

## route

---

**Syntax**    `route prefix {  
                  next-hop next-hop;  
                  metric route-cost;  
                  preference route-distance;  
                  }`

**Hierarchy Level**    [edit dynamic-profiles routing-options access]

**Release Information**    Statement introduced in JUNOS Release 9.5.

**Description**    Dynamically configure the parameters for access routes.

**Options**    *prefix*—Either the specific route prefix that you want to assign to the access route or the route prefix variable (\$junos-framed-route-ip-address-prefix). The route prefix variable is dynamically replaced with the value in Framed-Route Attribute [22].

The remaining statements are explained separately.

**Required Privilege Level**    routing—To view this statement in the configuration.  
                                  routing-control—To add this statement to the configuration.
