

vlan

Syntax vlan (all | *vlan-name*){
 interface *interface-name*;
 }

Hierarchy Level [edit ethernet-switching-options unknown-unicast-forwarding]

Release Information Statement introduced in JUNOS Release 9.3 for EX-series switches.

Description Specify a VLAN from which unknown unicast packets will be forwarded or specify that the packets will be forwarded from all VLANs. Unknown unicast packets are forwarded from a VLAN to a specific trunk interface.

The **interface** statement is explained separately.

Options all—All VLANs.

vlan-name—Name of a VLAN.

Required Privilege Level routing—To view this statement in the configuration.
 routing-control—To add this statement to the configuration.
