

## ieee-802.1

---

**Syntax**    `ieee-802.1 classifier-name {  
                  import (classifier-name | default);  
                  forwarding-class class-name {  
                    loss-priority level {  
                      code-points [ aliases ] [ 6 bit-patterns ];  
                    }  
                  }  
                }`

**Hierarchy Level**    [edit class-of-service classifiers],  
                          [edit class-of-service code-point-aliases],  
                          [edit class-of-service interfaces *interface-name* unit *logical-unit-number* classifiers],  
                          [edit class-of-service rewrite-rules]

**Release Information**    Statement introduced in JUNOS Release 9.0 for EX Series switches.

**Description**    Apply an IEEE-802.1 rewrite rule.

**Options**    *classifier-name* —Name of the classifier.

The remaining statements are explained separately.

**Required Privilege Level**    routing—To view this statement in the configuration.  
                                  routing-control—To add this statement to the configuration.
