

option

Syntax option {
 [(*id-number option-type option-value*)
 (*id-number array option-type option-value*)];
 }

Hierarchy Level [edit access address-assignment pool *pool-name* family inet dhcp-attributes]

Release Information Statement introduced in JUNOS Release 9.0.

Description Specify user-defined options that are added to client packets.

Options *id-number*—Any whole number. The ID number is used to index the option and must be unique across a DHCP server.

option-type—Any of the following types: flag, byte, string, short, unsigned-short, integer, unsigned-integer, or ip-address.

 array—An option can include an array of values.

option-value—Value associated with an option. The option value must be compatible with the option type (for example, an On or Off value for a flag type).

Required Privilege Level admin—To view this statement in the configuration.
 admin-control—To add this statement to the configuration.
