

## family

---

**Syntax**    family *family-name* {  
              filter *filter-name* {  
                  interface-specific;  
                  term *term-name* {  
                      from {  
                          *match-conditions*;  
                      }  
                      then {  
                          *action*;  
                          *action-modifiers*;  
                      }  
                  }  
              }  
          }

**Hierarchy Level**    [edit firewall]

**Release Information**    Statement introduced in JUNOS Release 9.0 for EX-series switches.  
                              Option interface-specific introduced in JUNOS Release 9.5 for EX-series switches.

**Description**    Configure a firewall filter for IP version 4.

**Options**    *family-name*—Version or type of addressing protocol:

- bridge—Filter Layer 2 (Ethernet) packets and Layer 3 (IP) packets.
- ethernet-switching—Filter Layer 2 (Ethernet) packets and Layer 3 (IP) packets.
- inet—Filter IPv4 packets.

The remaining statements are explained separately.

**Required Privilege Level**    interface—To view this statement in the configuration.  
                                  interface-control—To add this statement to the configuration.
