## Summary of End-to-End Debug Response Tags

### <eedebug-all-action-profile>

**Usage**

```
<eedebug-all-action-profile>
 <filter-name>
 filter-name
 </filter-name>
 <filter-index>
 filter-index
 </filter-index>
 <eedebug-action-profile-name>
 eedebug-action-profile-name
 </eedebug-action-profile-name>
 <eedebug-action-profile>
 eedebug-action-profile
 </eedebug-action-profile>
</eedebug-all-action-profile>
```

**Description**

### <eedebug-all-counters>

**Usage**

```
<eedebug-all-counters>
 <filter-name>
 filter-name
 </filter-name>
 <filter-index>
 filter-index
```

```

</filter-index>
<eedebug-counter-value>
 eedebug-counter-value
</eedebug-counter-value>
<eedebug-counter-name>
 eedebug-counter-name
</eedebug-counter-name>
<eedebug-cid>
 eedebug-cid
</eedebug-cid>
<eedebug-fpc>
 eedebug-fpc
</eedebug-fpc>
<eedebug-pic>
 eedebug-pic
</eedebug-pic>
</eedebug-all-counters>

```

#### Description

### <eedebug-all-events>

#### Usage

```

<eedebug-all-events>
 <eedebug-event>
 eedebug-event
 </eedebug-event>
 <chassis-id>
 chassis-id
 </chassis-id>
 <fpc-id>
 fpc-id
 </fpc-id>
 <pic-id>
 pic-id
 </pic-id>
 <eedebug-pfe>....</eedebug-pfe>
</eedebug-all-events>

```

#### Description

### <eedebug-capture-output>

#### Usage

```

<eedebug-capture-output>
 <eedebug-capture-output-blob>
 eedebug-capture-output-blob
 </eedebug-capture-output-blob>
</eedebug-capture-output>

```

#### Description

## <eedebug-pfe>

### Usage

```
<eedebug-all-events>
 <eedebug-pfe>
 <chassis-id>
 chassis-id
 </chassis-id>
 <fpc-id>
 fpc-id
 </fpc-id>
 <pic-id>
 pic-id
 </pic-id>
 </eedebug-pfe>
</eedebug-all-events>
```

### Description

## <eedebug-reload-result>

### Usage

```
<eedebug-reload-result>
 <eedebug-reload-status>
 eedebug-reload-status
 </eedebug-reload-status>
</eedebug-reload-result>
```

### Description

## <eedebug-trace-sort>

### Usage

```
<eedebug-trace-sort>
 <eedebug-trace-sort-blob>
 eedebug-trace-sort-blob
 </eedebug-trace-sort-blob>
</eedebug-trace-sort>
```

### Description

## <request-eedebug-capture-start-result>

### Usage

```
<request-eedebug-capture-start-result>
 <eedebug-capture-start-status>
 eedebug-capture-start-status
 </eedebug-capture-start-status>
</request-eedebug-capture-start-result>
```

### Description

## <request-eedebug-capture-stop-result>

### Usage

```
<request-eedebug-capture-stop-result>
 <eedebug-capture-stop-status>
 eedebug-capture-stop-status
 </eedebug-capture-stop-status>
</request-eedebug-capture-stop-result>
```

### Description

## Summary of ESW Response Tags

## <age-statistics>

### Usage

```
<age-statistics>
 <total-aging-message>
 total-aging-message
 </total-aging-message>
 <immediate-aging>
 immediate-aging
 </immediate-aging>
 <mac-address-seen>
 mac-address-seen
 </mac-address-seen>
 <mac-address-not-seen>
 mac-address-not-seen
 </mac-address-not-seen>
 <age-message-with-error>
 age-message-with-error
 </age-message-with-error>
 <age-message-with-invalid-vlan>
 age-message-with-invalid-vlan
 </age-message-with-invalid-vlan>
 <age-message-with-unfound-entry>
 age-message-with-unfound-entry
 </age-message-with-unfound-entry>
 <age-message-for-static-entry>
 age-message-for-static-entry
 </age-message-for-static-entry>
</age-statistics>
```

### Description

## <age-statistics>

### Usage

```
<ethernet-switching-statistics>
 <ethernet-switching-aging-stats>
 <age-statistics>
 <total-aging-message>
 total-aging-message
```

```
</total-aging-message>
<immediate-aging>
 immediate-aging
</immediate-aging>
<mac-address-seen>
 mac-address-seen
</mac-address-seen>
<mac-address-not-seen>
 mac-address-not-seen
</mac-address-not-seen>
<age-message-with-error>
 age-message-with-error
</age-message-with-error>
<age-message-with-invalid-vlan>
 age-message-with-invalid-vlan
</age-message-with-invalid-vlan>
<age-message-with-unfound-entry>
 age-message-with-unfound-entry
</age-message-with-unfound-entry>
<age-message-for-static-entry>
 age-message-for-static-entry
</age-message-for-static-entry>
</age-statistics>
</ethernet-switching-aging-stats>
</ethernet-switching-statistics>
```

#### Description

<analyzer>

#### Usage

```
<analyzer>
 <analyzer-information>....</analyzer-information>
</analyzer>
```

#### Description

<analyzer-egress-interface-list>

#### Usage

```
<analyzer-egress-interface-list>
 <analyzer-egress-interface-name>
 analyzer-egress-interface-name
 </analyzer-egress-interface-name>
</analyzer-egress-interface-list>
```

#### Description

<analyzer-egress-interface-list>

#### Usage

```
<analyzer>
 <analyzer-information>
```

```

<analyzer-egress-interface-list>

```

#### Description

### <analyzer-ingress-interface-list>

#### Usage

```
<analyzer-ingress-interface-list>
 <analyzer-ingress-interface-name>
 analyzer-ingress-interface-name
 </analyzer-ingress-interface-name>
</analyzer-ingress-interface-list>
```

#### Description

### <analyzer-ingress-interface-list>

#### Usage

```
<analyzer>
 <analyzer-information>
 <analyzer-ingress-interface-list>
 <analyzer-ingress-interface-name>
 analyzer-ingress-interface-name
 </analyzer-ingress-interface-name>
 </analyzer-ingress-interface-list>
 </analyzer-information>
</analyzer>
```

#### Description

### <analyzer-ingress-vlan-list>

#### Usage

```
<analyzer-ingress-vlan-list>
 <analyzer-ingress-vlan-name>
 analyzer-ingress-vlan-name
 </analyzer-ingress-vlan-name>
</analyzer-ingress-vlan-list>
```

#### Description

### <analyzer-ingress-vlan-list>

#### Usage

```
<analyzer>
 <analyzer-information>
 <analyzer-ingress-vlan-list>
 <analyzer-ingress-vlan-name>
 analyzer-ingress-vlan-name
 </analyzer-ingress-vlan-name>
 </analyzer-ingress-vlan-list>
 </analyzer-information>
</analyzer>
```

```
 </analyzer-ingress-vlan-name>
 </analyzer-ingress-vlan-list>
</analyzer-information>
</analyzer>
```

#### Description

### <analyzer-monitor>

#### Usage

```
<analyzer-monitor>
 <analyzer-monitor-port>
 analyzer-monitor-port
 </analyzer-monitor-port>
 <analyzer-monitor-vlan>
 analyzer-monitor-vlan
 </analyzer-monitor-vlan>
</analyzer-monitor>
```

#### Description

### <analyzer-monitor>

#### Usage

```
<analyzer>
 <analyzer-information>
 <analyzer-monitor>
 <analyzer-monitor-port>
 analyzer-monitor-port
 </analyzer-monitor-port>
 <analyzer-monitor-vlan>
 analyzer-monitor-vlan
 </analyzer-monitor-vlan>
 </analyzer-monitor>
 </analyzer-information>
</analyzer>
```

#### Description

### <arp-inspection>

#### Usage

```
<arp-inspection>
 <arp-inspection-statistics>....</arp-inspection-statistics>
</arp-inspection>
```

#### Description

### <arp-inspection-statistics>

#### Usage

```
<arp-inspection>
```

```
<arp-inspection-statistics>
 <arp-inspection-statistics-entry>....</arp-inspection-statistics-entry>
</arp-inspection-statistics>
</arp-inspection>
```

#### Description

### <arp-inspection-statistics-entry>

#### Usage

```
<arp-inspection>
 <arp-inspection-statistics>
 <arp-inspection-statistics-entry>
 <arp-interface>
 arp-interface
 </arp-interface>
 <arp-packet-count>
 arp-packet-count
 </arp-packet-count>
 <arp-packet-pass>
 arp-packet-pass
 </arp-packet-pass>
 <arp-packet-fail>
 arp-packet-fail
 </arp-packet-fail>
 </arp-inspection-statistics-entry>
 </arp-inspection-statistics>
</arp-inspection>
```

#### Description

### <cist-bridge-parameters>

#### Usage

```
<cist-bridge-parameters>
 <cist-id>
 cist-id
 </cist-id>
 <root-bridge>....</root-bridge>
 <root-port>
 root-port
 </root-port>

 internal-instance-id
</internal-instance-id>
<this-bridge>....</this-bridge>
<hello-time-configured>
 hello-time-configured
</hello-time-configured>
<max-age-configured>
 max-age-configured
</max-age-configured>
<forward-delay-configured>
 forward-delay-configured
</forward-delay-configured>
```

```
<maximum-hop-count-configured>
 maximum-hop-count-configured
</maximum-hop-count-configured>
<path-cost-method>
 path-cost-method
</path-cost-method>
</cist-bridge-parameters>
</stp-bridge>
```

**Description** STP bridge parameters for common and internal spanning tree

### <customer-vlan-range>

#### Usage

```
<customer-vlan-range-list>
 <customer-vlan-range>
 <customer-vlan-range-start>
 customer-vlan-range-start
 </customer-vlan-range-start>
 <customer-vlan-range-end>
 customer-vlan-range-end
 </customer-vlan-range-end>
 </customer-vlan-range>
</customer-vlan-range-list>
```

#### Description

### <customer-vlan-range-list>

#### Usage

```
<customer-vlan-range-list>
 <customer-vlan-range>....</customer-vlan-range>
</customer-vlan-range-list>
```

#### Description

### <dhcp-snooping>

#### Usage

```
<dhcp-snooping>
 <dhcp-snooping-information>....</dhcp-snooping-information>
 <dhcp-snooping-statistics>....</dhcp-snooping-statistics>
</dhcp-snooping>
```

#### Description

### <dhcp-snooping-information>

#### Usage

```
<dhcp-snooping>
 <dhcp-snooping-information>
```

```
<dhcp-mac>
 dhcp-mac
</dhcp-mac>
<dhcp-ip>
 dhcp-ip
</dhcp-ip>
<dhcp-lease>
 dhcp-lease
</dhcp-lease>
<dhcp-type>

</dhcp-type>
<dhcp-vlan>
 dhcp-vlan
</dhcp-vlan>
<dhcp-interface>
 dhcp-interface
</dhcp-interface>
</dhcp-snooping-information>
</dhcp-snooping>
```

#### Description

### <dhcp-snooping-statistics>

#### Usage

```
<dhcp-snooping>
 <dhcp-snooping-statistics>
 <successful-transfers>
 successful-transfers
 </successful-transfers>
 <failed-transfers>
 failed-transfers
 </failed-transfers>
 <successful-reads>
 successful-reads
 </successful-reads>
 <failed-reads>
 failed-reads
 </failed-reads>
 <successful-writes>
 successful-writes
 </successful-writes>
 <failed-writes>
 failed-writes
 </failed-writes>
 </dhcp-snooping-statistics>
</dhcp-snooping>
```

#### Description

## <edge-control-protocol-interface-statistics>

### Usage

```

<edge-virtual-bridging-information>
 <edge-control-protocol-statistics>
 <edge-control-protocol-interface-statistics>
 <interface-name>
 interface-name
 </interface-name>
 <input-ecp-packets>
 input-ecp-packets
 </input-ecp-packets>
 <output-ecp-packets>
 output-ecp-packets
 </output-ecp-packets>
 </edge-control-protocol-interface-statistics>
 </edge-control-protocol-statistics>
</edge-virtual-bridging-information>

```

### Description

## <edge-control-protocol-statistics>

### Usage

```

<edge-virtual-bridging-information>
 <edge-control-protocol-statistics>

 <edge-control-protocol-interface-statistics>....</edge-control-protocol-interface-statistics>

 </edge-control-protocol-statistics>
</edge-virtual-bridging-information>

```

### Description

## <edge-virtual-bridging-firewall-information>

### Usage

```

<edge-virtual-bridging-information>
 <edge-virtual-bridging-firewall-information>

 </ecp>
 <vdp>
 vdp
 </vdp>
 <protocol-rte>
 protocol-rte
 </protocol-rte>
 <vsi-profiles-information>....</vsi-profiles-information>
 </edge-virtual-bridging-interface-information>
</edge-virtual-bridging-information>
```

**Description****<edge-virtual-bridging-interface-vsi-profiles-information>****Usage**

```

<edge-virtual-bridging-information>
 <edge-virtual-bridging-interface-vsi-profiles-information>
 <interface-name>
 interface-name
 </interface-name>
 <vsi-profiles-information>....</vsi-profiles-information>
 </edge-virtual-bridging-interface-vsi-profiles-information>
</edge-virtual-bridging-information>

```

**Description****<erp-interface-entry>****Usage**

```

<erp-interface-entry>
 <erp-interface-name>
 erp-interface-name
 </erp-interface-name>
 <forward-state>
 forward-state
 </forward-state>
 <rpl-end>
 rpl-end
 </rpl-end>
 <sf-flag>
 sf-flag
 </sf-flag>
 <erp-interface-state>
 erp-interface-state
 </erp-interface-state>
</erp-interface-entry>

```

**Description** Information about Ethernet Ring port of a Ethernet Ring Protection group

**<erp-interface-entry>****Usage**

```

<erp-interface-information>
 <ethernet-ring-pg>
 <erp-interfaces>
 <erp-interface-entry>
 <erp-interface-name>
 erp-interface-name
 </erp-interface-name>
 <forward-state>
 forward-state
 </forward-state>
 <rpl-end>

```

```
 rpl-end
 </rpl-end>
 <sf-flag>
 sf-flag
 </sf-flag>
 <erp-interface-state>
 erp-interface-state
 </erp-interface-state>
</erp-interface-entry>
</erp-interfaces>
</ethernet-ring-pg>
</erp-interface-information>
```

**Description** Information about Ethernet Ring port of a Ethernet Ring Protection group

### <erp-interface-information>

**Usage**

```
<erp-interface-information>
 <ethernet-ring-pg>....</ethernet-ring-pg>
</erp-interface-information>
```

**Description** Information about ring ports for one or more ethernet ring protection groups

### <erp-interface-statistics>

**Usage**

```
<erp-protection-group-statistics>
 <erp-protection-group-instance>
 <erp-interface-statistics>
 <erp-interface-statistics-entry>....</erp-interface-statistics-entry>
 </erp-interface-statistics>
 </erp-protection-group-instance>
</erp-protection-group-statistics>
```

**Description**

### <erp-interface-statistics>

**Usage**

```
<erp-protection-group-interface-statistics>
 <erp-interface-statistics>
 <erp-interface-statistics-entry>....</erp-interface-statistics-entry>
 </erp-interface-statistics>
</erp-protection-group-interface-statistics>
```

**Description**

**<erp-interface-statistics-entry>****Usage**

```

<erp-interface-statistics-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <erp-interface-name>
 erp-interface-name
 </erp-interface-name>
 <raps-event-sent>
 raps-event-sent
 </raps-event-sent>
 <raps-event-received>
 raps-event-received
 </raps-event-received>
</erp-interface-statistics-entry>

```

**Description** ERP interface statistics

**<erp-interface-statistics-entry>****Usage**

```

<erp-protection-group-statistics>
 <erp-protection-group-instance>
 <erp-interface-statistics>
 <erp-interface-statistics-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <erp-interface-name>
 erp-interface-name
 </erp-interface-name>
 <raps-event-sent>
 raps-event-sent
 </raps-event-sent>
 <raps-event-received>
 raps-event-received
 </raps-event-received>
 </erp-interface-statistics-entry>
 </erp-interface-statistics>
 </erp-protection-group-instance>
</erp-protection-group-statistics>

```

**Description** ERP interface statistics

**<erp-interface-statistics-entry>****Usage**

```

<erp-protection-group-interface-statistics>
 <erp-interface-statistics>
 <erp-interface-statistics-entry>

```

```
<protection-group-name>
 protection-group-name
</protection-group-name>
<erp-interface-name>
 erp-interface-name
</erp-interface-name>
<raps-event-sent>
 raps-event-sent
</raps-event-sent>
<raps-event-received>
 raps-event-received
</raps-event-received>
</erp-interface-statistics-entry>
</erp-interface-statistics>
</erp-protection-group-interface-statistics>
```

