

Transform enterprise networking with AI-Native and 5G capabilities:

5 reasons to choose Juniper and Cradlepoint

1. Unleash a complete enterprise stack with 5G WWAN diversity

Together, Juniper and Cradlepoint deliver in-building enterprise and campus switching, Wi-Fi, security, SD-WAN solutions, and 5G connectivity in a holistic, full-stack solution. Put the power of 5G wireless WAN (WWAN) integration to work for WAN connection diversification, faster time to service, enhanced application performance, and more.

2. Accelerate time to service and realize Day 1 connectivity

Realize faster time to service, Day 1 connectivity, and enhanced overall performance by integrating 5G WWAN into your wired and WLAN network. With integrated 5G, you get the added benefits of WAN failover and 5G high-bandwidth backup for primary wired WAN connectivity.

3. Optimize business continuity for exceptional experiences

Modern businesses require 100% uptime: With the Juniper Portfolio (Mist AI, Wi-Fi 6E, Bluetooth LE, wired LAN enterprise switching, SD-WAN, security) and Cradlepoint 5G WWAN connectivity, you're provided with alternative connection failover and improved network agility, making downtime a thing of the past.

4. Tap the power of AI-Native Networking problem solving

Marvis Virtual Network Assistant (VNA) for data center, the first and only AI-Native problem solver and conversational assistant, provides end-to-end visibility and enables AI for IT operations (AIOps), transforming how your teams interact with the network. It can leverage the combined data from Mist AI and Cradlepoint NetCloud™ to give you end-to-end visibility, assured business continuity, and real-time insights for making every user experience exceptional.

5. Enable 5G wireless WAN for primary network access

Not only is 5G great for mobile offices, pop-up locations, kiosks, and short-term events—places where wired WAN connectivity is not an option—increasingly businesses are opting for 5G WWAN for primary network access. It delivers greater agility and enables new use cases for Juniper's full stack of wired, wireless, and SD-WAN solutions.

About Juniper

Juniper Networks believes that connectivity is not the same as experiencing a great connection. Juniper's AI-Native Networking Platform is built from the ground up across the AIOps layer and our systems to fully harness the power of AI. From real-time fault isolation to proactive anomaly detection and self-driving corrective actions, it provides campus, branch, data center, and WAN operations with next-level predictability, reliability, and security.

About Cradlepoint

Cradlepoint, part of Ericsson, enables the freedom to securely connect people, places, and things that drive more experiences, new ways to work, and better business results. The company offers 4G/5G Wireless WAN routers and adapters—controlled through Cradlepoint NetCloud™—and solutions for security and private cellular networking.

Learn more

The integration of Cradlepoint 5G WWAN with the Juniper AI-Native Networking Platform provides a direct path to the next level of enterprise networking. If you're looking to unleash new 5G use cases while optimizing business resiliency and continuity and enhancing application performance, look no further than Juniper and Cradlepoint.
