

interface

Syntax	interface (all <i>interface-name</i>);
Hierarchy Level	[edit ethernet-switching-options analyzer <i>name</i> input egress], [edit ethernet-switching-options analyzer <i>name</i> input ingress], [edit ethernet-switching-options analyzer <i>name</i> output]
Release Information	Statement introduced in JUNOS Release 9.0 for EX-series switches.
Description	Configure the interfaces for which traffic is mirrored.
Options	<p>all—Apply port mirroring to all interfaces on the switch. Mirroring a high volume of traffic can be performance intensive for the switch. Therefore, you should generally select specific input interfaces in preference to using the all keyword, or use the all keyword in combination with setting a ratio for statistical sampling.</p> <p><i>interface-name</i>—Apply port mirroring to the specified interface only.</p>
Required Privilege Level	routing—To view this statement in the configuration. routing-control—To add this statement to the configuration.
