

members

Syntax `members [(all | names | vlan-ids)];`

Hierarchy Level [edit interfaces *ge-fpc/chassis/port* unit 0 family mpls ethernet-switching vlan]

Release Information Statement introduced in JUNOS Release 9.0 for EX-series switches.

Description For trunk interfaces, configure the VLANs for which the interface can carry traffic.

Options `all`—Specifies that this trunk interface is a member of all the VLANs that are configured on this switch. When a new VLAN is configured on the switch, this trunk interface automatically becomes a member of the VLAN.

NOTE: Each VLAN that is configured must have a specified VLAN ID when you attempt to commit the configuration; otherwise, the configuration commit fails. Also, `all` cannot be the name of a VLAN on the switch.

names—Names of one or more VLANs.

vlan-ids—Numeric identifiers of one or more VLANs.

Required Privilege Level `routing`—To view this statement in the configuration.
 `routing-control`—To add this statement to the configuration.
