

Removing a VLAN Tag

To remove a VLAN tag from all tagged frames entering or exiting the interface, include the **pop** statement in the input VLAN map or output VLAN map:

```
[Unresolved xref] {  
    pop;  
}  
[Unresolved xref] {  
    pop;  
}
```

You can include these statements at the following hierarchy levels:

- [edit interfaces *interface-name* unit *logical-unit-number*]
- [edit logical-systems *logical-system-name* interfaces *interface-name* unit *logical-unit-number*]
