

## overrides

---

**Syntax**    overrides {  
              client-discover-match;  
              interface-client-limit *number*;  
              no-arp;  
          }

**Hierarchy Level**    [edit logical-systems *logical-system-name* routing-instances *routing-instance-name* system services dhcp-local-server],  
                          [edit logical-systems *logical-system-name* routing-instances *routing-instance-name* system services dhcp-local-server group *group-name*],  
                          [edit logical-systems *logical-system-name* system services dhcp-local-server],  
                          [edit logical-systems *logical-system-name* system services dhcp-local-server group *group-name*],  
                          [edit logical-systems *logical-system-name* routing-instances *routing-instance-name* system services dhcp-local-server],  
                          [edit logical-systems *logical-system-name* routing-instances *routing-instance-name* system services dhcp-local-server group *group-name*],  
                          [edit routing-instances *routing-instance-name* system services dhcp-local-server],  
                          [edit routing-instances *routing-instance-name* system services dhcp-local-server group *group-name*],  
                          [edit system services dhcp-local-server],  
                          [edit system services dhcp-local-server group *group-name*]

**Release Information**    Statement introduced in JUNOS Release 9.2.

**Description**    Override the default configuration settings for the extended DHCP local server. Specifying the **overrides** statement with no subordinate statements removes all DHCP local server overrides at that hierarchy level.

To override global DHCP local server configuration options, include the **overrides** statement and its subordinate statements at the [edit system services dhcp-local-server] hierarchy level. To override DHCP relay agent configuration options for a named group of interfaces, include the statements at the [edit system services dhcp-local-server group *group-name*] hierarchy level.

The statements are explained separately.

**Required Privilege Level**    system—To view this statement in the configuration.  
                                  system-control—To add this statement to the configuration.