**Description** ERP interface statistics

### <erp-interfaces>

**Usage**

```
<erp-interface-information>
<ethernet-ring-pg>
 <erp-interfaces>
 <erp-interface-entry>....</erp-interface-entry>
 </erp-interfaces>
</ethernet-ring-pg>
</erp-interface-information>
```

**Description** Information about ring ports

### <erp-pg-configuration>

**Usage**

```
<erp-pg-configuration>
<erp-protection-group>....</erp-protection-group>
</erp-pg-configuration>
```

**Description** Ethernet ring configuration for one or more ethernet ring instances

### <erp-protection-group>

**Usage**

```
<erp-pg-configuration>
<erp-protection-group>
 <erp-pg-name>
 erp-pg-name
 </erp-pg-name>
 <erp-pg-east-interface-name>
 erp-pg-east-interface-name
 </erp-pg-east-interface-name>
```

```

 <erp-pg-west-interface-name>
 erp-pg-west-interface-name
 </erp-pg-west-interface-name>
 <erp-pg-restore-interval>
 erp-pg-restore-interval
 </erp-pg-restore-interval>
 <erp-pg-guard-interval>
 erp-pg-guard-interval
 </erp-pg-guard-interval>
 <erp-pg-node-id>
 erp-pg-node-id
 </erp-pg-node-id>
 <erp-pg-ctrl-channel-vlan>
 erp-pg-ctrl-channel-vlan
 </erp-pg-ctrl-channel-vlan>
 <erp-pg-is-physical-ring>
 erp-pg-is-physical-ring
 </erp-pg-is-physical-ring>
 <erp-pg-data-channel-vlans>
 erp-pg-data-channel-vlans
 </erp-pg-data-channel-vlans>
 </erp-protection-group>
</erp-pg-configuration>

```

#### Description

#### <erp-protection-group-instance>

##### Usage

```

 <erp-protection-group-statistics>
 <erp-protection-group-instance>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <raps-local-sf>
 raps-local-sf
 </raps-local-sf>
 <raps-remote-sf>
 raps-remote-sf
 </raps-remote-sf>
 <raps-nr>
 raps-nr
 </raps-nr>
 <raps-nr-rb>
 raps-nr-rb
 </raps-nr-rb>
 <erp-interface-statistics>....</erp-interface-statistics>
 </erp-protection-group-instance>
 </erp-protection-group-statistics>

```

#### Description

### <erp-protection-group-interface-statistics>

#### Usage

```
<erp-protection-group-interface-statistics>
 <erp-interface-statistics>....</erp-interface-statistics>
</erp-protection-group-interface-statistics>
```

**Description** Statistics information about ERP interfaces

### <erp-protection-group-statistics>

#### Usage

```
<erp-protection-group-statistics>
 <erp-protection-group-instance>....</erp-protection-group-instance>
</erp-protection-group-statistics>
```

**Description** Statistics information about ERP instance

### <erp-raps>

#### Usage

```
<erp-raps-information>
 <erp-raps>
 <erp-raps-entry>....</erp-raps-entry>
 </erp-raps>
</erp-raps-information>
```

**Description**

### <erp-raps-entry>

#### Usage

```
<erp-raps-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <aps-state>
 aps-state
 </aps-state>
 <aps-event>
 aps-event
 </aps-event>
 <rpl-owner>
 rpl-owner
 </rpl-owner>
 <wtr-timer>
 wtr-timer
 </wtr-timer>
 <guard-timer>
 guard-timer
 </guard-timer>
```

```
<operation-state>
 operation-state
</operation-state>
</erp-raps-entry>
```

**Description** Information about Ethernet Ring Automatic Protection Switching state machine of a protection group

### <erp-raps-entry>

#### Usage

```
<erp-raps-information>
 <erp-raps>
 <erp-raps-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <aps-state>
 aps-state
 </aps-state>
 <aps-event>
 aps-event
 </aps-event>
 <rpl-owner>
 rpl-owner
 </rpl-owner>
 <wtr-timer>
 wtr-timer
 </wtr-timer>
 <guard-timer>
 guard-timer
 </guard-timer>
 <operation-state>
 operation-state
 </operation-state>
 </erp-raps-entry>
 </erp-raps>
</erp-raps-information>
```

**Description** Information about Ethernet Ring Automatic Protection Switching state machine of a protection group

### <erp-raps-information>

#### Usage

```
<erp-raps-information>
 <erp-raps>....</erp-raps>
</erp-raps-information>
```

**Description** Information about RAPS state machine of one or more ethernet rings

## <erp-rpdu-entry>

### Usage

```
<erp-rpdu-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <request-state>
 request-state
 </request-state>
 <dnf-flag>
 dnf-flag
 </dnf-flag>
 <rb-flag>
 rb-flag
 </rb-flag>
 <originator>
 originator
 </originator>
 <remote-node-id>
 remote-node-id
 </remote-node-id>
</erp-rpdu-entry>
```

**Description** Information about Ethernet Ring RAPS PDU of a Ethernet Ring Protection group

## <erp-rpdu-entry>

### Usage

```
<erp-rpdu-information>
 <erp-rpdus>
 <erp-rpdu-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <request-state>
 request-state
 </request-state>
 <dnf-flag>
 dnf-flag
 </dnf-flag>
 <rb-flag>
 rb-flag
 </rb-flag>
 <originator>
 originator
 </originator>
 <remote-node-id>
 remote-node-id
 </remote-node-id>
 </erp-rpdu-entry>
 </erp-rpdus>
```

```
</erp-rpdu-information>
```

**Description** Information about Ethernet Ring RAPS PDU of a Ethernet Ring Protection group

### <erp-rpdu-information>

#### Usage

```
<erp-rpdu-information>
 <erp-rpdus>....</erp-rpdus>
</erp-rpdu-information>
```

**Description** Information about one or more ethernet rings

### <erp-rpdus>

#### Usage

```
<erp-rpdu-information>
 <erp-rpdus>
 <erp-rpdu-entry>....</erp-rpdu-entry>
 </erp-rpdus>
</erp-rpdu-information>
```

**Description**

### <erp-statistics>

#### Usage

```
<erp-statistics-information>
 <erp-statistics>
 <erp-statistics-entry>....</erp-statistics-entry>
 </erp-statistics>
</erp-statistics-information>
```

**Description** Ethernet ring statistics

### <erp-statistics-entry>

#### Usage

```
<erp-statistics-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <raps-local-sf>
 raps-local-sf
 </raps-local-sf>
 <raps-remote-sf>

 </raps-remote-sf>
 <raps-nr>
 raps-nr
```

```
</raps-nr>
<raps-nr-rb>
 raps-nr-rb
</raps-nr-rb>
</erp-statistics-entry>
```

**Description** Ethernet Ring protection group statistics

### <erp-statistics-entry>

#### Usage

```
<erp-statistics-information>
 <erp-statistics>
 <erp-statistics-entry>
 <protection-group-name>
 protection-group-name
 </protection-group-name>
 <raps-local-sf>
 raps-local-sf
 </raps-local-sf>
 <raps-remote-sf>
 raps-remote-sf
 </raps-remote-sf>
 <raps-nr>
 raps-nr
 </raps-nr>
 <raps-nr-rb>
 raps-nr-rb
 </raps-nr-rb>
 </erp-statistics-entry>
 </erp-statistics>
</erp-statistics-information>
```

**Description** Ethernet Ring protection group statistics

### <erp-statistics-information>

#### Usage

```
<erp-statistics-information>
 <erp-statistics>.....</erp-statistics>
</erp-statistics-information>
```

**Description** Ethernet Ring protection group statistics of one or more protection groups

### <ethernet-ring-pg>

#### Usage

```
<erp-interface-information>
 <ethernet-ring-pg>
 <erp-protection-group-name>
 erp-protection-group-name
```

```

 </erp-protection-group-name>
 <erp-interfaces>....</erp-interfaces>
 </ethernet-ring-pg>
</erp-interface-information>

```

#### Description

### <ethernet-switching-aging-stats>

#### Usage

```

<ethernet-switching-statistics>
 <ethernet-switching-aging-stats>
 <age-statistics>....</age-statistics>
 </ethernet-switching-aging-stats>
</ethernet-switching-statistics>

```

#### Description

### <ethernet-switching-learning-stats>

#### Usage

```

<ethernet-switching-learning-stats>
 <mac-stats-rcvd-total>
 mac-stats-rcvd-total
 </mac-stats-rcvd-total>
 <mac-stats-rcvd-local>
 mac-stats-rcvd-local
 </mac-stats-rcvd-local>
 <mac-stats-rcvd-transit>
 mac-stats-rcvd-transit
 </mac-stats-rcvd-transit>
 <mac-stats-error>
 mac-stats-error
 </mac-stats-error>
 <mac-stats-forced-update>
 mac-stats-forced-update
 </mac-stats-forced-update>
 <mac-statistics>....</mac-statistics>
</ethernet-switching-learning-stats>

```

#### Description

### <ethernet-switching-learning-stats>

#### Usage

```

<ethernet-switching-statistics>
 <ethernet-switching-learning-stats>
 <mac-stats-rcvd-total>
 mac-stats-rcvd-total
 </mac-stats-rcvd-total>
 <mac-stats-rcvd-local>
 mac-stats-rcvd-local

 received-local
 </received-local>
 <received-transit>
 received-transit
 </received-transit>
 <received-error>
 received-error
 </received-error>
 <invalid-vlan>
 invalid-vlan
 </invalid-vlan>
 <invalid-mac>
 invalid-mac
 </invalid-mac>
 <security-violation>
 security-violation
 </security-violation>
 <interface-down>
 interface-down
 </interface-down>
 <not-member>
 not-member
 </not-member>
 <interface-limit-exceeded>
 interface-limit-exceeded
 </interface-limit-exceeded>
 <mac-move-limit-exceeded>
 mac-move-limit-exceeded
 </mac-move-limit-exceeded>
 <vlan-limit-exceeded>
 vlan-limit-exceeded
 </vlan-limit-exceeded>
 <invalid-vlan-index>
 invalid-vlan-index
 </invalid-vlan-index>
 <interface-not-learning>
 interface-not-learning
 </interface-not-learning>
 <no-nexthop>
 no-nexthop
 </no-nexthop>
```

```

<interface-no-learning>
 interface-no-learning
</interface-no-learning>
<others>
 others
</others>
</mac-statistics>

```

**Description** MAC learning statistics

## <mac-statistics>

### Usage

```

<ethernet-switching-learning-stats>
 <mac-statistics>
 <learning-interface>
 learning-interface
 </learning-interface>
 <received-local>
 received-local
 </received-local>
 <received-transit>
 received-transit
 </received-transit>
 <received-error>
 received-error
 </received-error>
 <invalid-vlan>
 invalid-vlan
 </invalid-vlan>
 <invalid-mac>
 invalid-mac
 </invalid-mac>
 <security-violation>
 security-violation
 </security-violation>
 <interface-down>
 interface-down
 </interface-down>
 <not-member>
 not-member
 </not-member>
 <interface-limit-exceeded>
 interface-limit-exceeded
 </interface-limit-exceeded>
 <mac-move-limit-exceeded>
 mac-move-limit-exceeded
 </mac-move-limit-exceeded>
 <vlan-limit-exceeded>
 vlan-limit-exceeded
 </vlan-limit-exceeded>
 <invalid-vlan-index>
 invalid-vlan-index
 </invalid-vlan-index>

```

```
<interface-not-learning>
 interface-not-learning
</interface-not-learning>
<no-nexthop>
 no-nexthop

```
<policy-vlan-member-list>
 <policy-vlan-member>
 policy-vlan-member
 </policy-vlan-member>
</policy-vlan-member-list>
```

### Description

## <private-vlan-community-list>

### Usage

```
<private-vlan-community-list>
 <community-vlan>
 community-vlan
 </community-vlan>
</private-vlan-community-list>
```

### Description

### <private-vlan-isolated-list>

#### Usage

```
<private-vlan-isolated-list>
 <isolated-vlan>
 isolated-vlan
 </isolated-vlan>
</private-vlan-isolated-list>
```

#### Description

### <private-vlan-secondary-list>

#### Usage

```
<private-vlan-secondary-list>
 <secondary-vlan>
 secondary-vlan
 </secondary-vlan>
</private-vlan-secondary-list>
```

#### Description

### <push-vlan-member-list>

#### Usage

```
<push-vlan-member-list>
 <push-vlan-member>
 push-vlan-member
 </push-vlan-member>
</push-vlan-member-list>
```

#### Description

### <regional-root-bridge>

#### Usage

```
<cist-bridge-parameters>
 <regional-root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </regional-root-bridge>
</cist-bridge-parameters>
```

**Description** CIST regional root bridge identifier

## <regional-root-bridge>

### Usage

```
<stp-bridge>
 <cist-bridge-parameters>
 <regional-root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </regional-root-bridge>
 </cist-bridge-parameters>
</stp-bridge>
```

**Description** CIST regional root bridge identifier

## <root-bridge>

### Usage

```
<cist-bridge-parameters>
 <root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </root-bridge>
</cist-bridge-parameters>
```

**Description** Root bridge identifier

## <root-bridge>

### Usage

```
<vst-bridge-parameters>
 <root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </root-bridge>
</vst-bridge-parameters>
```

**Description** Root bridge identifier

**<root-bridge>****Usage**

```

<stp-bridge>
 <cist-bridge-parameters>
 <root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </root-bridge>
 </cist-bridge-parameters>
</stp-bridge>

```

**Description** Root bridge identifier

**<root-bridge>****Usage**

```

<stp-bridge>
 <vst-bridge-parameters>
 <root-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </root-bridge>
 </vst-bridge-parameters>
</stp-bridge>

```

**Description** Root bridge identifier

**<rtg>****Usage**

```

<rtg>
 <rtg-information>....</rtg-information>
 <rtg-information-pergrp>....</rtg-information-pergrp>
 <rtg-information-pergrp-err>....</rtg-information-pergrp-err>
</rtg>

```

**Description**

**<rtg-information>****Usage**

```

<rtg>

```

```
<rtg-information>
 <rtg-group-name>
 rtg-group-name
 </rtg-group-name>
 <rtg-first-interface-name>
 rtg-first-interface-name
 </rtg-first-interface-name>
 <rtg-second-interface-name>
 rtg-second-interface-name
 </rtg-second-interface-name>
 <rtg-first-interface-state>
 rtg-first-interface-state

</boundary-port>
<edge-delay-while-expiry-count>
 edge-delay-while-expiry-count
</edge-delay-while-expiry-count>
<rcvd-info-while-expiry-count>
 rcvd-info-while-expiry-count
</rcvd-info-while-expiry-count>
</stp-interface-entry>
</stp-interfaces>
</stp-instance>
</stp-interface-information>
```

**Description** Information about Spanning Tree Protocol interface

### <stp-interface-information>

**Usage**

```
<stp-interface-information>
 <stp-instance>....</stp-instance>
</stp-interface-information>
```

**Description** Information about STP interfaces or instances

### <stp-interface-statistics>

**Usage**

```
<stp-interface-statistics>
 <stp-interface-statistics-entry>....</stp-interface-statistics-entry>
 <vstp-interface-statistics>....</vstp-interface-statistics>
</stp-interface-statistics>
```

**Description** STP interface statistics

### <stp-interface-statistics-entry>

**Usage**

```
<stp-interface-statistics-entry>
 <interface-name>
 interface-name
 </interface-name>
 <total-bpdus-sent>
 total-bpdus-sent
 </total-bpdus-sent>
 <total-bpdus-received>
 total-bpdus-received
 </total-bpdus-received>
 <next-bpdu-time>
 next-bpdu-time
 </next-bpdu-time>
</stp-interface-statistics-entry>
```

**Description** STP interface statistics

### <stp-interface-statistics-entry>

**Usage**

```
<stp-interface-statistics>
 <stp-interface-statistics-entry>
 <interface-name>
 interface-name
 </interface-name>
 <total-bpdus-sent>
 total-bpdus-sent
 </total-bpdus-sent>
```

```
<total-bpdus-received>
 total-bpdus-received
</total-bpdus-received>
<next-bpdu-time>
 next-bpdu-time
</next-bpdu-time>
</stp-interface-statistics-entry>
</stp-interface-statistics>
```

**Description** STP interface statistics

### <stp-interface-statistics-entry>

#### Usage

```
<stp-interface-statistics>
<vstp-interface-statistics>
 <stp-interface-statistics-entry>
 <interface-name>
 interface-name
 </interface-name>
 <total-bpdus-sent>

