

unknown-unicast-forwarding

Syntax unknown-unicast-forwarding {
 vlan (all | *vlan-name*){
 interface *interface-name*;
 }
 }

Hierarchy Level [edit ethernet-switching-options]

Release Information Statement introduced in JUNOS Release 9.3 for EX Series switches.

Description Configure the switch to forward all unknown unicast packets in a VLAN or on all VLANs to a particular interface.

NOTE: Before you can configure unknown unicast forwarding within a VLAN, you must first configure that VLAN.

The remaining statements are explained separately.

Default Unknown unicast packets are flooded to all interfaces that belong to the same VLAN.

Required Privilege Level routing—To view this statement in the configuration.
 routing-control—To add this statement to the configuration.
