

authentication-server

Syntax	authentication-server [<i>server-addresses</i>];
Hierarchy Level	[edit access profile <i>profile-name</i> radius]
Release Information	Statement introduced in JUNOS Release 9.0 for EX-series switches.
Description	Configure the Remote Authentication Dial-In User Service (RADIUS) server for authentication. To configure multiple RADIUS servers, include multiple server addresses. The servers are tried in order and in a round-robin fashion until a valid response is received from one of the servers or until all the configured retry limits are reached.
Default	Not enabled
Options	<i>server-addresses</i> —Configure one or more RADIUS server addresses.
Required Privilege Level	admin—To view this statement in the configuration. admin-control—To add this statement to the configuration.