 <next-bpdu-time>
 next-bpdu-time
 </next-bpdu-time>
```

```

 </stp-interface-statistics-entry>
 </stp-vlan-interface-statistics>

```

**Description** STP interface statistics

### <stp-interfaces>

#### Usage

```

 <stp-interface-information>
 <stp-instance>
 <stp-interfaces>
 <stp-interface-entry>....</stp-interface-entry>
 </stp-interfaces>
 </stp-instance>
 </stp-interface-information>

```

**Description** Information about STP interfaces

### <stp-kernel-table>

#### Usage

```

 <stp-kernel-table>
 <stp-kernel-table-entry>....</stp-kernel-table-entry>
 </stp-kernel-table>

```

**Description** STP kernel table information

### <stp-kernel-table-entry>

#### Usage

```

 <stp-kernel-table>
 <stp-kernel-table-entry>
 <stp-index>
 stp-index
 </stp-index>
 <kernel-if-name>
 kernel-if-name
 </kernel-if-name>
 <kernel-stp-instance>
 kernel-stp-instance
 </kernel-stp-instance>
 <kernel-state>
 kernel-state
 </kernel-state>
 <kernel-action>
 kernel-action
 </kernel-action>
 <epoch>
 epoch
 </epoch>
 <hardware-learning>

```

```
 hardware-learning
 </hardware-learning>
</stp-kernel-table-entry>
</stp-kernel-table>
```

**Description****<stp-vlan-interface-statistics>****Usage**

```
<stp-vlan-interface-statistics>
 <stp-interface-statistics-entry>....</stp-interface-statistics-entry>
</stp-vlan-interface-statistics>
```

**Description** Statistics information about VLAN STP interfaces

**<swap-vlan-member-list>****Usage**

```
<swap-vlan-member-list>
 <swap-vlan-member>
 swap-vlan-member
 </swap-vlan-member>
</swap-vlan-member-list>
```

**Description****<switching-interface-information>****Usage**

```
<switching-interface-information>
 <interface>....</interface>
</switching-interface-information>
```

**Description** Operational information about Ethernet-switching interfaces

**<tagged-vlan-member-list>****Usage**

```
<tagged-vlan-member-list>
 <tagged-vlan-member>
 tagged-vlan-member
 </tagged-vlan-member>
</tagged-vlan-member-list>
```

**Description**

## <task>

### Usage

```
<task-timer-information>
 <task>
 <task-name>
 task-name
 </task-name>
 <task-timer-priority>....</task-timer-priority>
 <task-timer-summary>....</task-timer-summary>
 <task-timer>....</task-timer>
 </task>
</task-timer-information>
```

### Description

 </task-size-block-list>
 </task-memory-overall-report>
</task-memory-information>
```

#### Description

### <task-statistics-information>

#### Usage

```
<task-statistics-information>
 <task-stat-event-name>
 task-stat-event-name
 </task-stat-event-name>
 <task-stat-event-count>
 task-stat-event-count
 </task-stat-event-count>
</task-statistics-information>
```

#### Description

**<task-summary-information>****Usage**

```
<task-summary-information>
 <task-summary-priority>
 task-summary-priority
 </task-summary-priority>
 <task-summary-task-name>
 task-summary-task-name
 </task-summary-task-name>
 <task-summary-protocol>
 task-summary-protocol
 </task-summary-protocol>
 <task-summary-port>
 task-summary-port
 </task-summary-port>
 <task-summary-socket>
 task-summary-socket
 </task-summary-socket>
 <task-summary-flags>
 task-summary-flags
 </task-summary-flags>
</task-summary-information>
```

**Description****<task-timer>****Usage**

```
<task-timer>
 <timer-name>
 timer-name
 </timer-name>
 <timer-late>
 timer-late
 </timer-late>
 <timer-expires>
 timer-expires
 </timer-expires>
 <timer-jitter>
 timer-jitter
 </timer-jitter>
 <timer-interval>
 timer-interval
 </timer-interval>
 <timer-flags>
 timer-flags
 </timer-flags>
</task-timer>
```

**Description**

## <task-timer>

### Usage

```
<task-timer-information>
<task>
 <task-timer>
 <timer-name>
 timer-name
 </timer-name>
 <timer-late>
 timer-late
 </timer-late>
 <timer-expires>
 timer-expires
 </timer-expires>
 <timer-jitter>
 timer-jitter
 </timer-jitter>
 <timer-interval>
 timer-interval
 </timer-interval>
 <timer-flags>
 timer-flags
 </timer-flags>
 </task-timer>
</task>
</task-timer-information>
```

### Description

## <task-timer-information>

### Usage

```
<task-timer-information>
<task>....</task>
</task-timer-information>
```

### Description

## <task-timer-priority>

### Usage

```
<task-timer-priority>
<task-timer-type>
 task-timer-type
</task-timer-type>
</task-timer-priority>
```

### Description

**<task-timer-priority>****Usage**

```
<task-timer-information>
<task>
 <task-timer-priority>
 <task-timer-type>
 task-timer-type
 </task-timer-type>
 </task-timer-priority>
</task>
</task-timer-information>
```

**Description****<task-timer-summary>****Usage**

```
<task-timer-summary>
<task-timer-leaf>
 task-timer-leaf
</task-timer-leaf>
<task-timer-parent>
 task-timer-parent
</task-timer-parent>
<task-timer-expired>
 task-timer-expired
</task-timer-expired>
</task-timer-summary>
```

**Description****<task-timer-summary>****Usage**

```
<task-timer-information>
<task>
 <task-timer-summary>
 <task-timer-leaf>
 task-timer-leaf
 </task-timer-leaf>
 <task-timer-parent>
 task-timer-parent
 </task-timer-parent>
 <task-timer-expired>
 task-timer-expired
 </task-timer-expired>
 </task-timer-summary>
</task>
</task-timer-information>
```

**Description**

**<this-bridge>****Usage**

```
<cist-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
</cist-bridge-parameters>
```

**Description** ID of bridge

**<this-bridge>****Usage**

```
<vst-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
</vst-bridge-parameters>
```

**Description** ID of bridge

**<this-bridge>****Usage**

```
<msti-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
</msti-bridge-parameters>
```

**Description** ID of bridge

**<this-bridge>****Usage**

```

<stp-bridge>
 <cist-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
 </cist-bridge-parameters>
</stp-bridge>

```

**Description** ID of bridge

**<this-bridge>****Usage**

```

<stp-bridge>
 <msti-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
 </msti-bridge-parameters>
</stp-bridge>

```

**Description** ID of bridge

**<this-bridge>****Usage**

```

<stp-bridge>
 <vst-bridge-parameters>
 <this-bridge>
 <bridge-priority>
 bridge-priority
 </bridge-priority>
 <bridge-mac>
 bridge-mac
 </bridge-mac>
 </this-bridge>
 </vst-bridge-parameters>
</stp-bridge>

```

**Description** ID of bridge

### <time-since-last-tc>

**Usage**

```
<msti-bridge-parameters>
 <time-since-last-tc>
</time-since-last-tc>
</msti-bridge-parameters>
```

**Description**

### <time-since-last-tc>

**Usage**

```
<stp-bridge>
 <msti-bridge-parameters>
 <time-since-last-tc>
 </time-since-last-tc>
 </msti-bridge-parameters>
</stp-bridge>
```

**Description**

### <tracing-information>

**Usage**

```
<tracing-information>
 <flags>
 flags
 </flags>
 <filename>
 filename
 </filename>
 <filesize>
 filesize
 </filesize>
 <filelimit>
 filelimit
 </filelimit>
</tracing-information>
```

**Description**

### <untagged-vlan-member-list>

**Usage**

```
<untagged-vlan-member-list>
 <untagged-vlan-member>
 untagged-vlan-member
 </untagged-vlan-member>
</untagged-vlan-member-list>
```

**Description****<vlan-information>****Usage**

```

<vlan-information>
 <vlan-summary>....</vlan-summary>
 <vlan-terse>
 vlan-terse
 </vlan-terse>
 <vlan>
 vlan
 </vlan>
</vlan-information>

```

**Description** Operational VLAN information

**<vlan-map>****Usage**

```

<mstp-configuration>
 <vlan-map>
 <vlan-map-entry>....</vlan-map-entry>
 </vlan-map>
</mstp-configuration>

```

**Description****<vlan-map-entry>****Usage**

```

<mstp-configuration>
 <vlan-map>
 <vlan-map-entry>
 <msti-id>
 msti-id
 </msti-id>
 <vlan-string>
 vlan-string
 </vlan-string>
 </vlan-map-entry>
 </vlan-map>
</mstp-configuration>

```

**Description****<vlan-mapping-list>****Usage**

```

<vlan-mapping-list>
 <vlan-mapping-rule>....</vlan-mapping-rule>
</vlan-mapping-list>

```

**Description****<vlan-mapping-rule>****Usage**

```
<vlan-mapping-list>
 <vlan-mapping-rule>
 <vlan-mapping-interface>
 vlan-mapping-interface
 </vlan-mapping-interface>
 <vlan-mapping-tag>
 vlan-mapping-tag
 </vlan-mapping-tag>
 <vlan-mapping-operation>
 vlan-mapping-operation
 </vlan-mapping-operation>
 </vlan-mapping-rule>
</vlan-mapping-list>
```

**Description****<vlan-mapping-summary>****Usage**

```
<vlan-mapping-summary>
 <vlan-push-members-count>
 vlan-push-members-count
 </vlan-push-members-count>
 <vlan-push-members-upcount>
 vlan-push-members-upcount
 </vlan-push-members-upcount>

```

**Description** STP bridge parameters for VLAN Spanning Tree

### <vstp-interface-statistics>

#### Usage

```
<stp-interface-statistics>
<vstp-interface-statistics>
 <vlan-id>
 vlan-id
 </vlan-id>
 <stp-interface-statistics-entry>....</stp-interface-statistics-entry>
</vstp-interface-statistics>
</stp-interface-statistics>
```

**Description** Statistics information about one or more VLAN STP interfaces

### <vstp-statistics>

#### Usage

```
<vstp-statistics>
 <vlan-id>
 vlan-id
 </vlan-id>
 <message-type>
 message-type
 </message-type>
 <total-bpdus-sent>
 total-bpdus-sent
```

```
</total-bpdus-sent>
<total-bpdus-received>
 total-bpdus-received
</total-bpdus-received>
<bpdus-sent-5seconds>
 bpdus-sent-5seconds
</bpdus-sent-5seconds>
<bpdus-received-5seconds>
 bpdus-received-5seconds
</bpdus-received-5seconds>
</vstp-statistics>
```

**Description** VLAN Spanning Tree Protocol statistics

### <vstp-statistics>

#### Usage

```
<stp-context-statistics-information>
 <vstp-statistics>
 <vlan-id>
 vlan-id
 </vlan-id>
 <message-type>
 message-type
 </message-type>
 <total-bpdus-sent>
 total-bpdus-sent
 </total-bpdus-sent>
 <total-bpdus-received>
 total-bpdus-received
 </total-bpdus-received>
 <bpdus-sent-5seconds>
 bpdus-sent-5seconds
 </bpdus-sent-5seconds>
 <bpdus-received-5seconds>
 bpdus-received-5seconds
 </bpdus-received-5seconds>
 </vstp-statistics>
</stp-context-statistics-information>
```

**Description** VLAN Spanning Tree Protocol statistics

</chassis-cluster-statistics>
```

**Description**

### <chassis-cluster-control-statistics>

#### Usage

```
<chassis-cluster-information>
 <chassis-cluster-internal-statistics>
 <chassis-cluster-control-statistics>
 <heartbeat-sent>
```

```
 heartbeat-sent
 </heartbeat-sent>
 <heartbeat-received>
 heartbeat-received
 </heartbeat-received>
 <heartbeat-errors>
 heartbeat-errors
 </heartbeat-errors>
 <heartbeat-duplicates>
 heartbeat-duplicates
 </heartbeat-duplicates>
 <control-interface-index>
 control-interface-index
 </control-interface-index>
 <control-link-recovery-packet-count>
 control-link-recovery-packet-count
 </control-link-recovery-packet-count>
 <last-heartbeat-id-sent>
 last-heartbeat-id-sent
 </last-heartbeat-id-sent>
 <last-heartbeat-id-received>
 last-heartbeat-id-received
 </last-heartbeat-id-received>
 </chassis-cluster-control-statistics>
</chassis-cluster-internal-statistics>
</chassis-cluster-information>
```

#### Description

### <chassis-cluster-dataplane-interfaces>

#### Usage

```
<chassis-cluster-dataplane-interfaces>
 <fabric-interface-index>
 fabric-interface-index
 </fabric-interface-index>
 <fabric-information>....</fabric-information>
</chassis-cluster-dataplane-interfaces>
```

#### Description

### <chassis-cluster-ethernet-switching-interfaces>

#### Usage

```
<chassis-cluster-ethernet-switching-interfaces>
 <swfabric-interface-index>
 swfabric-interface-index
 </swfabric-interface-index>
 <swfabric-information>....</swfabric-information>
</chassis-cluster-ethernet-switching-interfaces>
```

#### Description

### <chassis-cluster-ethernet-switching-statistics>

#### Usage

```
<chassis-cluster-ethernet-switching-statistics>
 <chassis-cluster-swfabric>....</chassis-cluster-swfabric>
</chassis-cluster-ethernet-switching-statistics>
```

#### Description

### <chassis-cluster-ethernet-switching-status>

#### Usage

```
<chassis-cluster-ethernet-switching-status>
 <chassis-cluster-status>....</chassis-cluster-status>
 <ethernet-switching-status>
 ethernet-switching-status
 </ethernet-switching-status>
</chassis-cluster-ethernet-switching-status>
```

#### Description

### <chassis-cluster-fabric>

#### Usage

```
<chassis-cluster-statistics>
 <chassis-cluster-interfaces>
 <chassis-cluster-fabric>
 <rto-packets>
 rto-packets
 </rto-packets>
 <forwarded-packets>
 forwarded-packets
 </forwarded-packets>
 <fabric-child>....</fabric-child>
 </chassis-cluster-fabric>
 </chassis-cluster-interfaces>
</chassis-cluster-statistics>
```

#### Description

### <chassis-cluster-fabric-statistics>

#### Usage

```
<chassis-cluster-information>
 <chassis-cluster-internal-statistics>
 <chassis-cluster-fabric-statistics>
 <fabric-child>....</fabric-child>

<cold-synchronization-monitoring-information>
 <cold-synchronization-events>
 <cold-synchronization-event>
 cold-synchronization-event
 </cold-synchronization-event>
 </cold-synchronization-events>
</cold-synchronization-monitoring-information>
```

**Description** List of cold synchronization events

**<cold-synchronization-events>****Usage**

```
<chassis-cluster-information>
 <cold-synchronization-monitoring-information>
 <cold-synchronization-events>
 <cold-synchronization-event>
 cold-synchronization-event
 </cold-synchronization-event>
 </cold-synchronization-events>
 </cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** List of cold synchronization events

### <cold-synchronization-monitoring-information>

**Usage**

```
<cold-synchronization-monitoring-information>
 <cold-synchronization-status-information>....</cold-synchronization-status-information>

 <cold-synchronization-statistics>....</cold-synchronization-statistics>
 <cold-synchronization-events>....</cold-synchronization-events>
</cold-synchronization-monitoring-information>
```

**Description** Cold sync monitoring related information

### <cold-synchronization-monitoring-information>

**Usage**

```
<chassis-cluster-information>
 <cold-synchronization-monitoring-information>

 <cold-synchronization-status-information>....</cold-synchronization-status-information>

 <cold-synchronization-statistics>....</cold-synchronization-statistics>
 <cold-synchronization-events>....</cold-synchronization-events>
 </cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** Cold sync monitoring related information

### <cold-synchronization-pfe-statistics>

**Usage**

```
<cold-synchronization-monitoring-information>
 <cold-synchronization-statistics>
 <cold-synchronization-pfe-statistics>
 <pfe-name>
 pfe-name
 </pfe-name>
 <cold-synchronization-pfe-completed>
 cold-synchronization-pfe-completed
 </cold-synchronization-pfe-completed>
 <cold-synchronization-pfe-failed>
 cold-synchronization-pfe-failed
 </cold-synchronization-pfe-failed>
 </cold-synchronization-pfe-statistics>
 </cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
```

**Description** Cold synchroniizaton statistics for each PFE

### <cold-synchronization-pfe-statistics>

#### Usage

```
<chassis-cluster-information>
<cold-synchronization-monitoring-information>
<cold-synchronization-statistics>
 <cold-synchronization-pfe-statistics>
 <pfe-name>
 pfe-name
 </pfe-name>
 <cold-synchronization-pfe-completed>
 cold-synchronization-pfe-completed
 </cold-synchronization-pfe-completed>
 <cold-synchronization-pfe-failed>
 cold-synchronization-pfe-failed
 </cold-synchronization-pfe-failed>
 </cold-synchronization-pfe-statistics>
</cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
</chassis-cluster-information>
```

**Description** Cold synchronizaton statistics for each PFE

### <cold-synchronization-statistics>

#### Usage

