

## rewrite-rules

---

**Syntax**    `rewrite-rules {  
              (dscp | ieee-802.1 | inet-precedence) rewrite-name {  
                  import (rewrite-name | default);  
                  forwarding-class class-name {  
                      loss-priority level code-point (alias | bits);  
                  }  
              }  
          }`

**Hierarchy Level**    [edit class-of-service]

**Release Information**    Statement introduced in JUNOS Release 9.0 for EX-series switches.

**Description**    Specify a rewrite-rules mapping for the traffic that passes through all queues on the interface.

The remaining statements are explained separately.

**Required Privilege Level**    routing—To view this statement in the configuration.  
                                  routing-control—To add this statement to the configuration.
