

acfc

Syntax	acfc;
Hierarchy Level	[edit interfaces <i>interface-name</i> ppp-options [Unresolved xref]], [edit interfaces <i>interface-name</i> unit <i>logical-unit-number</i> ppp-options [Unresolved xref]], [edit logical-systems <i>logical-system-name</i> interfaces <i>interface-name</i> unit <i>logical-unit-number</i> ppp-options [Unresolved xref]]
Release Information	Statement introduced before JUNOS Release 7.4.
Description	<p>For interfaces with PPP encapsulation, configure compression of the Data Link Layer address and control fields. The acfc option is not supported with frame-relay-ppp encapsulation.</p> <p>On M320, M120, and T-series routing platforms, address and control field compression (ACFC) is not supported for any ISO family protocols. Do not include the acfc statement at the [edit interfaces <i>interface-name</i> ppp-options compression] hierarchy level when you include the family iso statement at the [edit interfaces <i>interface-name</i> unit <i>logical-unit-number</i>] hierarchy level.</p>
Usage Guidelines	See Configuring PPP Address and Control Field Compression.
Required Privilege Level	interface—To view this statement in the configuration. interface-control—To add this statement to the configuration.