```
<cold-synchronization-monitoring-information>
<cold-synchronization-statistics>
 <current-cold-synchronization-completed>
 current-cold-synchronization-completed
 </current-cold-synchronization-completed>
 <current-cold-synchronization-failed>
 current-cold-synchronization-failed
 </current-cold-synchronization-failed>
 <cold-synchronization-pfe-statistics>....</cold-synchronization-pfe-statistics>
</cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
```

**Description** Cold synchronization statistics

### <cold-synchronization-statistics>

#### Usage

```
<chassis-cluster-information>
<cold-synchronization-monitoring-information>
<cold-synchronization-statistics>
 <current-cold-synchronization-completed>
 current-cold-synchronization-completed
 </current-cold-synchronization-completed>
 <current-cold-synchronization-failed>
 current-cold-synchronization-failed
 </current-cold-synchronization-failed>
```

```

<cold-synchronization-pfe-statistics>....</cold-synchronization-pfe-statistics>

</cold-synchronization-statistics>
</cold-synchronization-monitoring-information>
</chassis-cluster-information>

```

**Description** Cold synchronization statistics

### <cold-synchronization-status-information>

#### Usage

```

<cold-synchronization-monitoring-information>
<cold-synchronization-status-information>
<cold-synchronization-completed>
 cold-synchronization-completed
</cold-synchronization-completed>
<cold-synchronization-not-completed>
 cold-synchronization-not-completed
</cold-synchronization-not-completed>
<cold-synchronization-unknown>
 cold-synchronization-unknown
</cold-synchronization-unknown>
<cold-synchronization-weight>
 cold-synchronization-weight
</cold-synchronization-weight>
</cold-synchronization-status-information>
</cold-synchronization-monitoring-information>

```

**Description** Cold synchronization related status information

### <cold-synchronization-status-information>

#### Usage

```

<chassis-cluster-information>
<cold-synchronization-monitoring-information>
<cold-synchronization-status-information>
<cold-synchronization-completed>
 cold-synchronization-completed
</cold-synchronization-completed>
<cold-synchronization-not-completed>
 cold-synchronization-not-completed
</cold-synchronization-not-completed>
<cold-synchronization-unknown>
 cold-synchronization-unknown
</cold-synchronization-unknown>
<cold-synchronization-weight>
 cold-synchronization-weight
</cold-synchronization-weight>
</cold-synchronization-status-information>
</cold-synchronization-monitoring-information>
</chassis-cluster-information>

```

**Description** Cold synchronization related status information

### <control-information>

**Usage**

```
<chassis-cluster-interface-statistics>
 <control-link-interfaces>
 <control-information>
 <control-link-interface-index>
 control-link-interface-index
 </control-link-interface-index>
 <control-link-interface-name>
 control-link-interface-name
 </control-link-interface-name>
 <control-link-interface-status>
 control-link-interface-status
 </control-link-interface-status>
 </control-information>
 </control-link-interfaces>
</chassis-cluster-interface-statistics>
```

**Description**

### <control-link-client-information>

**Usage**

```
<control-link-information>
 <control-link-client-information>
 <client-status>
 client-status
 </client-status>
 <client-connections>
 client-connections
 </client-connections>
 </control-link-client-information>
</control-link-information>
```

**Description** Control link client information

### <control-link-client-information>

**Usage**

```
<chassis-cluster-information>
 <control-link-information>
 <control-link-client-information>
 <client-status>
 client-status
 </client-status>
 <client-connections>
 client-connections
 </client-connections>
 </control-link-client-information>
 </control-link-information>
```

</chassis-cluster-information>

**Description** Control link client information

### <control-link-events>

**Usage**

```
<control-link-information>
 <control-link-events>
 <control-link-event>
 control-link-event
 </control-link-event>
 </control-link-events>
</control-link-information>
```

**Description** List of control link events

### <control-link-events>

**Usage**

```
<chassis-cluster-information>
 <control-link-information>
 <control-link-events>
 <control-link-event>
 control-link-event
 </control-link-event>
 </control-link-events>
 </control-link-information>
</chassis-cluster-information>
```

**Description** List of control link events

### <control-link-hb-events>

**Usage**

```
<control-link-information>
 <control-link-hb-events>
 <control-link-hb-event>
 control-link-hb-event
 </control-link-hb-event>
 </control-link-hb-events>
</control-link-information>
```

**Description** List of control link monitoring heartbeat and jitter events

### <control-link-hb-events>

**Usage**

```
<chassis-cluster-information>
```

```
<control-link-information>
 <control-link-hb-events>
 <control-link-hb-event>
 control-link-hb-event
 </control-link-hb-event>
 </control-link-hb-events>
</control-link-information>
</chassis-cluster-information>
```

**Description** List of control link monitoring heartbeat and jitter events

### <control-link-information>

#### Usage

```
<control-link-information>
 <control-interface-status>
 control-interface-status
 </control-interface-status>
 <control-link-server-information>....</control-link-server-information>
 <control-link-client-information>....</control-link-client-information>
 <control-link-events>....</control-link-events>
 <control-link-hb-events>....</control-link-hb-events>
</control-link-information>
```

**Description** Displays complete control link information for debugging purposes

### <control-link-information>

#### Usage

```
<chassis-cluster-information>
 <control-link-information>
 <control-interface-status>
 control-interface-status
 </control-interface-status>
 <control-link-server-information>....</control-link-server-information>
 <control-link-client-information>....</control-link-client-information>
 <control-link-events>....</control-link-events>
 <control-link-hb-events>....</control-link-hb-events>
 </control-link-information>
</chassis-cluster-information>
```

**Description** Displays complete control link information for debugging purposes

### <control-link-interfaces>

#### Usage

```
<chassis-cluster-interface-statistics>
 <control-link-interfaces>
 <control-information>....</control-information>
 </control-link-interfaces>
```

```
</chassis-cluster-interface-statistics>
```

#### Description

### <control-link-server-information>

#### Usage

```
<control-link-information>
 <control-link-server-information>
 <server-status>
 server-status
 </server-status>
 <server-connections>
 server-connections
 </server-connections>
 </control-link-server-information>
</control-link-information>
```

**Description** Control link server information

### <control-link-server-information>

#### Usage

```
<chassis-cluster-information>
 <control-link-information>
 <control-link-server-information>
 <server-status>
 server-status
 </server-status>
 <server-connections>
 server-connections
 </server-connections>
 </control-link-server-information>
 </control-link-information>
</chassis-cluster-information>
```

**Description** Control link server information

### <control-link-vlan-information>

#### Usage

```
<chassis-cluster-information>
 <control-link-vlan-information>
 <control-link-vlan-status>
 control-link-vlan-status
 </control-link-vlan-status>
 </control-link-vlan-information>
</chassis-cluster-information>
```

**Description** Control port traffic tagging with vlan(4094) enabled or disabled

## <dataplane-interfaces>

### Usage

```
<chassis-cluster-interface-statistics>
 <dataplane-interfaces>
 <fabric-information>....</fabric-information>
 </dataplane-interfaces>
</chassis-cluster-interface-statistics>
```

### Description

## <fabric-child>

### Usage

```
<chassis-cluster-statistics>
 <chassis-cluster-interfaces>
 <chassis-cluster-fabric>
 <fabric-child>
 <fabric-child-index>
 fabric-child-index
 </fabric-child-index>
 <fabric-hello-sent>
 fabric-hello-sent
 </fabric-hello-sent>
 <fabric-hello-received>
 fabric-hello-received
 </fabric-hello-received>
 <fabric-hello-error>
 fabric-hello-error
 </fabric-hello-error>
 </fabric-child>
 </chassis-cluster-fabric>
 </chassis-cluster-interfaces>
</chassis-cluster-statistics>
```

### Description

## <fabric-child>

### Usage

```
<chassis-cluster-information>
 <chassis-cluster-internal-statistics>
 <chassis-cluster-fabric-statistics>
 <fabric-child>
 <fabric-child-index>
 fabric-child-index
 </fabric-child-index>
 <fabric-hello-sent>
 fabric-hello-sent
 </fabric-hello-sent>
 <fabric-hello-received>
 fabric-hello-received
 </fabric-hello-received>
```

```

 <fabric-hello-error>
 fabric-hello-error
 </fabric-hello-error>
 </fabric-child>
</chassis-cluster-fabric-statistics>
</chassis-cluster-internal-statistics>
</chassis-cluster-information>

```

#### Description

### <fabric-information>

#### Usage

```

<chassis-cluster-interface-statistics>
 <dataplane-interfaces>
 <fabric-information>
 <fabric-interface-index>
 fabric-interface-index
 </fabric-interface-index>
 <fabric-child-interface-name>
 fabric-child-interface-name
 </fabric-child-interface-name>
 <fabric-child-interface-status>
 fabric-child-interface-status
 </fabric-child-interface-status>
 </fabric-information>
 </dataplane-interfaces>
</chassis-cluster-interface-statistics>

```

#### Description

### <fabric-information>

#### Usage

```

<chassis-cluster-dataplane-interfaces>
 <fabric-information>
 <fabric-interface-index>
 fabric-interface-index
 </fabric-interface-index>
 <fabric-child-interface-name>
 fabric-child-interface-name
 </fabric-child-interface-name>
 <fabric-child-interface-status>
 fabric-child-interface-status
 </fabric-child-interface-status>
 </fabric-information>
</chassis-cluster-dataplane-interfaces>

```

#### Description

### <fabric-link-events>

#### Usage

```
<fabric-link-information>
 <fabric-link-events>
 <fabric-link-event>
 fabric-link-event
 </fabric-link-event>
 </fabric-link-events>
</fabric-link-information>
```

**Description** List of fabric link events

### <fabric-link-events>

#### Usage

```
<chassis-cluster-information>
 <fabric-link-information>
 <fabric-link-events>
 <fabric-link-event>
 fabric-link-event
 </fabric-link-event>
 </fabric-link-events>
 </fabric-link-information>
</chassis-cluster-information>
```

**Description** List of fabric link events

### <fabric-link-hb-events>

#### Usage

```
<fabric-link-information>
 <fabric-link-hb-events>
 <fabric-link-hb-event>
 fabric-link-hb-event
 </fabric-link-hb-event>
 </fabric-link-hb-events>
</fabric-link-information>
```

**Description** List of fabric link heartbeat and jitter events

### <fabric-link-hb-events>

#### Usage

```
<chassis-cluster-information>
 <fabric-link-information>
 <fabric-link-hb-events>
 <fabric-link-hb-event>
 fabric-link-hb-event
 </fabric-link-hb-event>
 </fabric-link-hb-events>
 </fabric-link-information>
```

```
</fabric-link-hb-events>
</fabric-link-information>
</chassis-cluster-information>
```

**Description** List of fabric link heartbeat and jitter events

### <fabric-link-information>

#### Usage

```
<fabric-link-information>
 <fabric-monitoring-information>....</fabric-monitoring-information>
 <fabric-link-events>....</fabric-link-events>
 <fabric-link-hb-events>....</fabric-link-hb-events>
</fabric-link-information>
```

**Description** Displays complete fabric link information for debugging purposes

### <fabric-link-information>

#### Usage

```
<chassis-cluster-information>
 <fabric-link-information>
 <fabric-monitoring-information>....</fabric-monitoring-information>
 <fabric-link-events>....</fabric-link-events>
 <fabric-link-hb-events>....</fabric-link-hb-events>
 </fabric-link-information>
</chassis-cluster-information>
```

**Description** Displays complete fabric link information for debugging purposes

### <fabric-monitoring-information>

#### Usage

```
<fabric-monitoring-information>
 <fabric-monitoring-status>....</fabric-monitoring-status>
</fabric-monitoring-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-information>

#### Usage

```
<fabric-link-information>
 <fabric-monitoring-information>
 <fabric-monitoring-status>....</fabric-monitoring-status>
 </fabric-monitoring-information>
</fabric-link-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-information>

**Usage**

```
<chassis-cluster-information>
 <fabric-link-information>
 <fabric-monitoring-information>
 <fabric-monitoring-status>....</fabric-monitoring-status>
 </fabric-monitoring-information>
 </fabric-link-information>
</chassis-cluster-information>
```

**Description** Fabric monitoring related information

### <fabric-monitoring-status>

**Usage**

```
<fabric-monitoring-information>
 <fabric-monitoring-status>
 <fabric-monitoring-state>
 fabric-monitoring-state
 </fabric-monitoring-state>
 <fabric-monitoring-activation-status>
 fabric-monitoring-activation-status
 </fabric-monitoring-activation-status>
 <fabric-monitoring-data-plane-notified-status>
 fabric-monitoring-data-plane-notified-status
 </fabric-monitoring-data-plane-notified-status>
 <fabric-monitoring-internal-status>
 fabric-monitoring-internal-status
 </fabric-monitoring-internal-status>
 </fabric-monitoring-status>
</fabric-monitoring-information>
```

**Description** Fabric monitoring status

### <fabric-monitoring-status>

**Usage**

```
<fabric-link-information>
 <fabric-monitoring-information>
 <fabric-monitoring-status>
 <fabric-monitoring-state>
 fabric-monitoring-state
 </fabric-monitoring-state>
 <fabric-monitoring-activation-status>
 fabric-monitoring-activation-status
 </fabric-monitoring-activation-status>
 <fabric-monitoring-data-plane-notified-status>
 fabric-monitoring-data-plane-notified-status
 </fabric-monitoring-data-plane-notified-status>
 </fabric-monitoring-status>
 </fabric-monitoring-information>
```

```

 <fabric-monitoring-internal-status>
 fabric-monitoring-internal-status
 </fabric-monitoring-internal-status>
 </fabric-monitoring-status>
</fabric-monitoring-information>
</fabric-link-information>

```

**Description** Fabric monitoring status

### <fabric-monitoring-status>

#### Usage

```

<chassis-cluster-information>
 <fabric-link-information>
 <fabric-monitoring-information>
 <fabric-monitoring-status>
 <fabric-monitoring-state>
 fabric-monitoring-state
 </fabric-monitoring-state>
 <fabric-monitoring-activation-status>
 fabric-monitoring-activation-status
 </fabric-monitoring-activation-status>
 <fabric-monitoring-data-plane-notified-status>
 fabric-monitoring-data-plane-notified-status
 </fabric-monitoring-data-plane-notified-status>
 <fabric-monitoring-internal-status>
 fabric-monitoring-internal-status
 </fabric-monitoring-internal-status>
 </fabric-monitoring-status>
 </fabric-monitoring-information>
 </fabric-link-information>
</chassis-cluster-information>

```

**Description** Fabric monitoring status

### <hardware-monitoring-events>

#### Usage

```

<hardware-monitoring-information>
 <hardware-monitoring-events>
 <hardware-monitoring-event>
 hardware-monitoring-event
 </hardware-monitoring-event>
 </hardware-monitoring-events>
</hardware-monitoring-information>

```

**Description** List of hardware monitoring events

### <hardware-monitoring-events>

**Usage**

```
<chassis-cluster-information>
 <hardware-monitoring-information>
 <hardware-monitoring-events>
 <hardware-monitoring-event>
 hardware-monitoring-event
 </hardware-monitoring-event>
 </hardware-monitoring-events>
 </hardware-monitoring-information>
</chassis-cluster-information>
```

**Description** List of hardware monitoring events

### <hardware-monitoring-information>

**Usage**

```
<hardware-monitoring-information>

<hardware-monitoring-status-information>....</hardware-monitoring-status-information>

 <hardware-monitoring-events>....</hardware-monitoring-events>
</hardware-monitoring-information>
```

**Description** Displays complete hardware monitoring information for debugging purposes

### <hardware-monitoring-information>

**Usage**

```
<chassis-cluster-information>
 <hardware-monitoring-information>

 <hardware-monitoring-status-information>....</hardware-monitoring-status-information>

 <hardware-monitoring-events>....</hardware-monitoring-events>
 </hardware-monitoring-information>
</chassis-cluster-information>
```

**Description** Displays complete hardware monitoring information for debugging purposes

### <hardware-monitoring-status-information>

**Usage**

```
<hardware-monitoring-information>
 <hardware-monitoring-status-information>
 <hardware-monitoring-activation-status>
 hardware-monitoring-activation-status
 </hardware-monitoring-activation-status>
 <hardware-monitoring-rg0-errors>
```

