

## family

---

**Syntax**    family *family* {  
              address *address*;  
              filter {  
                  input *filter-name* (  
                      precedence *precedence*;  
                  }  
                  output *filter-name* {  
                      precedence *precedence*;  
                  }  
              }  
              unnumbered-address *interface-name* preferred-source-address *address*;  
          }

**Hierarchy Level**    [edit dynamic-profiles *profile-name* interfaces *interface-name* unit *logical-unit-number*]

**Release Information**    Statement introduced before JUNOS Release 7.4.  
                              The [edit dynamic-profiles interfaces *interface-name* unit *logical-unit-number*] hierarchy added in JUNOS Release 9.2.

**Description**    Configure protocol family information for the logical interface.

**Options**    *family*—Protocol family:

- inet—Internet Protocol version 4 suite
- inet6—Internet Protocol version 6 suite

**Required Privilege Level**    interface—To view this statement in the configuration.  
                                  interface-control—To add this statement to the configuration.

**Related Topics**    ■    For general information about configuring static interfaces, see the *JUNOS Network Interfaces Configuration Guide*.
