WHERE

Mandalay Bay
3950 S Las Vegas Blvd
Las Vegas, NV 89119

SHOW HOURS

Aug. 7 - 10:00am - 7:00pm
Aug. 8 - 10:00am - 5:00pm

Juniper Connected Security Helps You Annihilate Threats!

Join Juniper Networks at booth #238 at Black Hat 2019 in Las Vegas August 7-8
for your chance to win a custom gaming PC!

Safeguard Users, Applications and Infrastructure with Juniper Connected Security.

The hacker on TV isn't real. Hackers don't just bang on a command line and have networks reveal themselves. Hackers use automation. They curate and master a toolbox full of scripts, applications, and other resources to strike the areas of your network where you have no visibility. Whether they work alone or as part of a larger group, hackers build upon the knowledge of those who went before, automating as much as possible in order to be as effective and efficient as possible.

Countering capable hackers requires complete visibility into every connection point on your network, and automated, repeatable security that extends from endpoint to edge and to every cloud in between. Applications, services and infrastructure all need to participate. Juniper Connected Security gives organizations the ability to safeguard users, applications and infrastructure by extending security to all points of connection across the network.

Whether your opponent is a ransomware gang, a nation-state, or a Master-level script-fu army of one, the best solution is one that turns your entire network into your first line of defense. That's Juniper Connected Security.

Join us to learn how to:

- Bring visibility to the invisible by detecting threats within encrypted traffic.
- Defeat denial of service attacks.
- Automate your incident response...all the way down to the switch port.
- See who and what is on your network and extend security measures across all connection points.

Come see us at booth #238 to discuss how Juniper Connected Security can provide you the tools necessary to stand up to attackers and annihilate threats. We also invite you to join us for a featured presentation taking place at the Expo:

August 8, 2018 - 3:40pm

Business Hall Theater A

Separating Signal From Noise: A Look Inside Threat Discovery at Juniper Threat Labs

Dr. Mounir Hahad,
Head of Juniper Threat Labs