```

 hardware-monitoring-rg0-errors
 </hardware-monitoring-rg0-errors>
 <hardware-monitoring-rg1-errors>
 hardware-monitoring-rg1-errors
 </hardware-monitoring-rg1-errors>
 <hardware-monitoring-rg0-failover>
 hardware-monitoring-rg0-failover
 </hardware-monitoring-rg0-failover>
</hardware-monitoring-status-information>
</hardware-monitoring-information>

```

#### Description

### <hardware-monitoring-status-information>

#### Usage

```

<chassis-cluster-information>
 <hardware-monitoring-information>
 <hardware-monitoring-status-information>
 <hardware-monitoring-activation-status>
 hardware-monitoring-activation-status
 </hardware-monitoring-activation-status>
 <hardware-monitoring-rg0-errors>
 hardware-monitoring-rg0-errors
 </hardware-monitoring-rg0-errors>
 <hardware-monitoring-rg1-errors>
 hardware-monitoring-rg1-errors
 </hardware-monitoring-rg1-errors>
 <hardware-monitoring-rg0-failover>
 hardware-monitoring-rg0-failover
 </hardware-monitoring-rg0-failover>
 </hardware-monitoring-status-information>
 </hardware-monitoring-information>
</chassis-cluster-information>

```

#### Description

### <interface-monitoring>

#### Usage

```

<chassis-cluster-interface-statistics>
 <interface-monitoring>
 <weight>
 weight
 </weight>
 <status>
 status
 </status>
 <interface-name-for-monitoring>
 interface-name-for-monitoring
 </interface-name-for-monitoring>
 <redundancy-group-for-interface>
 redundancy-group-for-interface
 </redundancy-group-for-interface>
 </interface-monitoring>
</chassis-cluster-interface-statistics>

```

```
</interface-monitoring>
</chassis-cluster-interface-statistics>
```

**Description****<interface-monitoring-events>****Usage**

```
<interface-monitoring-information>
 <interface-monitoring-events>
 <interface-monitoring-event>
 interface-monitoring-event
 </interface-monitoring-event>
 </interface-monitoring-events>
</interface-monitoring-information>
```

**Description** List of interface monitoring events

**<interface-monitoring-events>****Usage**

```
<chassis-cluster-information>
 <interface-monitoring-information>
 <interface-monitoring-events>
 <interface-monitoring-event>
 interface-monitoring-event
 </interface-monitoring-event>
 </interface-monitoring-events>
 </interface-monitoring-information>
</chassis-cluster-information>
```

**Description** List of interface monitoring events

**<interface-monitoring-information>****Usage**

```
<interface-monitoring-information>
 <interface-monitoring-statistics>....</interface-monitoring-statistics>
 <interface-monitoring-events>....</interface-monitoring-events>
</interface-monitoring-information>
```

**Description** Interface monitoring related information

**<interface-monitoring-information>****Usage**

```
<chassis-cluster-information>
 <interface-monitoring-information>
 <interface-monitoring-statistics>....</interface-monitoring-statistics>
 <interface-monitoring-events>....</interface-monitoring-events>
```

```
</interface-monitoring-information>
</chassis-cluster-information>
```

**Description** Interface monitoring related information

### <interface-monitoring-statistics>

#### Usage

```
<interface-monitoring-information>
 <interface-monitoring-statistics>
 <monitored-interface-failover-count>
 monitored-interface-failover-count
 </monitored-interface-failover-count>
 </interface-monitoring-statistics>
</interface-monitoring-information>
```

**Description** Interface monitoring related statistics

### <interface-monitoring-statistics>

#### Usage

```
<chassis-cluster-information>
 <interface-monitoring-information>
 <interface-monitoring-statistics>
 <monitored-interface-failover-count>
 monitored-interface-failover-count
 </monitored-interface-failover-count>
 </interface-monitoring-statistics>
 </interface-monitoring-information>
</chassis-cluster-information>
```

**Description** Interface monitoring related statistics

### <loopback-information>

#### Usage

```
<loopback-information>
 <pfe-name>
 pfe-name
 </pfe-name>
 <loopback-status>
 loopback-status
 </loopback-status>
 <nexthop-status>
 nexthop-status
 </nexthop-status>
 <mbuf-status>
 mbuf-status
 </mbuf-status>
</loopback-information>
```

**Description** Loopback information

### <loopback-information>

**Usage**

```
<chassis-cluster-information>
 <loopback-information>
 <pfe-name>
 pfe-name
 </pfe-name>
 <loopback-status>
 loopback-status
 </loopback-status>
 <nexthop-status>
 nexthop-status
 </nexthop-status>
 <mbuf-status>
 mbuf-status
 </mbuf-status>
 </loopback-information>
</chassis-cluster-information>
```

**Description** Loopback information

### <redundancy-group-information>

**Usage**

```
<redundancy-group-information-list>
 <redundancy-group-information>
 <redundancy-group-id>
 redundancy-group-id
 </redundancy-group-id>

 <redundancy-group-monitoring-information>....</redundancy-group-monitoring-information>

 <redundancy-group-state-transition-events>....</redundancy-group-state-transition-events>

 </redundancy-group-information>
</redundancy-group-information-list>
```

**Description** Redundancy group related information

### <redundancy-group-information>

**Usage**

```
<chassis-cluster-information>
 <redundancy-group-information-list>
 <redundancy-group-information>
 <redundancy-group-id>
 redundancy-group-id
 </redundancy-group-id>
```

```
<redundancy-group-monitoring-information>....</redundancy-group-monitoring-information>
```

```
<redundancy-group-state-transition-events>....</redundancy-group-state-transition-events>
```

```
 </redundancy-group-information>
 </redundancy-group-information-list>
</chassis-cluster-information>
```

**Description** Redundancy group related information

### <redundancy-group-information-list>

#### Usage

```
<redundancy-group-information-list>
 <redundancy-group-information>....</redundancy-group-information>
</redundancy-group-information-list>
```

#### Description

### <redundancy-group-information-list>

#### Usage

```
<chassis-cluster-information>
 <redundancy-group-information-list>
 <redundancy-group-information>....</redundancy-group-information>
 </redundancy-group-information-list>
</chassis-cluster-information>
```

#### Description

### <redundancy-group-monitoring-information>

#### Usage

```
<redundancy-group-information-list>
 <redundancy-group-information>
 <redundancy-group-monitoring-information>
 <monitoring-failure-string>
 monitoring-failure-string
 </monitoring-failure-string>
 <redundancy-group-threshold>
 redundancy-group-threshold
 </redundancy-group-threshold>
 </redundancy-group-monitoring-information>
 </redundancy-group-information>
</redundancy-group-information-list>
```

#### Description

### <redundancy-group-monitoring-information>

#### Usage

```
<chassis-cluster-information>

**Description** Detailed statistics of SPU monitoring

### <spu-monitoring-status>

#### Usage

```
<spu-monitoring-information>
 <spu-monitoring-status>
 <spu-monitoring-state>
 spu-monitoring-state
 </spu-monitoring-state>
 <spu-monitoring-weight>
 spu-monitoring-weight
 </spu-monitoring-weight>
 <spu-monitoring-spu-state>....</spu-monitoring-spu-state>
 </spu-monitoring-status>
</spu-monitoring-information>
```

**Description** SPU monitoring related status information

### <spu-monitoring-status>

#### Usage

```
<chassis-cluster-information>
 <spu-monitoring-information>
 <spu-monitoring-status>
 <spu-monitoring-state>
 spu-monitoring-state
```

```
</spu-monitoring-state>
<spu-monitoring-weight>
 spu-monitoring-weight
</spu-monitoring-weight>
<spu-monitoring-spu-state>....</spu-monitoring-spu-state>
</spu-monitoring-status>
</spu-monitoring-information>
</chassis-cluster-information>
```

**Description** SPU monitoring related status information

### <swfabric-information>

#### Usage

```
<chassis-cluster-ethernet-switching-interfaces>
 <swfabric-information>
 <swfab-child-interface-name>
 swfab-child-interface-name
 </swfab-child-interface-name>
 <swfab-child-interface-status>
 swfab-child-interface-status
 </swfab-child-interface-status>
 </swfabric-information>
</chassis-cluster-ethernet-switching-interfaces>
```

**Description**

## Summary of Logical Systems Response Tags ---

### <lsys-lic-status>

#### Usage

```
<show-lsys-lic-status>
 <lsys-lic-status>
 <lsys-name>
 lsys-name
 </lsys-name>
 <lic-status>
 lic-status
 </lic-status>
 </lsys-lic-status>
</show-lsys-lic-status>
```

**Description**

### <show-lsys-lic-status>

#### Usage

```
<show-lsys-lic-status>
 <lsys-lic-status>....</lsys-lic-status>
</show-lsys-lic-status>
```

**Description** License status for each logical system

## Summary of DNS Proxy Response Response Tags

---

### <dns-proxy>

#### Usage

```
<dns-proxy-information>
 <dns-proxy>
 <status>
 status
 </status>
 <queries-received>
 queries-received
 </queries-received>
 <responses-sent>
 responses-sent
 </responses-sent>
 <queries-forwarded>
 queries-forwarded
 </queries-forwarded>
 <negative-responses>
 negative-responses
 </negative-responses>
 <retries>
 retries
 </retries>
 <pending-requests>
 pending-requests
 </pending-requests>
 <server-failures>
 server-failures
 </server-failures>
 <cache-entries>
 cache-entries
 </cache-entries>
 <interfaces>....</interfaces>
 </dns-proxy>
</dns-proxy-information>
```

**Description** Information DNS proxy status and statistics

### <dns-proxy-cache-entry>

#### Usage

```
<dns-proxy-cache-information>
 <dns-proxy-cache-entry>
 <hostname>
 hostname
 </hostname>
 <host-address>
 host-address
 </host-address>
```

```
<ttl>
 ttl
</ttl>
<entry-type>
 entry-type
</entry-type>
<class>
 class
</class>
</dns-proxy-cache-entry>
</dns-proxy-cache-information>
```

**Description** Information DNS proxy status and statistics

### <dns-proxy-cache-information>

#### Usage

```
<dns-proxy-cache-information>
 <dns-proxy-cache-entry>....</dns-proxy-cache-entry>
</dns-proxy-cache-information>
```

**Description** Information about DNS proxy cache

### <dns-proxy-information>

#### Usage

```
<dns-proxy-information>
 <dns-proxy>....</dns-proxy>
</dns-proxy-information>
```

**Description** Information about DNS proxy

### <dynamic-dns-client>

#### Usage

```
<dynamic-dns-client-information>
 <dynamic-dns-client>
 <internal-hostname>
 internal-hostname
 </internal-hostname>
 <server>
 server
 </server>
 <last-response>
 last-response
 </last-response>
 <last-update-time>
 last-update-time
 </last-update-time>
 <interface>
 interface
```

```
</interface>
<user-name>
 user-name
</user-name>
<agent>
 agent
</agent>
</dynamic-dns-client>
</dynamic-dns-client-information>
```

**Description** Information about a Dynamic DNS client status

### <dynamic-dns-client-information>

#### Usage

```
<dynamic-dns-client-information>
<dynamic-dns-client>....</dynamic-dns-client>
</dynamic-dns-client-information>
```

**Description** Information about one or more Dynamic DNS clients status

### <interfaces>

#### Usage

```
<interfaces>
<interface>
 interface
</interface>
</interfaces>
```

**Description** Interfaces configured

### <interfaces>

#### Usage

```
<dns-proxy-information>
<dns-proxy>
 <interfaces>
 <interface>
 interface
 </interface>
 </interfaces>
</dns-proxy>
</dns-proxy-information>
```

**Description** Interfaces configured

## Summary of NAT Response Tags

### <destination-address-range-entry>

#### Usage

```
<source-nat-rule-detail-information>
 <source-nat-rule-entry>
 <destination-address-range-entry>
 <rule-destination-address>
 rule-destination-address
 </rule-destination-address>
 <rule-destination-address-low-range>
 rule-destination-address-low-range
 </rule-destination-address-low-range>
 <rule-destination-address-high-range>
 rule-destination-address-high-range
 </rule-destination-address-high-range>
 </destination-address-range-entry>
 </source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** The destination address range

### <destination-nat-entry>

#### Usage

```
<destination-nat-summary-information>
 <destination-nat-entry>
 <destination-nat-pool-name>
 destination-nat-pool-name
 </destination-nat-pool-name>
 <destination-address-range>
 destination-address-range
 </destination-address-range>
 <destination-port-number>
 destination-port-number
 </destination-port-number>
 </destination-nat-entry>
</destination-nat-summary-information>
```

**Description** Information about a destination NAT entry

### <destination-nat-pool-entry>

#### Usage

```
<destination-nat-pool-information>
 <destination-nat-pool-entry>
 <pool-name>
 pool-name
 </pool-name>
 <pool-description>
```

```
 pool-description
 </pool-description>
 <pool-id>
 pool-id
 </pool-id>
 <routing-instance-name>
 routing-instance-name
 </routing-instance-name>
 <total-pool-address>
 total-pool-address
 </total-pool-address>
 <address-pool-hits>
 address-pool-hits
 </address-pool-hits>
 <pool-address-range>....</pool-address-range>
</destination-nat-pool-entry>
</destination-nat-pool-information>
```

**Description** Information on the destination-nat pool

### <destination-nat-pool-information>

#### Usage

```
<destination-nat-pool-information>
 <total-destination-nat-pool-number>....</total-destination-nat-pool-number>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <destination-nat-pool-entry>....</destination-nat-pool-entry>
</destination-nat-pool-information>
```

**Description** Show destination-nat address pool information

### <destination-nat-rule-entry>

#### Usage

```
<destination-nat-rule-information>
 <destination-nat-rule-entry>
 <rule-name>
 rule-name
 </rule-name>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 <rule-description>
 rule-description
 </rule-description>
 <rule-id>
 rule-id
 </rule-id>
 <rule-matching-position>
 rule-matching-position
```

```

</rule-matching-position>
<rule-from-context>
 rule-from-context
</rule-from-context>

 rule-from-context-name
</rule-from-context-name>
<rule-source-address-range-entry>....</rule-source-address-range-entry>
<rule-destination-address-range-entry>....</rule-destination-address-range-entry>

<destination-port>
 destination-port
</destination-port>
<dst-nat-protocol-entry>....</dst-nat-protocol-entry>
<destination-nat-rule-action>
 destination-nat-rule-action
</destination-nat-rule-action>
<address-pool-hits>
 address-pool-hits
</address-pool-hits>
</destination-nat-rule-entry>
</destination-nat-rule-information>

```

**Description** Information on the destination-nat rule

### <destination-nat-rule-information>

#### Usage

```

<destination-nat-rule-information>
 <total-destination-nat-rules>....</total-destination-nat-rules>

 <total-destination-nat-rule-ref-addr-num>....</total-destination-nat-rule-ref-addr-num>

 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <destination-nat-rule-entry>....</destination-nat-rule-entry>
</destination-nat-rule-information>

```

**Description** Show destination-nat rule information

### <destination-nat-summary-information>

#### Usage

```

<destination-nat-summary-information>
 <destination-nat-entry>....</destination-nat-entry>
</destination-nat-summary-information>

```

**Description** Information about one or more destination NAT entries

### <destination-port-entry>

#### Usage

```
<source-nat-rule-detail-information>
 <source-nat-rule-entry>
 <destination-port-entry>
 <rule-destination-port-low>
 rule-destination-port-low
 </rule-destination-port-low>
 <rule-destination-port-high>
 rule-destination-port-high
 </rule-destination-port-high>
 </destination-port-entry>
 </source-nat-rule-entry>
</source-nat-rule-detail-information>
```

**Description** The destination address range

### <dst-nat-protocol-entry>

#### Usage

```
<destination-nat-rule-information>
 <destination-nat-rule-entry>
 <dst-nat-protocol-entry>
 <dst-nat-protocol>
 dst-nat-protocol
 </dst-nat-protocol>
 </dst-nat-protocol-entry>
 </destination-nat-rule-entry>
</destination-nat-rule-information>
```

**Description** IP protocol

### <incoming-table-entry>

#### Usage

```
<incoming-table-information>
 <incoming-table-entry>
 <destination>
 destination
 </destination>
 <host>
 host
 </host>
 <references>
 references
 </references>
 <timeout>
 timeout
 </timeout>
 <source-pool>
 source-pool
```

```

 </source-pool>
 </incoming-table-entry>
</incoming-table-information>

```

#### Description

### <incoming-table-information>

#### Usage

```

<incoming-table-information>
 <in-use>
 in-use
 </in-use>
 <maximum>
 maximum
 </maximum>
 <entry-allocation-failed>
 entry-allocation-failed
 </entry-allocation-failed>
 <incoming-table-entry>....</incoming-table-entry>
</incoming-table-information>

```

#### Description

### <interface-nat-ports-entry>

#### Usage

