

redundant-trunk-group

Syntax `redundant-trunk-group {
 group-name name {
 interface interface-name <primary>;
 interface interface-name;
 }
 }`

Hierarchy Level [edit ethernet-switching-options]

Release Information Statement introduced in JUNOS Release 9.0 for EX Series switches.

Description Configure a primary link and secondary link on trunk ports. If the primary link fails, the secondary link automatically takes over without waiting for normal STP convergence.

Options The statements are explained separately.

Required Privilege Level routing—To view this statement in the configuration.
 routing-control—To add this statement to the configuration.
