

group

Syntax For group configuration with a source, use the following syntax:

```
group ip-address {  
    source ip-address;  
}
```

For group configuration without a source, use the following syntax:

```
group group;
```

Hierarchy Level [edit dynamic-profiles *profile-name* protocols igmp interface *interface-name* static],
[edit logical-systems *logical-system-name* protocols igmp interface *interface-name* static],
[edit protocols igmp interface *interface-name* static]

Release Information Statement introduced before JUNOS Release 7.4.
The [edit dynamic-profiles *profile-name* protocols igmp interface *interface-name* static] hierarchy added in JUNOS Release 9.2.

Description When configuring with a source address, configure the IGMP multicast group address that receives data on an interface and a source address for certain packets. For configuration without a source address, configure only the IGMP multicast group address that receives data on an interface.

Options *ip-address*—Group IP address.

group—Name of group.

NOTE: You must specify a unique address for each group.

Required Privilege Level routing—To view this statement in the configuration.
routing-control—To add this statement to the configuration.