```

<interface-nat-ports-information>
 <interface-nat-ports-entry>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <pool-index>
 pool-index
 </pool-index>
 <total-ports>
 total-ports
 </total-ports>
 <single-ports-allocated>
 single-ports-allocated
 </single-ports-allocated>
 <single-ports-available>
 single-ports-available
 </single-ports-available>
 <twin-ports-allocated>
 twin-ports-allocated
 </twin-ports-allocated>
 <twin-ports-available>
 twin-ports-available
 </twin-ports-available>
 </interface-nat-ports-entry>
</interface-nat-ports-information>

```

**Description****<interface-nat-ports-information>****Usage**

```
<interface-nat-ports-information>
 <interface-nat-ports-entry>....</interface-nat-ports-entry>
</interface-nat-ports-information>
```

**Description****<persist-nat-external-node-entry>****Usage**

```
<persist-nat-external-node-table>
 <persist-nat-external-node-entry>
 <persist-nat-enode-internal-ip>
 persist-nat-enode-internal-ip
 </persist-nat-enode-internal-ip>
 <persist-nat-enode-internal-port>
 persist-nat-enode-internal-port
 </persist-nat-enode-internal-port>
 <persist-nat-enode-external-ip>
 persist-nat-enode-external-ip
 </persist-nat-enode-external-ip>
 <persist-nat-enode-external-port>
 persist-nat-enode-external-port
 </persist-nat-enode-external-port>
 <persist-nat-zone-name>
 persist-nat-zone-name
 </persist-nat-zone-name>
 </persist-nat-external-node-entry>
</persist-nat-external-node-table>
```

**Description** Information about a Persistent NAT external node entry

**<persist-nat-external-node-table>****Usage**

```
<persist-nat-external-node-table>
 <persist-nat-external-node-entry>....</persist-nat-external-node-entry>
</persist-nat-external-node-table>
```

**Description** Information of Persistent NAT external node table

**<persist-nat-table>****Usage**

```
<persist-nat-table>
 <persist-nat-spu-id>
 persist-nat-spu-id
 </persist-nat-spu-id>
```

```
<persist-nat-table-entry>....</persist-nat-table-entry>
</persist-nat-table>
```

**Description** Summay Information of Persistent NAT

## <persist-nat-table-entry>

### Usage

```
<persist-nat-table>
<persist-nat-table-entry>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <persist-nat-internal-ip>
 persist-nat-internal-ip
 </persist-nat-internal-ip>
 <persist-nat-internal-port>
 persist-nat-internal-port
 </persist-nat-internal-port>
 <persist-nat-internal-proto>
 persist-nat-internal-proto
 </persist-nat-internal-proto>
 <persist-nat-reflexive-ip>
 persist-nat-reflexive-ip
 </persist-nat-reflexive-ip>
 <persist-nat-reflexive-port>
 persist-nat-reflexive-port
 </persist-nat-reflexive-port>
 <persist-nat-reflexive-proto>

 persist-nat-config-time
 </persist-nat-config-time>
 <persist-nat-current-session-num>
 persist-nat-current-session-num
 </persist-nat-current-session-num>
 <persist-nat-max-session-num>
 persist-nat-max-session-num
 </persist-nat-max-session-num>
 <persist-nat-rule-name>
 persist-nat-rule-name
 </persist-nat-rule-name>
</persist-nat-table-entry>
```

</persist-nat-table>

**Description** Information about a Persistent NAT entry

### <persist-nat-table-statistic>

#### Usage

```
<persist-nat-table-statistic>
 <persist-nat-spu-id>
 persist-nat-spu-id
 </persist-nat-spu-id>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <persist-nat-binding-total>
 persist-nat-binding-total
 </persist-nat-binding-total>
 <persist-nat-binding-in-use>
 persist-nat-binding-in-use
 </persist-nat-binding-in-use>
 <persist-nat-enode-total>
 persist-nat-enode-total
 </persist-nat-enode-total>
 <persist-nat-enode-in-use>
 persist-nat-enode-in-use
 </persist-nat-enode-in-use>
</persist-nat-table-statistic>
```

**Description** Persistent NAT statistic

### <pool-address-range>

#### Usage

```
<destination-nat-pool-information>
 <destination-nat-pool-entry>
 <pool-address-range>
 <address-range-low>
 address-range-low
 </address-range-low>
 <address-range-high>
 address-range-high
 </address-range-high>
 <address-port>
 address-port
 </address-port>
 </pool-address-range>
 </destination-nat-pool-entry>
</destination-nat-pool-information>
```

**Description** Information on address range

### <rule-destination-address-range-entry>

#### Usage

```

<destination-nat-rule-information>
 <destination-nat-rule-entry>
 <rule-destination-address-range-entry>
 <rule-destination-address>
 rule-destination-address
 </rule-destination-address>
 <rule-destination-address-low-range>
 rule-destination-address-low-range
 </rule-destination-address-low-range>
 <rule-destination-address-high-range>
 rule-destination-address-high-range
 </rule-destination-address-high-range>
 </rule-destination-address-range-entry>
 </destination-nat-rule-entry>
</destination-nat-rule-information>

```

**Description** The destination address range

### <rule-source-address-range-entry>

#### Usage

```

<destination-nat-rule-information>
 <destination-nat-rule-entry>
 <rule-source-address-range-entry>
 <rule-source-address>
 rule-source-address
 </rule-source-address>
 <rule-source-address-low-range>
 rule-source-address-low-range

```

**Description** Information of all dynamic applications

## <rule>

### Usage

```

<rule-list>
 <rule>
 <rule-name>
 rule-name
 </rule-name>
 <dynamic-application-list>....</dynamic-application-list>
 <dynamic-application-group-list>....</dynamic-application-group-list>
 <action>
 action
 </action>
 <session-matched-counter>
 session-matched-counter
 </session-matched-counter>
 </rule>
</rule-list>

```

**Description** Information of the rule

## <rule>

### Usage

```

<application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <rule-name>
 rule-name

```

```
</rule-name>
<dynamic-application-list>....</dynamic-application-list>
<dynamic-application-group-list>....</dynamic-application-group-list>
<action>
 action
</action>
<session-matched-counter>
 session-matched-counter
</session-matched-counter>
</rule>
</rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
```

**Description** Information of the rule

### <rule-list>

**Usage**

```
<rule-list>
 <rule>....</rule>
 <default-rule>....</default-rule>
</rule-list>
```

**Description** Information of all the rules

### <rule-list>

**Usage**

```
<application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>....</rule>
 <default-rule>....</default-rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
</application-firewall>
```

**Description** Information of all the rules

### <rule-set>

**Usage**

```
<application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-set-name>
 rule-set-name
```

```

 </rule-set-name>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <rule-list>....</rule-list>
 <session-pending-counter>
 session-pending-counter
 </session-pending-counter>
 </rule-set>
</rule-set-info>
</application-firewall>

```

**Description****<rule-set-info>****Usage**

```

<application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
</application-firewall>

```

**Description** Information of the rule-set

## Summary of Security Policy Response Tags

**<address-table>****Usage**

```

<security-dns-cache>
 <dns-cache>
 <dns-address>
 <address-table>
 <address-entry>
 address-entry
 </address-entry>
 </address-table>
 </dns-address>
 </dns-cache>
</security-dns-cache>

```

**Description** DNS address table**<alarm>****Usage**

```

<policy-count-alarms>
 <alarm>
 <alarm-count>
 alarm-count
 </alarm-count>
 </alarm>
</policy-count-alarms>

```

```
</alarm-count>
<alarm-type>
 alarm-type
</alarm-type>
</alarm>
</policy-count-alarms>
```

**Description** Information about a single alarm

## <alarm>

### Usage

```
<policy-information>
 <policy-count-alarms>
 <alarm>
 <alarm-count>
 alarm-count
 </alarm-count>
 <alarm-type>
 alarm-type
 </alarm-type>
 </alarm>
 </policy-count-alarms>
</policy-information>
```

**Description** Information about a single alarm

## <alarm>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-count-alarms>
 <alarm>
 <alarm-count>
 alarm-count
 </alarm-count>
 <alarm-type>
 alarm-type
 </alarm-type>
 </alarm>
 </policy-count-alarms>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about a single alarm

## <alarm>

### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-count-alarms>
 <alarm>
 <alarm-count>
 alarm-count
 </alarm-count>
 <alarm-type>
 alarm-type
 </alarm-type>
 </alarm>
 </policy-count-alarms>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about a single alarm

## <alarm>

### Usage

```
<security-policy-match>
 <policy-information>
 <policy-count-alarms>
 <alarm>
 <alarm-count>
 alarm-count
 </alarm-count>
 <alarm-type>
 alarm-type
 </alarm-type>
 </alarm>
 </policy-count-alarms>
 </policy-information>
</security-policy-match>
```

**Description** Information about a single alarm

## <application>

### Usage

```
<applications>
 <application>
 <application-name>
 application-name
 </application-name>
```

```
 <application-term>....</application-term>
 </application>
</applications>
```

**Description** Information about an application in the policy

### <application>

#### Usage

```
<policy-information>
 <applications>
 <application>
 <application-name>
 application-name
 </application-name>
 <application-term>....</application-term>
 </application>
 </applications>
</policy-information>
```

**Description** Information about an application in the policy

### <application>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-name>
 application-name
 </application-name>
 <application-term>....</application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about an application in the policy

### <application>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
```

```
<applications>
 <application>
 <application-name>
 application-name
 </application-name>
 <application-term>....</application-term>
 </application>
</applications>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information about an application in the policy

### <application>

#### Usage

```
<security-policy-match>
 <policy-information>
 <applications>
 <application>
 <application-name>
 application-name
 </application-name>
 <application-term>....</application-term>
 </application>
 </applications>
 </policy-information>
</security-policy-match>
```

**Description** Information about an application in the policy

### <application-acceleration>

#### Usage

```
<policy-application-services>
 <application-acceleration>
 <application-acceleration-profile-name>
 application-acceleration-profile-name
 </application-acceleration-profile-name>
 <application-acceleration-service-options>
 application-acceleration-service-options
 </application-acceleration-service-options>
 </application-acceleration>
</policy-application-services>
```

**Description** Information of the application acceleration

## <application-acceleration>

### Usage

```
<policy-information>
 <policy-application-services>
 <application-acceleration>
 <application-acceleration-profile-name>
 application-acceleration-profile-name
 </application-acceleration-profile-name>
 <application-acceleration-service-options>
 application-acceleration-service-options
 </application-acceleration-service-options>
 </application-acceleration>
 </policy-application-services>
</policy-information>
```

**Description** Information of the application acceleration

## <application-acceleration>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-acceleration>
 <application-acceleration-profile-name>
 application-acceleration-profile-name
 </application-acceleration-profile-name>
 <application-acceleration-service-options>
 application-acceleration-service-options
 </application-acceleration-service-options>
 </application-acceleration>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information of the application acceleration

## <application-acceleration>

### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-acceleration>
 <application-acceleration-profile-name>
```

```

 application-acceleration-profile-name
 </application-acceleration-profile-name>
 <application-acceleration-service-options>
 application-acceleration-service-options
 </application-acceleration-service-options>
 </application-acceleration>
</policy-application-services>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>

```

**Description** Information of the application acceleration

### <application-acceleration>

#### Usage

```

<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-acceleration>
 <application-acceleration-profile-name>
 application-acceleration-profile-name
 </application-acceleration-profile-name>
 <application-acceleration-service-options>
 application-acceleration-service-options
 </application-acceleration-service-options>
 </application-acceleration>
 </policy-application-services>
 </policy-information>
</security-policy-match>

```

**Description** Information of the application acceleration

### <application-firewall>

#### Usage

```

<policy-application-services>
 <application-firewall>
 <rule-set-info>....</rule-set-info>
 </application-firewall>
</policy-application-services>

```

**Description** Information of the application firewall

### <application-firewall>

#### Usage

```

<policy-information>
 <policy-application-services>
 <application-firewall>

```

```
<rule-set-info>....</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
```

**Description** Information of the application firewall

### <application-firewall>

#### Usage

```
<security-policies>
<security-context>
<policies>
<policy-information>
<policy-application-services>
<application-firewall>
<rule-set-info>....</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</policies>
</security-context>
</security-policies>
```

**Description** Information of the application firewall

### <application-firewall>

#### Usage

```
<security-dynamic-policies>
<security-context>
<policies>
<policy-information>
<policy-application-services>
<application-firewall>
<rule-set-info>....</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information of the application firewall

### <application-firewall>

#### Usage

```
<security-policy-match>
<policy-information>
<policy-application-services>
```

```

<application-firewall>
 <rule-set-info>....</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</security-policy-match>

```

**Description** Information of the application firewall

## <application-term>

### Usage

```

<applications>
 <application>
 <application-term>
 <protocol>
 protocol
 </protocol>
 <alg-name>
 alg-name
 </alg-name>
 <inactivity-timeout>
 inactivity-timeout
 </inactivity-timeout>
 <source-port-range>....</source-port-range>
 <destination-port-range>....</destination-port-range>
 <icmp-info>....</icmp-info>
 <rpc-information>....</rpc-information>
 </application-term>
 </application>
</applications>

```

**Description** Information about a term within an application

## <application-term>

### Usage

```

<policy-information>
 <applications>
 <application>
 <application-term>
 <protocol>
 protocol
 </protocol>
 <alg-name>
 alg-name
 </alg-name>
 <inactivity-timeout>
 inactivity-timeout
 </inactivity-timeout>
 <source-port-range>....</source-port-range>
 <destination-port-range>....</destination-port-range>
 </application-term>
 </application>
 </applications>
</policy-information>

```

```
<icmp-info>....</icmp-info>
<rpc-information>....</rpc-information>
</application-term>
</application>
</applications>
</policy-information>
```

**Description** Information about a term within an application

## <application-term>

### Usage

```
<security-policies>
<security-context>
<policies>
<policy-information>
<applications>
<application>
<application-term>
<protocol>
protocol
</protocol>
<alg-name>
alg-name
</alg-name>
<inactivity-timeout>
inactivity-timeout
</inactivity-timeout>
<source-port-range>....</source-port-range>
<destination-port-range>....</destination-port-range>
<icmp-info>....</icmp-info>
<rpc-information>....</rpc-information>
</application-term>
</application>
</applications>
</policy-information>
</policies>
</security-context>
</security-policies>
```

**Description** Information about a term within an application

## <application-term>

### Usage

```
<security-dynamic-policies>
<security-context>
<policies>
<policy-information>
<applications>
<application>
<application-term>
```

```

 <protocol>
 protocol
 </protocol>
 <alg-name>
 alg-name
 </alg-name>
 <inactivity-timeout>
 inactivity-timeout
 </inactivity-timeout>
 <source-port-range>....</source-port-range>
 <destination-port-range>....</destination-port-range>
 <icmp-info>....</icmp-info>
 <rpc-information>....</rpc-information>
 </application-term>
</application>
</applications>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>

```

**Description** Information about a term within an application

### <application-term>

#### Usage

```

<security-policy-match>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <protocol>
 protocol
 </protocol>
 <alg-name>
 alg-name
 </alg-name>
 <inactivity-timeout>
 inactivity-timeout
 </inactivity-timeout>
 <source-port-range>....</source-port-range>
 <destination-port-range>....</destination-port-range>
 <icmp-info>....</icmp-info>
 <rpc-information>....</rpc-information>
 </application-term>
 </application>
 </applications>
 </policy-information>
</security-policy-match>

```

**Description** Information about a term within an application

### <application-traffic-control>

#### Usage

```
<policy-application-services>
 <application-traffic-control>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 </application-traffic-control>
</policy-application-services>
```

**Description** Information of the application traffic control

### <application-traffic-control>

#### Usage

```
<policy-information>
 <policy-application-services>
 <application-traffic-control>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 </application-traffic-control>
 </policy-application-services>
</policy-information>
```

**Description** Information of the application traffic control

### <application-traffic-control>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-traffic-control>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 </application-traffic-control>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information of the application traffic control

**<application-traffic-control>****Usage**

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-traffic-control>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 </application-traffic-control>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Information of the application traffic control

**<application-traffic-control>****Usage**

```

<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-traffic-control>
 <rule-set-name>
 rule-set-name
 </rule-set-name>
 </application-traffic-control>
 </policy-application-services>
 </policy-information>
</security-policy-match>

```

**Description** Information of the application traffic control

**<applications>****Usage**

```

<applications>
 <application>....</application>
</applications>

```

**Description**

**<applications>****Usage**

```

<policy-information>

```

```
<applications>
 <application>....</application>
</applications>
</policy-information>
```

#### Description

<applications>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>....</application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

#### Description

<applications>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>....</application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

#### Description

<applications>

#### Usage

```
<security-policy-match>
 <policy-information>
 <applications>
 <application>....</application>
 </applications>
 </policy-information>
</security-policy-match>
```

**Description****<context-information>****Usage**

