

# Secure AI-driven SD-WAN Promotion

Juniper SD-WAN driven by Mist AI™ is a highly differentiated solution that optimizes WAN performance, minimizes costs, and delivers the best user experiences from client-to-cloud. When leveraged with Juniper's Secure Edge portfolio all types of Enterprises can leverage a cost-effective and reliable way to adopt a SASE architecture.

To introduce customers to our solution, which includes industry leading Mist AIOps, innovative Session Smart Routing, and world-class connected security – all managed via a common cloud - Juniper has created the following special pricing promotion, available for a limited time.

## Solution Benefits

- Simplified operations and rapid deployments that simply scale from 10's to 1000's
- Reduced mean time to repair (MTTR) with AI-driven insights and automation
- Improved user experience with assurances in all network domains
- Improved application performance with tunnel-free SD- WAN
- Rapid, high-scale deployments with Zero Touch Provisioning
- Juniper Secure Edge capabilities protect web, SaaS, and on-premises applications and provides users with consistent and secure access that follows them wherever they go

## Bundle Benefits

- Complete AI-driven SD-WAN solution can be easily ordered via single software SKU and single hardware SKU
- Extremely attractive pricing coupled with unmatched functionality and value

## AI with Edge Bundle
