

preserve-interface

Syntax	preserve-interface;
Hierarchy Level	[edit interfaces <i>interface-name</i> sonet-options aps]
Release Information	Statement introduced in JUNOS Release 7.6.
Description	<p>Provide link PIC replication, providing MLPPP link redundancy at the port level. This feature is supported with SONET APS and the following link PICs:</p> <ul style="list-style-type: none">■ Channelized OC3 IQ PIC■ Channelized OC12 IQ PIC■ Channelized STM1 IQ PIC <p>Link PIC replication provides the ability to add two sets of links, one from the active SONET PIC and the other from the standby SONET PIC, to the same bundle. If the active SONET PIC fails, links from the standby PIC are used without triggering link renegotiation. All the negotiated state is replicated from the active links to the standby links to prevent link renegotiation.</p>
Usage Guidelines	See Configuring SONET/SDH Physical Interface Properties.
Required Privilege Level	interface—To view this statement in the configuration. interface-control—To add this statement to the configuration.
