| Release Information | Statement introduced in JUNOS Release 9.3. |
| Description | Specify the dynamic profile to configure as the primary dynamic profile. The primary dynamic profile is instantiated when the first subscriber logs in. Subsequent subscribers are not assigned the primary dynamic profile; instead, they are assigned the dynamic profile specified for the interface. When the first subscriber logs out, the next subscriber that logs in is assigned the primary dynamic profile. |
| Options | <i>primary-profile-name</i> —Name of the dynamic profile to configure as the primary dynamic profile |
| Required Privilege Level | system—To view this statement in the configuration. system-control—To add this statement to the configuration. |
