

## interfaces

---

**Syntax**    interfaces {  
              *interface-name* {  
              }  
              unit *logical-unit-number* {  
                  output-traffic-control-profile *profile-name*;  
              }  
          }

**Hierarchy Level**    [edit dynamic-profiles *profile-name* class-of-service]

**Release Information**    Statement introduced before JUNOS Release 7.4.  
                              The [edit dynamic-profiles *profile-name*] hierarchy added in JUNOS Release 9.2.

**Description**    Configure interface-specific CoS properties for incoming packets.

**Options**    *interface-name*—Either the specific name of the interface you want to assign to the dynamic-profile or the interface variable (\$junos-interface-ifd-name). The interface variable is dynamically replaced with the interface the DHCP client accesses when connecting to the router.

The remaining statements are explained separately.

**Required Privilege Level**    interface—To view this statement in the configuration.  
                                  interface-control—To add this statement to the configuration.
