Release Information Statement introduced in JUNOS Release 9.0.

Description Configure the order in which the DHCP local server uses information in the DHCP client PDU to determine how to obtain an address for the client. By default, the DHCP local server uses the ip-address-first method to determine which address pool to use.

The statements are explained separately.

Required Privilege Level system—To view this statement in the configuration.
system-control—To add this statement to the configuration.
