

## vlan-ranges

---

**Syntax**    `vlan-ranges {  
              dynamic-profile profile-name {  
                  accept (inet);  
                  ranges (any | low-tag) - (any | high-tag);  
              }  
          }`

**Hierarchy Level**    [edit interfaces *interface-name* dynamic-profile *profile-name*]

**Release Information**    Statement introduced in JUNOS Release 9.5.

**Description**    Configure multiple VLANs. Each VLAN is assigned a VLAN ID number from the range.

**Options**    *any*—Any valid VLAN ID number.

*vlan-id-low*—Specify the first VLAN ID number for the group of VLANs.

*vlan-id-high*—Specify the last VLAN ID number for the group of VLANs.

**Range:** 1 through 4094

              The remaining statements are explained separately.

**Required Privilege Level**    routing—To view this statement in the configuration.  
                                routing-control—To add this statement to the configuration.