```
<context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
</context-information>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

**<context-information>****Usage**

```
<policy-information>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
</policy-information>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

**<context-information>****Usage**

```
<security-policies>
 <security-context>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
 </security-context>
</security-policies>
```

```
 </context-information>
 </security-context>
</security-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <context-information>

#### Usage

```
<security-policy-match>
 <policy-information>
 <context-information>
 <global-context>
 global-context
 </global-context>
 <source-zone-name>
 source-zone-name
 </source-zone-name>
 <destination-zone-name>
 destination-zone-name
 </destination-zone-name>
 </context-information>
 </policy-information>
</security-policy-match>
```

**Description** Information about the logical system, source zone, and destination zone for a policy

### <default-rule>

#### Usage

```
<policy-application-services>
 <application-firewall>
 <rule-set-info>
```

```
<rule-set>
 <rule-list>
 <default-rule>
 <action>
 action
 </action>
 </default-rule>
 </rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
</policy-application-services>
```

**Description** Information of the default rule

### <default-rule>

#### Usage

```
<policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <default-rule>
 <action>
 action
 </action>
 </default-rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
</policy-information>
```

**Description** Information of the default rule

### <default-rule>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <default-rule>
 <action>
```

```

 action
 </action>
 </default-rule>
 </rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</policies>
</security-context>
</security-policies>

```

**Description** Information of the default rule

### <default-rule>

#### Usage

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <default-rule>
 <action>
 action
 </action>
 </default-rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Information of the default rule

### <default-rule>

#### Usage

```

<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>

```

```
<rule-set>
 <rule-list>
 <default-rule>
 <action>
 action
 </action>
 </default-rule>
 </rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</security-policy-match>
```

**Description** Information of the default rule

### <destination-address>

#### Usage

```
<destination-addresses>
 <destination-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </destination-address>
</destination-addresses>
```

**Description** Information about a destination address

### <destination-address>

#### Usage

```
<policy-information>
 <destination-addresses>
 <destination-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </destination-address>
 </destination-addresses>
</policy-information>
```

**Description** Information about a destination address

### <destination-address>

#### Usage

```
<security-policies>
```

```
<security-context>
 <policies>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </destination-address>
 </destination-addresses>
 </policy-information>
 </policies>
</security-context>
</security-policies>
```

**Description** Information about a destination address

### <destination-address>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </destination-address>
 </destination-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about a destination address

### <destination-address>

#### Usage

```
<security-policy-match>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </destination-address>
```

```
 </destination-addresses>
 </policy-information>
</security-policy-match>
```

**Description** Information about a destination address

### <destination-addresses>

**Usage**

```
<destination-addresses>
 <destination-address>....</destination-address>
</destination-addresses>
```

**Description** Information about the destination addresses

### <destination-addresses>

**Usage**

```
<policy-information>
 <destination-addresses>
 <destination-address>....</destination-address>
 </destination-addresses>
</policy-information>
```

**Description** Information about the destination addresses

### <destination-addresses>

**Usage**

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <destination-addresses>
 <destination-address>....</destination-address>
 </destination-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about the destination addresses

### <destination-addresses>

**Usage**

```
<security-dynamic-policies>
 <security-context>
 <policies>
```

```
<policy-information>
 <destination-addresses>
 <destination-address>....</destination-address>
 </destination-addresses>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information about the destination addresses

### <destination-addresses>

#### Usage

```
<security-policy-match>
 <policy-information>
 <destination-addresses>
 <destination-address>....</destination-address>
 </destination-addresses>
 </policy-information>
</security-policy-match>
```

**Description** Information about the destination addresses

### <destination-port-range>

#### Usage

```
<applications>
 <application>
 <application-term>
 <destination-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </destination-port-range>
 </application-term>
 </application>
</applications>
```

**Description** Range of the destination ports

### <destination-port-range>

#### Usage

```
<policy-information>
 <applications>
 <application>
 <application-term>
```

```
<destination-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
</destination-port-range>
</application-term>
</application>
</applications>
</policy-information>
```

**Description** Range of the destination ports

### <destination-port-range>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <destination-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </destination-port-range>
 </application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Range of the destination ports

### <destination-port-range>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
```

```

 <application-term>
 <destination-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </destination-port-range>
 </application-term>
 </application>
</applications>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>

```

**Description** Range of the destination ports

### <destination-port-range>

#### Usage

```

<security-policy-match>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <destination-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </destination-port-range>
 </application-term>
 </application>
 </applications>
 </policy-information>
</security-policy-match>

```

**Description** Range of the destination ports

### <dns-address>

#### Usage

```

<security-dns-cache>
 <dns-cache>
 <dns-address>
 <address-family>
 address-family
 </address-family>
 </dns-address>
 </dns-cache>
</security-dns-cache>

```

```
<address-ttl>
 address-ttl
</address-ttl>
<address-table>....</address-table>
</dns-address>
</dns-cache>
</security-dns-cache>
```

**Description** DNS address

### <dns-cache>

#### Usage

```
<security-dns-cache>
 <dns-cache>
 <dns-name>
 dns-name
 </dns-name>
 <dns-address>....</dns-address>
 </dns-cache>
</security-dns-cache>
```

**Description** DNS cache of a DNS name

### <dynamic-application-group-list>

#### Usage

```
<dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
</dynamic-application-group-list>
```

**Description** Information of all dynamic application group

### <dynamic-application-group-list>

#### Usage

```
<policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
 </dynamic-application-group-list>
 </rule>
 </rule-list>
```

```

 </rule-set>
 </rule-set-info>
</application-firewall>
</policy-application-services>

```

**Description** Information of all dynamic application group

### <dynamic-application-group-list>

#### Usage

```

<policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
 </dynamic-application-group-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
</policy-information>

```

**Description** Information of all dynamic application group

### <dynamic-application-group-list>

#### Usage

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
 </dynamic-application-group-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

```
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
</policy-information>
</policies>
</security-context>
</security-policies>
```

**Description** Information of all dynamic application group

### <dynamic-application-group-list>

#### Usage

```
<security-dynamic-policies>
<security-context>
<policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
 </dynamic-application-group-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information of all dynamic application group

### <dynamic-application-group-list>

#### Usage

```
<security-policy-match>
<policy-information>
<policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
```

```

<rule>
 <dynamic-application-group-list>
 <dynamic-application-group>
 dynamic-application-group
 </dynamic-application-group>
 </dynamic-application-group-list>
</rule>
</rule-list>
</rule-set>
</rule-set-info>
</application-firewall>
</policy-application-services>
</policy-information>
</security-policy-match>

```

**Description** Information of all dynamic application group

### <dynamic-application-list>

#### Usage

```

<dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
</dynamic-application-list>

```

**Description** Information of all dynamic application

### <dynamic-application-list>

#### Usage

```

<policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
 </dynamic-application-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
</policy-application-services>

```

**Description** Information of all dynamic application

## <dynamic-application-list>

### Usage

```
<policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
 </dynamic-application-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
</policy-information>
```

**Description** Information of all dynamic application

## <dynamic-application-list>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
 </dynamic-application-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
```

</security-policies>

**Description** Information of all dynamic application

### <dynamic-application-list>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
 </dynamic-application-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information of all dynamic application

### <dynamic-application-list>

#### Usage

```
<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <rule-list>
 <rule>
 <dynamic-application-list>
 <dynamic-application>
 dynamic-application
 </dynamic-application>
 </dynamic-application-list>
 </rule>
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
</security-policy-match>
```

```
 </rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
</policy-application-services>
</policy-information>
</security-policy-match>
```

**Description** Information of all dynamic application

### <icmp-info>

#### Usage

```
<applications>
 <application>
 <application-term>
 <icmp-info>
 <icmp-type>
 icmp-type
 </icmp-type>
 <icmp-code>
 icmp-code
 </icmp-code>
 </icmp-info>
 </application-term>
 </application>
</applications>
```

**Description** ICMP type information

### <icmp-info>

#### Usage

```
<policy-information>
 <applications>
 <application>
 <application-term>
 <icmp-info>
 <icmp-type>
 icmp-type
 </icmp-type>
 <icmp-code>
 icmp-code
 </icmp-code>
 </icmp-info>
 </application-term>
 </application>
 </applications>
</policy-information>
```

**Description** ICMP type information

**<icmp-info>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <icmp-info>
 <icmp-type>
 icmp-type
 </icmp-type>

 icmp-code
 </icmp-code>
 </icmp-info>
 </application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
 </security-context>

```

</security-dynamic-policies>

**Description** ICMP type information

### <icmp-info>

#### Usage

```
<security-policy-match>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <icmp-info>
 <icmp-type>
 icmp-type
 </icmp-type>
 <icmp-code>
 icmp-code
 </icmp-code>
 </icmp-info>
 </application-term>
 </application>
 </applications>
 </policy-information>
</security-policy-match>
```

**Description** ICMP type information

### <policies>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>....</policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description**

### <policies>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>....</policy-information>
 </policies>
 </security-context>
```

```
</security-dynamic-policies>
```

#### Description

```
<policy-action>
```

#### Usage

```
<policy-action>
 <action-type>
 action-type
 </action-type>
 <tunnel>
 tunnel
 </tunnel>

 </destination-zone-name>
 <context-checksum>
 context-checksum
 </context-checksum>
 </policy-context-checksum-entry>
 </policy-context-checksum-info>
</security-policies>
```

**Description** Information about a context

### <policy-context-checksum-info>

#### Usage

```
<policy-context-checksum-info>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <policy-context-checksum-entry>....</policy-context-checksum-entry>
</policy-context-checksum-info>
```

**Description** Show policy checksum

### <policy-context-checksum-info>

#### Usage

```
<security-policies>
```

```
<policy-context-checksum-info>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <policy-context-checksum-entry>....</policy-context-checksum-entry>
</policy-context-checksum-info>
</security-policies>
```

**Description** Show policy checksum

### <policy-count-alarms>

#### Usage

```
<policy-count-alarms>
 <alarm>....</alarm>
</policy-count-alarms>
```

**Description** Information about alarms for the policy

### <policy-count-alarms>

#### Usage

```
<policy-information>
 <policy-count-alarms>
 <alarm>....</alarm>
 </policy-count-alarms>
</policy-information>
```

**Description** Information about alarms for the policy

### <policy-count-alarms>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-count-alarms>
 <alarm>....</alarm>
 </policy-count-alarms>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about alarms for the policy

**<policy-count-alarms>****Usage**

```

<security-dynamic-policies>
 <security-context>

 </policy-tcp-options-sequence-check>
 </policy-tcp-options>
 </policy-information>
</security-policy-match>

```

**Description** Information about the TCP options of policy

### <policy-tunnel>

#### Usage

```
<policy-tunnel>
 <tunnel-type>
 tunnel-type
 </tunnel-type>
 <tunnel-name>
 tunnel-name
 </tunnel-name>
 <tunnel-identifier>
 tunnel-identifier
 </tunnel-identifier>
 <pair-policy-name>
 pair-policy-name
 </pair-policy-name>
</policy-tunnel>
```

**Description** Information about the policy-based tunnel

### <policy-tunnel>

#### Usage

```
<policy-information>
 <policy-tunnel>
 <tunnel-type>
 tunnel-type
 </tunnel-type>
 <tunnel-name>
 tunnel-name
 </tunnel-name>
 <tunnel-identifier>
 tunnel-identifier
 </tunnel-identifier>
 <pair-policy-name>
 pair-policy-name
 </pair-policy-name>
 </policy-tunnel>
</policy-information>
```

**Description** Information about the policy-based tunnel

### <policy-tunnel>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-tunnel>
```

```

 <tunnel-type>
 tunnel-type
 </tunnel-type>
 <tunnel-name>
 tunnel-name
 </tunnel-name>
 <tunnel-identifier>
 tunnel-identifier
 </tunnel-identifier>
 <pair-policy-name>

 <tunnel-identifier>
 tunnel-identifier
 </tunnel-identifier>
 <pair-policy-name>
 pair-policy-name
 </pair-policy-name>
 </policy-tunnel>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Information about the policy-based tunnel

### <policy-tunnel>

#### Usage

```

<security-policy-match>

```

```
<policy-information>
 <policy-tunnel>
 <tunnel-type>
 tunnel-type
 </tunnel-type>
 <tunnel-name>
 tunnel-name
 </tunnel-name>
 <tunnel-identifier>
 tunnel-identifier
 </tunnel-identifier>
 <pair-policy-name>
 pair-policy-name
 </pair-policy-name>
 </policy-tunnel>
</policy-information>
</security-policy-match>
```

**Description** Information about the policy-based tunnel

### <policy-type-information>

#### Usage

```
<policy-type-information>
 <policy-type-string>
 policy-type-string
 </policy-type-string>
 <policy-type-dynamic-policy-count>
 policy-type-dynamic-policy-count
 </policy-type-dynamic-policy-count>
</policy-type-information>
```

**Description** Information about the type of policy

### <policy-type-information>

#### Usage

```
<policy-information>
 <policy-type-information>
 <policy-type-string>
 policy-type-string
 </policy-type-string>
 <policy-type-dynamic-policy-count>
 policy-type-dynamic-policy-count
 </policy-type-dynamic-policy-count>
 </policy-type-information>
</policy-information>
```

**Description** Information about the type of policy

**<policy-type-information>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>

```

**Description** Information about the type of policy

**<policy-type-information>****Usage**

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-type-information>
 <policy-type-string>
 policy-type-string
 </policy-type-string>
 <policy-type-dynamic-policy-count>
 policy-type-dynamic-policy-count
 </policy-type-dynamic-policy-count>
 </policy-type-information>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Information about the type of policy

**<policy-type-information>****Usage**

```

<security-policy-match>
 <policy-information>
 <policy-type-information>
 <policy-type-string>
 policy-type-string
 </policy-type-string>
 </policy-type-information>
 </policy-information>
</security-policy-match>

```

```
</policy-type-string>
<policy-type-dynamic-policy-count>
 policy-type-dynamic-policy-count
</policy-type-dynamic-policy-count>
</policy-type-information>
</policy-information>
</security-policy-match>
```

**Description** Information about the type of policy

### <policy-zone-context>

#### Usage

```
<policy-zone-context>
<logical-system-name>
 logical-system-name
</logical-system-name>
<policy-zone-context-entry>....</policy-zone-context-entry>
</policy-zone-context>
```

**Description** Show policy zone context

### <policy-zone-context>

#### Usage

```
<security-policies>
<policy-zone-context>
<logical-system-name>
 logical-system-name
</logical-system-name>
<policy-zone-context-entry>....</policy-zone-context-entry>
</policy-zone-context>
</security-policies>
```

**Description** Show policy zone context

### <policy-zone-context-entry>

#### Usage

```
<policy-zone-context>
<policy-zone-context-entry>
<policy-zone-context-from-zone>
 policy-zone-context-from-zone
</policy-zone-context-from-zone>
<policy-zone-context-to-zone>
 policy-zone-context-to-zone
</policy-zone-context-to-zone>
<policy-zone-context-policy-count>
 policy-zone-context-policy-count
</policy-zone-context-policy-count>
</policy-zone-context-entry>
```

</policy-zone-context>

**Description** Information about a context

### <policy-zone-context-entry>

#### Usage

```
<security-policies>
 <policy-zone-context>
 <policy-zone-context-entry>
 <policy-zone-context-from-zone>
 policy-zone-context-from-zone
 </policy-zone-context-from-zone>
 <policy-zone-context-to-zone>
 policy-zone-context-to-zone
 </policy-zone-context-to-zone>
 <policy-zone-context-policy-count>
 policy-zone-context-policy-count
 </policy-zone-context-policy-count>
 </policy-zone-context-entry>
 </policy-zone-context>
</security-policies>
```

**Description** Information about a context

### <prefixes>

#### Usage

```
<prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
</prefixes>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<destination-addresses>
 <destination-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </destination-address>
</destination-addresses>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<source-addresses>
 <source-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </source-address>
</source-addresses>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<policy-information>
 <source-addresses>
 <source-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </source-address>
 </source-addresses>
</policy-information>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<policy-information>
 <destination-addresses>
 <destination-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </destination-address>
 </destination-addresses>
</policy-information>
```

**Description** IP prefixes for an address

**<prefixes>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-addresses>
 <source-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </source-address>
 </source-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

**Description** IP prefixes for an address

**<prefixes>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </destination-address>
 </destination-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

**Description** IP prefixes for an address

**<prefixes>****Usage**

```

<security-dynamic-policies>
 <security-context>
 <policies>

```

```
<policy-information>
 <source-addresses>
 <source-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </source-address>
 </source-addresses>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </destination-address>
 </destination-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```
<security-policy-match>
 <policy-information>
 <source-addresses>
 <source-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
```

```

 </source-address>
 </source-addresses>
</policy-information>
</security-policy-match>

