

更新日：2020/8/1

本手順は Contrail(2008), Insight の OVA Image を使用し、KVM 上にインストールする手順を記載する

※注意点

- R2008 時点では Beta リリースとなり、商用利用不可
- OVA を使用した Install を実施した場合、Fabric ユースケースのみサポートされ、vRouter を使用した VM/Container の Overlay は未サポートとなる
- Insight OVA には Insight Flow は含まれていません

0.Requirements

Contrail VM:

Insights VM: 16Core, 16GB Mem, 100GB Disk

1.Contrail Install

1.1 Image の準備

contrail-ova-centos7-2008.121.tgz

1.2 VMDK -> QCOW2 へのコンバート

```
tar xzvf contrail-ova-centos7-2008.121.tgz
```

```
qemu-img convert -f vmdk -O qcow2 /home/images/contrail-centos-7-x86_64_2020-09-17_03-01-05-disk001.vmdk /home/images/contrail-centos-7-x86_64_2020-09-17_03-01-05-disk001.qcow2
```

1.3 QCOW2 を使用した VM Deploy

```
virt-install --name contrail1 --disk path=/home/images/contrail-centos-7-x86_64_2020-09-17_03-01-05-disk001.qcow2,format=qcow2 --vcpus 4 --ram=16384 --network bridge=br-mng-y,model=virtio --network bridge=br-data1,model=virtio --virt-type kvm --cpu host --os-variant linux --serial pty --console pty,target_type=virtio --graphics vnc,listen=0.0.0.0 --noautoconsole --import
```

1.4 事前準備

root(pass:contrail123)でコンソールログインし、以下を設定

eth0, eth1 の IP Address を設定

```
echo 1 > /proc/sys/net/ipv4/ip_forward
```

1.5 Contrail Command, Controller のインストール

contrail(pass:contrail123)で Login し、セットアップウィザードを起動

Registry and cluster details

Interfaces

Summary

Installation

Please specify cluster name and password for "admin" user.
Provided password will be used to log into Contrail Command and to create a Linux user.
Current default password: contrail123

Move between fields with <TAB> / <Shift> + <Tab>.

Select "Next" to go to the next screen.
Select "Prev" to go back to the previous screen.
Select "Quit" to quit without installing Contrail.

Registry and cluster details

Interfaces

Summary

Installation

Please select network interfaces:

- User network - the network through which the admin/user accesses this appliance.
- Management network - the network through which this appliance manages the fabric.

If the management network interface has no IP address - then it can be assigned on the next screen.

Move between fields with <TAB> / <Shift> + <Tab>, select interface with <ENTER>.

Select "Next" to go to the next screen.

Select "Prev" to go back to the previous screen.

