

JUNIPER AI ADVANCED CARE SERVICES DATASHEET

Service overview

Today's organizations are under constant pressure to meet dynamic market demands while increasing their return on investment. Juniper AI Advanced Care provides high value services designed for enterprise customers, with effective personalized expert guidance and high-touch support from Juniper.

Service description

[Juniper Networks® services](#) provides the support and assistance needed for managing the complexity of technology. The rich set of services helps you design your network more quickly and keep it at optimum readiness and able to evolve efficiently in response to the demands of your business.

Juniper AI Advanced Care is a personalized service that drives customer success from initial onboarding to tailored technical guidance and support throughout the solution life cycle. With a single point of contact, customers get an enhanced support experience that is shaped by the business outcomes they want to achieve, such as better user experiences. Your technical contact does this by helping optimize network design, performance, and availability with best practices from Juniper.

Juniper AI Advanced Care includes all the features in Juniper AI Care and more.

Day 0 and Day 1 (Prepare and Deploy)

Customers get onboarding assistance, as well as personalized guidance and technical design review, from an assigned technical liaison. The service also includes two All Access Training Passes that provide customers with the opportunity to add to their skills with one year of access to all Juniper Education Services training courses.

Day 2 and Day 3 (Adopt and Grow)

With the assigned technical liaison, AI Advanced Care customers have a single point of contact who provides high-touch support during regular business hours. The service also includes assistance in the progression of high-impact network issues, proactive technical notification, technical consultation, operational review meetings, and knowledge transfer related to Juniper campus and branch products and solutions.

Additional service features include 24x7 active issue management via a dedicated phone number, accelerated response times, and customized reports.

AI Care Services portfolio

Three levels of onboarding, operational, and technical assistance

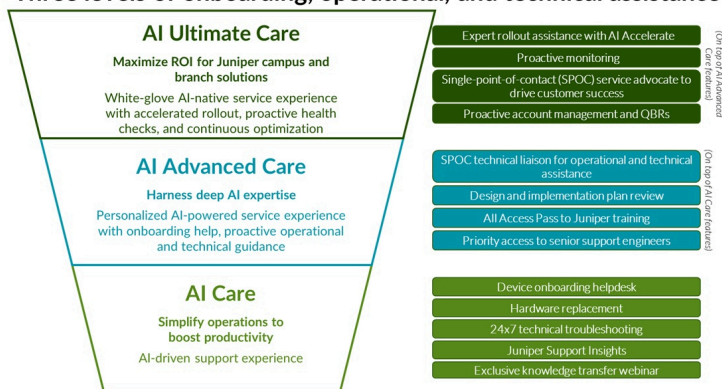

Figure 1: The Juniper AI Care Services portfolio has three options: AI Care, AI Advanced Care, and AI Ultimate Care

Features and benefits

Table 1. Juniper AI Advanced Care features and benefits

Feature	Feature description	Benefit
Designated remote technical liaison	A named technical expert provides assistance on technical needs	Helps you implement best practices across your network and provides knowledge transfer
Onboarding assistance	Guidelines and processes for accessing Juniper resources	Eases the learning curve and accelerates operational processes
All Access Training Pass	Two All Access Training Passes for the first year of the service term, providing access to all Juniper Education Services courses for a year	Transfers training and knowledge to your engineers
Design review	Technical review of any design document or implementation plan once per quarter	Gain confidence and assurance that the solution or new functionality is deployed based on Juniper best practices
Active issue management (24x7)	A dedicated phone number provides after-hours access to a designated, remote support team, ensuring cases are properly escalated. Follow-up reports are provided until escalation requests are complete	Ensures that issues are handled and resolved in an efficient manner, keeping your network running smoothly
Proactive operational support	Proactive assistance with Return Material Authorization (RMA) issues, asset management, and support related to contracts, licenses, and entitlement	Ensures operational success to keep your network running smoothly
Escalation management and technical issue resolution	Technical input and guidance to facilitate and expedite problem resolution	Minimizes impact of business-critical technical cases
Periodic review of open issues	Operational review calls to provide customer updates on technical case activities and ensure ongoing progress	Improves performance and reduces downtime by identifying areas for improvement during regular check-ins
Knowledge transfer webinars	A quarterly, interactive webinar to share best practices for various features, use cases, etc.	Enhances staff knowledge and expertise on Juniper products and services to simplify operational processes and maintain a highly available network
Technical knowledge transfer Q&A	Informal Q&A with consultative guidance for questions and service deliverables	Provides technical knowledge to maximize the service value and acquire the necessary knowledge for keeping your network running in an optimal state
Custom reports and consultation	Access to proactive bug notification (PBN) report, quarterly Customer Service experience report including installed base and entitlement, end-of-life (EOL)/end-of-service (EOS), case history, and RMA updates	Offers personalized review of your network to enhance decision making for network performance and planning success
Environment-specific technical guidance	Guidance tailored to your campus and branch solutions	Maximizes value of Juniper AI Advanced Care

Ordering information

The Juniper AI Advanced Care contract has a minimum term of 12 months.

Juniper AI Advanced Care Services are available globally. For details, please contact your local Juniper authorized partner, Juniper Networks Account Manager, or your assigned Juniper Service Business Manager.

For additional details such as scope, deliverables, eligibility, and exclusions, please refer to the corresponding Service Description Document <https://support.juniper.net/support/guidelines/>.

As a prerequisite, customers must have [Juniper AI Care Service](#), which provides the foundational base required to enable Juniper AI Advanced Care.
