Support Center (CSC) provides you with self-service access to Juniper’s award winning online portal for the information, answers, tools, and service options required to ensure the support of your network investment. Features within the CSC include, but are not limited to, software downloads, technical alerts and bulletins, RMA requests, and the Juniper Networks Knowledge Base.

MyJuniper
The MyJuniper customer support portal is designed to be the primary tool for Juniper’s Customer Service organization. The portal, powered by a big-data infrastructure that ensures data is accurate and available, provides up-to-date support information via a highly customizable user interface.

Return-to-Factory
Juniper Networks will replace or repair the FRU identified in the Juniper-issued RMA and ship the replacement or repaired FRU, as applicable, to the Ship-to Address within 10 business days after Juniper’s receipt of the defective FRU at the specified RMA return location. The repaired or replacement FRU may be shipped from a Juniper regional distribution center.

Next-Day Delivery
Juniper Networks will deliver FRU replacements to the ship-to address in advance of receiving returned defective hardware within the next business day if Juniper issues an RMA by 3pm (local JTAC time). "Next-Day Delivery" is subject to availability.

Same-Day
Juniper Networks will deliver FRU replacements to the ship-to address, 24 hours a day, 7 days a week, within 4 hours of issuance of RMA in advance of receipt of defective hardware. "Same-Day" is subject to availability.

Onsite
Upon final diagnosis of a part failure and replacement authorization by Juniper Networks, a trained service technician is dispatched to the affected site. Once there, the service technician coordinates with JTAC and the Customer for final resolution of the problem and the Customer will return the defective product to Juniper Networks. Juniper Networks Onsite support offerings do not provide assistance for software troubleshooting or configuration support.

Support API – Case API
Juniper provides a set of fully supported and secure Support Case APIs to support the B2B integration of the client’s (Juniper customer’s) support CRM/ticketing systems with Juniper’s support CRM system. Access to the Support Case APIs is through an established onboarding process.

Juniper Software Support Evaluation Tool
The Juniper Software Support Evaluation Tool (JSSET) is a secure portal that provides Proactive Bug Notifications (PBNs) focused on Junos software defects that may have critical or major service impact. The portal can be used to generate on-demand reports, assess software defects, and evaluate versions of Junos software to determine the potential impact and exposure.

Key Features

Automated Infrastructure
Juniper incorporates advanced automation and big data tools within its support processes to ensure results are achieved quickly and accurately. These fully automated tools operate without human interaction; every data file received is automatically analyzed to identify problems.

The Juniper Case Attachment Suite includes several tools that automatically scan files and determine root cause. Big data analytics are employed to store and reference historical information for precise and reliable troubleshooting, delivering essential support information to customers in real-time.

Support API – Case API
The Juniper Support Case APIs are a well-defined set of REST APIs that enable clients (Juniper customers) to integrate their support CRM/ticketing systems with Juniper’s support CRM system. As part of this B2B integration, clients can:

- Automatically create a case/service request (SR) in Juniper’s support CRM system based on a case/ticket/incident in their system;
- Manage the case/SR lifecycle via this API channel (for example, to update the case, attach files, escalate the case, or request case closure); and
- Receive asynchronous updates to the case/SR made by Juniper support engineers, and/or other channel updates, without the need to poll.

For detailed API onboarding, documentation, definition, and support models, please refer to the documentation found at https://eng.juniper.net/site/global/build/support_automation/support_api/case_api/index.gsp.
Juniper Software Support Evaluation Tool

The JSSET portal provides a large number of PBN capabilities. The user can build highly customized queries based on customer profiles (for instance, Junos version and hardware inventory), preview the results online, produce an impact assessment, and export the relevant data to preformatted reports for delivery.

Key features include:

- Reporting Junos software defects that may have a critical or major service impact
- Ability to attach multiple queries to single customer profiles
- Enabling powerful "fuzzy search" on MR, SR and X releases (the ability to query PRs based on main release e.g. 16.1, 17.1 etc.)
- Support for advanced filtering with multiple positive and negative keyword filtering
- Ability to export and customize reports

Complementary or Higher Level Services

Juniper Networks® Advanced Care provides you with 24x7 access to an Escalation Management Desk via a dedicated phone number, expedited support through direct access to Juniper senior support engineers, and faster support response times—all designed to ensure that your issues are handled promptly and effectively. Additional features include onboarding assistance, best-practice knowledge transfer, and customized reports, all available to enhance your networking expertise, anticipate and prevent problems before they occur, and reduce administration. For more details, please see the Advanced Care Data Sheet.

Juniper Networks Premium Care provides you with all the features and value of Advanced Care plus an assigned service manager as a single point of contact for managing all of your service-related issues and entitlements. For more details, please see the Premium Care Data Sheet.

Juniper Networks Services and Support

Juniper Networks is the leader in performance-enabling services that are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to maximize operational efficiency while reducing costs and minimizing risk, achieving a faster time to value for your network. Juniper Networks ensures operational excellence by optimizing the network to maintain required levels of performance, reliability, and availability. For more details, please visit www.juniper.net/us/en/products-services.

Ordering Information

Juniper Care Services are available globally. For details, please contact your local Juniper Partner or Juniper Networks field sales manager.

About Juniper Networks

Juniper Networks is in the business of network innovation. From devices to data centers, from consumers to cloud providers, Juniper Networks delivers the software, silicon and systems that transform the experience and economics of networking. The company serves customers and partners worldwide. Additional information can be found at www.juniper.net.
