

Verifying and Managing Firewall Filter Configuration

Purpose View or manage information for firewall filters:

NOTE: The router creates unique names for fast update filters and for filter terms and counters. See *Naming Fast Update Filters* in Fast Update Filters Overview for information.

Action ■ To display statistics for firewall filters:

user@host> **show firewall**

■ To display firewall log information:

user@host> **show firewall log**

■ To clear filter counters:

user@host> **clear firewall all**
