Release Information Statement introduced in JUNOS Release 8.3.

Description Enable processing of DHCP client packets that have a gateway IP address (giaddr) of 0 (zero) and contain option 82 information. By default, the DHCP relay agent treats such packets as if they originated at an untrusted source, and drops them without further processing.

Required Privilege Level interface—To view this statement in the configuration.
interface-control—To add this statement to the configuration.
