

override-nas-information

Syntax	override-nas-information;
Hierarchy Level	[edit access profile <i>profile-name</i> radius options]
Release Information	Statement introduced in JUNOS Release 9.1.
Description	Specify the information that the RADIUS client includes in broadcast accounting packets. By default, AAA broadcast accounting packets include the NAS-IP-Address and NAS-Identifier attributes of the logical-system:routing-instance that generates the accounting information. This statement configures the RADIUS client to override the default behavior and include RADIUS attribute 4 (NAS-IP-Address) and RADIUS attribute 32 (NAS-Identifier) of the logical-system:routing-instance that authenticates the client.
Required Privilege Level	admin—To view this statement in the configuration. admin-control—To add this statement to the configuration.
