output-vlan-map]

Release Information Statement introduced before JUNOS Release 7.4.

Description For Gigabit Ethernet IQ and 10-Gigabit Ethernet IQ2 and IQ2-E interfaces and aggregated Ethernet interfaces using Gigabit Ethernet IQ interfaces, specify the VLAN rewrite operation to add a new VLAN tag to the top of the VLAN stack. An outer VLAN tag is pushed in front of the existing VLAN tag. If you include the **push** statement in the configuration, you must also include the **pop** statement at the [edit interfaces *interface-name* unit *logical-unit-number* output-vlan-map] hierarchy level.

Usage Guidelines See Stacking a VLAN Tag.

Required Privilege Level interface—To view this statement in the configuration.
interface-control—To add this statement to the configuration.