User network interface **eth0 [192.168.0.100/24]**

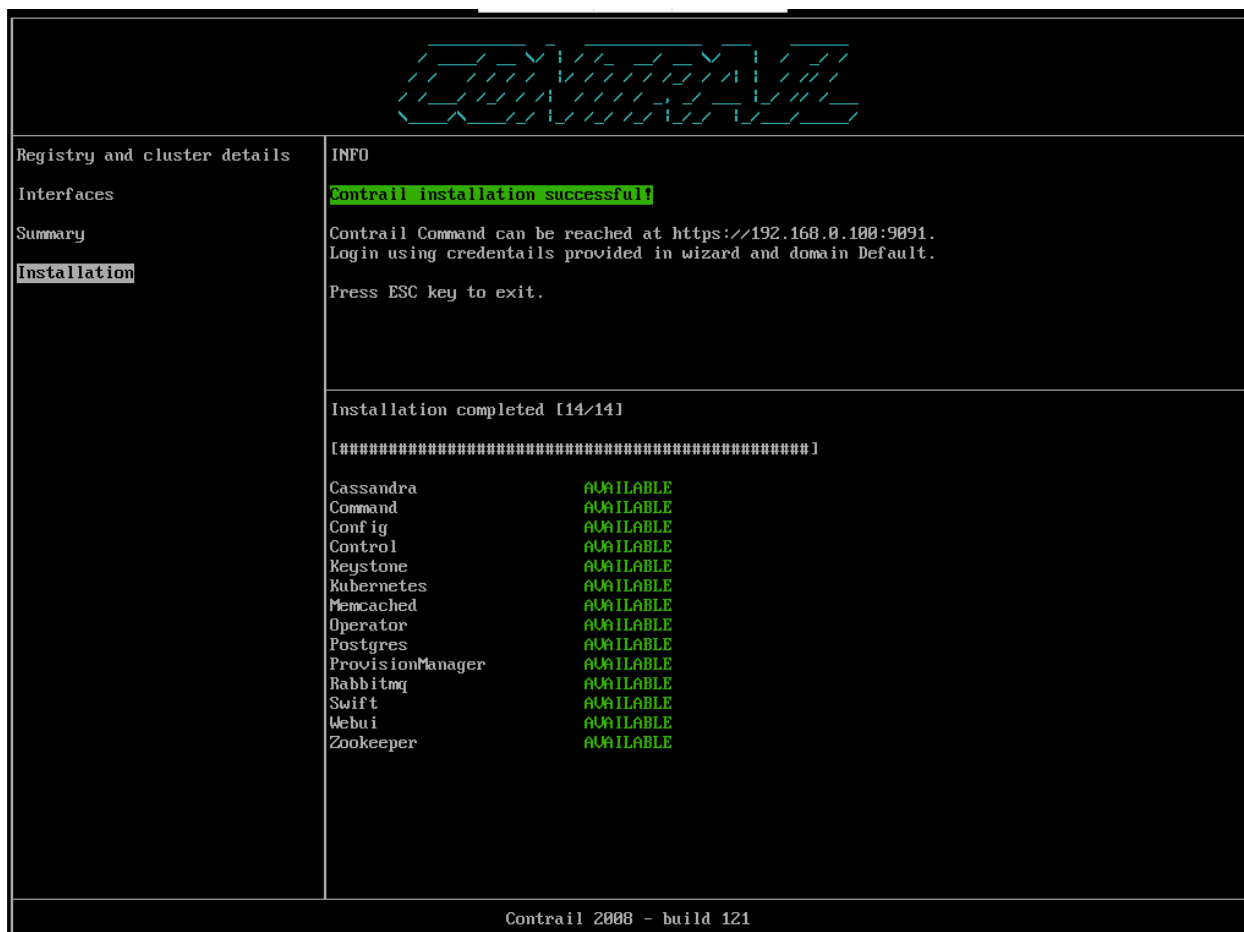

Management network interface **eth1 [192.168.1.100/24]**

Log in

Install 完了後, Contrail Command にアクセス
https://ip:9091
※Domain は'default'ではなく、'Default'

2.Insight Install

2.1 Image の準備

contrail-insights-ova-3.2.6-2008.121.tgz

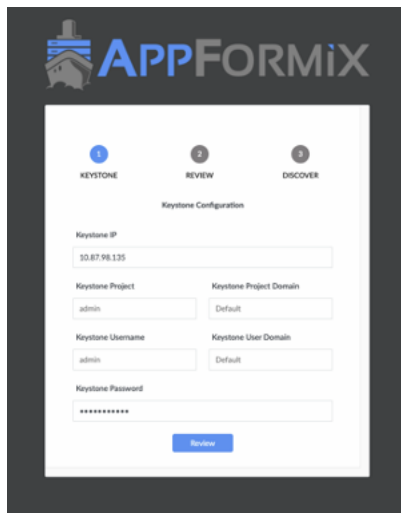

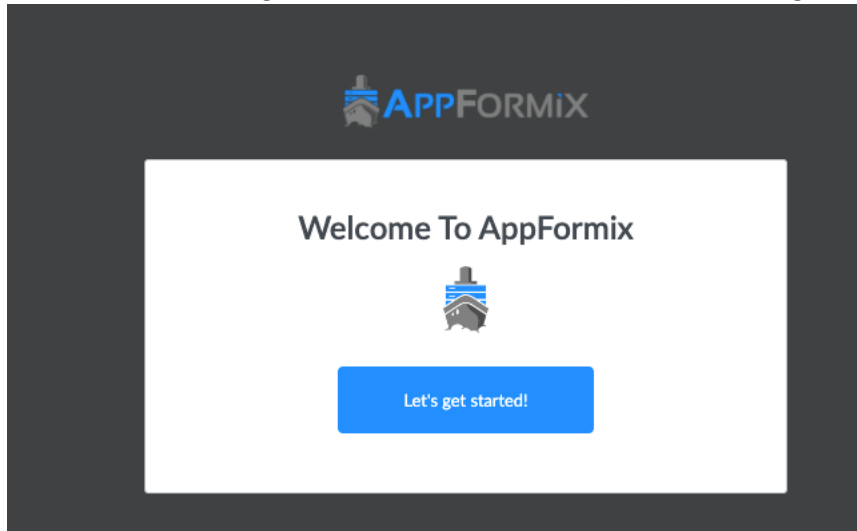

2.2 事前準備

root(pass:cOntrail123)でコンソールログインし、IPAddress を設定

2.3 設定

<http://ip:9000> にアクセス

※ブラウザから Insight へは DirectAccess が必須(PortFowarding, NAT 不可)
