

## policer

---

**Syntax**    `policer policer-name {  
              filter-specific;  
              if-exceeding {  
                  bandwidth-limit bps;  
                  burst-size-limit bytes;  
              }  
              then {  
                  policer-action;  
              }  
          }`

**Hierarchy Level**    [edit firewall]

**Release Information**    Statement introduced in JUNOS Release 9.0 for EX-series switches.

**Description**    Configure policer rate limits and actions. To activate a policer, you must include the policer action modifier in the **then** statement in a firewall filter term. Each policer that you configure includes an implicit counter. To ensure term-specific packet counts, you configure a policer for each term in the filter that requires policing.

**Options**    *policer-name* —Name that identifies the policer. The name can contain letters, numbers, hyphens (-), and can be up to 64 characters long.

The remaining statements are explained separately.

**Required Privilege Level**    firewall—To view this statement in the configuration.  
                                  firewall-control—To add this statement to the configuration.
