## Applicable to All Releases

### Registry

The Juniper Contrail Container Registry is hosted at [hub.juniper.net/contrail](https://hub.juniper.net/contrail).

### Access to Registry

Please reach out to [contrail-registry@juniper.net](mailto:contrail-registry@juniper.net) to get access credentials for Contrail Container Registry.

### HTTP Proxies to the Juniper Contrail Container Registry

HTTP proxies for Docker must be properly set to pull containers from the Juniper Contrail Container Registry in most customer environments. These HTTP proxy settings vary by network setup and deployer module. HTTP proxy settings must apply to all Contrail cluster nodes.

HTTP proxy settings are configured outside the scope of Contrail Networking. For information on HTTP proxy settings, see [HTTP/HTTps proxy](#) in the [Control Docker with systemd](#) document from Docker or the [Working with HTTP Proxies](#) document from RedHat Openshift.