```

**Description** IP prefixes for an address

### <prefixes>

#### Usage

```

<security-policy-match>
 <policy-information>
 <destination-addresses>
 <destination-address>
 <prefixes>
 <address-prefix>
 address-prefix
 </address-prefix>
 </prefixes>
 </destination-address>
 </destination-addresses>
 </policy-information>
</security-policy-match>

```

**Description** IP prefixes for an address

### <program-number-range>

#### Usage

```

<applications>
 <application>
 <application-term>
 <rpc-information>
 <program-number-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </program-number-range>
 </rpc-information>
 </application-term>
 </application>
</applications>

```

**Description**

## <program-number-range>

### Usage

```
<policy-information>
 <applications>
 <application>
 <application-term>
 <rpc-information>
 <program-number-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </program-number-range>
 </rpc-information>
 </application-term>
 </application>
 </applications>
</policy-information>
```

### Description

## <program-number-range>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <rpc-information>
 <program-number-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </program-number-range>
 </rpc-information>
 </application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

### Description

**<program-number-range>****Usage**

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <rpc-information>

 </name>
 <rule-list>....</rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

### Description

## <rule-set>

### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <name>
 name
 </name>
 <rule-list>....</rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

### Description

**<rule-set>****Usage**

```

<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>
 <name>
 name
 </name>
 <rule-list>....</rule-list>
 </rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
</security-policy-match>

```

**Description****<rule-set-info>****Usage**

```

<policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
 </application-firewall>
</policy-application-services>

```

**Description** Information of the rule-set**<rule-set-info>****Usage**

```

<policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
</policy-information>

```

**Description** Information of the rule-set

## <rule-set-info>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information of the rule-set

## <rule-set-info>

### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
 </application-firewall>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information of the rule-set

## <rule-set-info>

### Usage

```
<security-policy-match>
 <policy-information>
 <policy-application-services>
 <application-firewall>
 <rule-set-info>
 <rule-set>....</rule-set>
 </rule-set-info>
```

```
</application-firewall>
</policy-application-services>
</policy-information>
</security-policy-match>
```

**Description** Information of the rule-set

### <security-context>

**Usage**

```
<security-policies>
 <security-context>
 <context-information>....</context-information>
 <policies>....</policies>
 </security-context>
</security-policies>
```

**Description** Information about the security context

### <security-context>

**Usage**

```
<security-dynamic-policies>
 <security-context>
 <context-information>....</context-information>
 <policies>....</policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about the security context

### <security-dns-cache>

**Usage**

```
<security-dns-cache>
 <dns-cache>....</dns-cache>
</security-dns-cache>
```

**Description** DNS cache of firewall policy

### <security-dynamic-policies>

**Usage**

```
<security-dynamic-policies>
 <security-context>....</security-context>
</security-dynamic-policies>
```

**Description** Information about security dynamic policies

## <security-policies>

### Usage

```
<security-policies>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <default-policy>
 default-policy
 </default-policy>
 <security-context>....</security-context>
 <policy-internal-information>....</policy-internal-information>
 <policy-zone-context>....</policy-zone-context>
 <policy-context-checksum-info>....</policy-context-checksum-info>
</security-policies>
```

**Description** Information about security policies

## <security-policy-match>

### Usage

```
<security-policy-match>
 <policy-information>....</policy-information>
</security-policy-match>
```

**Description** Find policy match for a given traffic

## <security-policy-shadow>

### Usage

```
<security-policy-shadow>
 <policy-shadow-policies>....</policy-shadow-policies>
</security-policy-shadow>
```

**Description** Shadow policy information for a given context

## <source-address>

### Usage

```
<source-addresses>
 <source-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </source-address>
</source-addresses>
```

**Description** Information about a source address

### <source-address>

#### Usage

```
<policy-information>
 <source-addresses>
 <source-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </source-address>
 </source-addresses>
</policy-information>
```

**Description** Information about a source address

### <source-address>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-addresses>
 <source-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </source-address>
 </source-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

**Description** Information about a source address

### <source-address>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-addresses>
 <source-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </source-address>
 </source-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

```
 </source-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about a source address

### <source-address>

#### Usage

```
<security-policy-match>
 <policy-information>
 <source-addresses>
 <source-address>
 <address-name>
 address-name
 </address-name>
 <prefixes>....</prefixes>
 </source-address>
 </source-addresses>
 </policy-information>
</security-policy-match>
```

**Description** Information about a source address

### <source-addresses>

#### Usage

```
<source-addresses>
 <source-address>....</source-address>
</source-addresses>
```

#### Description

### <source-addresses>

#### Usage

```
<policy-information>
 <source-addresses>
 <source-address>....</source-address>
 </source-addresses>
</policy-information>
```

#### Description

### <source-addresses>

#### Usage

```
<security-policies>
 <security-context>
```

```
<policies>
 <policy-information>
 <source-addresses>
 <source-address>....</source-address>
 </source-addresses>
 </policy-information>
</policies>
</security-context>
</security-policies>
```

#### Description

#### <source-addresses>

##### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-addresses>
 <source-address>....</source-address>
 </source-addresses>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

#### Description

#### <source-addresses>

##### Usage

```
<security-policy-match>
 <policy-information>
 <source-addresses>
 <source-address>....</source-address>
 </source-addresses>
 </policy-information>
</security-policy-match>
```

#### Description

#### <source-identities>

##### Usage

```
<source-identities>
 <source-identity>....</source-identity>
</source-identities>
```

#### Description

## <source-identities>

### Usage

```
<policy-information>
 <source-identities>
 <source-identity>....</source-identity>
 </source-identities>
</policy-information>
```

### Description

## <source-identities>

### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-identities>
 <source-identity>....</source-identity>
 </source-identities>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

### Description

## <source-identities>

### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-identities>
 <source-identity>....</source-identity>
 </source-identities>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

### Description

## <source-identities>

### Usage

```
<security-policy-match>
 <policy-information>
 <source-identities>
 <source-identity>....</source-identity>
```

```

 </source-identities>
 </policy-information>
</security-policy-match>

```

**Description****<source-identity>****Usage**

```

<source-identities>
 <source-identity>
 <role-name>
 role-name
 </role-name>
 </source-identity>
</source-identities>

```

**Description** Information about a source identity

**<source-identity>****Usage**

```

<policy-information>
 <source-identities>
 <source-identity>
 <role-name>
 role-name
 </role-name>
 </source-identity>
 </source-identities>
</policy-information>

```

**Description** Information about a source identity

**<source-identity>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-identities>
 <source-identity>
 <role-name>
 role-name
 </role-name>
 </source-identity>
 </source-identities>
 </policy-information>
 </policies>
 </security-context>

```

</security-policies>

**Description** Information about a source identity

### <source-identity>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <source-identities>
 <source-identity>
 <role-name>
 role-name
 </role-name>
 </source-identity>
 </source-identities>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information about a source identity

### <source-identity>

#### Usage

```
<security-policy-match>
 <policy-information>
 <source-identities>
 <source-identity>
 <role-name>
 role-name
 </role-name>
 </source-identity>
 </source-identities>
 </policy-information>
</security-policy-match>
```

**Description** Information about a source identity

### <source-port-range>

#### Usage

```
<applications>
 <application>
 <application-term>
 <source-port-range>
 <low>
 low
 </low>
 </source-port-range>
 </application-term>
 </application>
</applications>
```

```
 </low>
 <high>
 high
 </high>
</source-port-range>
</application-term>
</application>
</applications>
```

**Description** Range of the source ports

### <source-port-range>

#### Usage

```
<policy-information>
 <applications>
 <application>
 <application-term>
 <source-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </source-port-range>
 </application-term>
 </application>
 </applications>
</policy-information>
```

**Description** Range of the source ports

### <source-port-range>

#### Usage

```
<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <source-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </source-port-range>
 </application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
 </security-context>
</security-policies>
```

```
 </application>
 </applications>
</policy-information>
</policies>
</security-context>
</security-policies>
```

**Description**    Range of the source ports

### <source-port-range>

#### Usage

```
<security-dynamic-policies>
<security-context>
 <policies>
 <policy-information>
 <applications>
 <application>
 <application-term>
 <source-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
 </source-port-range>
 </application-term>
 </application>
 </applications>
 </policy-information>
 </policies>
</security-context>
</security-dynamic-policies>
```

**Description**    Range of the source ports

### <source-port-range>

#### Usage

```
<security-policy-match>
<policy-information>
 <applications>
 <application>
 <application-term>
 <source-port-range>
 <low>
 low
 </low>
 <high>
 high
 </high>
```

```

 </source-port-range>
 </application-term>
 </application>
 </applications>
</policy-information>
</security-policy-match>

```

**Description** Range of the source ports

### <ssl-initiation>

#### Usage

```

<policy-application-services>
 <ssl-initiation>
 <ssl-initiation-profile-name>
 ssl-initiation-profile-name
 </ssl-initiation-profile-name>
 </ssl-initiation>
</policy-application-services>

```

**Description** Information of the SSL initiation

### <ssl-initiation>

#### Usage

```

<policy-information>
 <policy-application-services>
 <ssl-initiation>
 <ssl-initiation-profile-name>
 ssl-initiation-profile-name
 </ssl-initiation-profile-name>
 </ssl-initiation>
 </policy-application-services>
</policy-information>

```

**Description** Information of the SSL initiation

### <ssl-initiation>

#### Usage

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <ssl-initiation>
 <ssl-initiation-profile-name>
 ssl-initiation-profile-name
 </ssl-initiation-profile-name>
 </ssl-initiation>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

```
 </policy-information>
 </policies>
</security-context>
</security-policies>
```

**Description** Information of the SSL initiation

### <ssl-initiation>

#### Usage

```
<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <ssl-initiation>
 <ssl-initiation-profile-name>
 ssl-initiation-profile-name
 </ssl-initiation-profile-name>
 </ssl-initiation>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>
```

**Description** Information of the SSL initiation

### <ssl-initiation>

#### Usage

```
<security-policy-match>
 <policy-information>
 <policy-application-services>
 <ssl-initiation>
 <ssl-initiation-profile-name>
 ssl-initiation-profile-name
 </ssl-initiation-profile-name>
 </ssl-initiation>
 </policy-application-services>
 </policy-information>
</security-policy-match>
```

**Description** Information of the SSL initiation

### <ssl-proxy>

#### Usage

```
<policy-application-services>
 <ssl-proxy>
 <ssl-proxy-profile-name>
```

```

 ssl-proxy-profile-name
 </ssl-proxy-profile-name>
 </ssl-proxy>
 </policy-application-services>

```

**Description** Information of the SSL proxy

### <ssl-proxy>

#### Usage

```

<policy-information>
 <policy-application-services>
 <ssl-proxy>
 <ssl-proxy-profile-name>
 ssl-proxy-profile-name
 </ssl-proxy-profile-name>
 </ssl-proxy>
 </policy-application-services>
</policy-information>

```

**Description** Information of the SSL proxy

### <ssl-proxy>

#### Usage

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <ssl-proxy>
 <ssl-proxy-profile-name>
 ssl-proxy-profile-name
 </ssl-proxy-profile-name>
 </ssl-proxy>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

**Description** Information of the SSL proxy

### <ssl-proxy>

#### Usage

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>

```

```
<ssl-proxy>
 <ssl-proxy-profile-name>
 ssl-proxy-profile-name
 </ssl-proxy-profile-name>
</ssl-proxy>
</policy-application-services>
</policy-information>
</policies>
</security-context>
</security-dynamic-policies>
```

**Description** Information of the SSL proxy

### <ssl-proxy>

#### Usage

```
<security-policy-match>
 <policy-information>
 <policy-application-services>
 <ssl-proxy>
 <ssl-proxy-profile-name>
 ssl-proxy-profile-name
 </ssl-proxy-profile-name>
 </ssl-proxy>
 </policy-application-services>
 </policy-information>
</security-policy-match>
```

**Description** Information of the SSL proxy

### <ssl-termination>

#### Usage

```
<policy-application-services>
 <ssl-termination>
 <ssl-termination-profile-name>
 ssl-termination-profile-name
 </ssl-termination-profile-name>
 </ssl-termination>
</policy-application-services>
```

**Description** Information of the SSL termination

### <ssl-termination>

#### Usage

```
<policy-information>
 <policy-application-services>
 <ssl-termination>
 <ssl-termination-profile-name>
 ssl-termination-profile-name
 </ssl-termination-profile-name>
 </ssl-termination>
 </policy-application-services>
</policy-information>
```

```

 </ssl-termination-profile-name>
 </ssl-termination>
</policy-application-services>
</policy-information>

```

**Description** Information of the SSL termination

### <ssl-termination>

#### Usage

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <ssl-termination>
 <ssl-termination-profile-name>
 ssl-termination-profile-name
 </ssl-termination-profile-name>
 </ssl-termination>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

**Description** Information of the SSL termination

### <ssl-termination>

#### Usage

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <ssl-termination>
 <ssl-termination-profile-name>
 ssl-termination-profile-name
 </ssl-termination-profile-name>
 </ssl-termination>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Information of the SSL termination

## <ssl-termination>

### Usage

```
<security-policy-match>
 <policy-information>
 <policy-application-services>
 <ssl-termination>
 <ssl-termination-profile-name>
 ssl-termination-profile-name
 </ssl-termination-profile-name>
 </ssl-termination>
 </policy-application-services>
 </policy-information>
</security-policy-match>
```

**Description** Information of the SSL termination

## <wx-optimizer>

### Usage

```
<policy-application-services>
 <wx-optimizer>
 <wx-optimizer-profile-name>
 wx-optimizer-profile-name
 </wx-optimizer-profile-name>
 <wx-optimizer-service-options>
 wx-optimizer-service-options
 </wx-optimizer-service-options>
 </wx-optimizer>
</policy-application-services>
```

**Description** Wan-optimizer configuration

## <wx-optimizer>

### Usage

```
<policy-information>
 <policy-application-services>
 <wx-optimizer>
 <wx-optimizer-profile-name>
 wx-optimizer-profile-name
 </wx-optimizer-profile-name>
 <wx-optimizer-service-options>
 wx-optimizer-service-options
 </wx-optimizer-service-options>
 </wx-optimizer>
 </policy-application-services>
</policy-information>
```

**Description** Wan-optimizer configuration

**<wx-optimizer>****Usage**

```

<security-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <wx-optimizer>
 <wx-optimizer-profile-name>
 wx-optimizer-profile-name
 </wx-optimizer-profile-name>
 <wx-optimizer-service-options>
 wx-optimizer-service-options
 </wx-optimizer-service-options>
 </wx-optimizer>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-policies>

```

**Description** Wan-optimizer configuration

**<wx-optimizer>****Usage**

```

<security-dynamic-policies>
 <security-context>
 <policies>
 <policy-information>
 <policy-application-services>
 <wx-optimizer>
 <wx-optimizer-profile-name>
 wx-optimizer-profile-name
 </wx-optimizer-profile-name>
 <wx-optimizer-service-options>
 wx-optimizer-service-options
 </wx-optimizer-service-options>
 </wx-optimizer>
 </policy-application-services>
 </policy-information>
 </policies>
 </security-context>
</security-dynamic-policies>

```

**Description** Wan-optimizer configuration

**<wx-optimizer>****Usage**

```

<security-policy-match>

```

```
<policy-information>
 <policy-application-services>
 <wx-optimizer>
 <wx-optimizer-profile-name>
 wx-optimizer-profile-name
 </wx-optimizer-profile-name>
 <wx-optimizer-service-options>
 wx-optimizer-service-options
 </wx-optimizer-service-options>
 </wx-optimizer>
 </policy-application-services>
</policy-information>
</security-policy-match>
```

**Description** Wan-optimizer configuration

---

## Summary of Security Profile Response Tags

### <security-profile-address-book-information>

#### Usage

```
<security-profile-address-book-information>
 <security-profile-information>....</security-profile-information>
</security-profile-address-book-information>
```

**Description** Address book resource usage versus logical system's security profile

### <security-profile-all-resource-information>

#### Usage

```
<security-profile-all-resource-information>
 <resources-name>
 resources-name
 </resources-name>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <security-profile-name>
 security-profile-name
 </security-profile-name>
 <resources-used>
 resources-used
 </resources-used>
 <resources-reserved>
 resources-reserved
 </resources-reserved>
 <resources-maximum>
 resources-maximum
 </resources-maximum>
 <resources-drop-rate-status>
 resources-drop-rate-status
 </resources-drop-rate-status>
```

```

 <resources-available>
 resources-available
 </resources-available>
 <heaviest-usage>
 heaviest-usage
 </heaviest-usage>
 <heaviest-user>
 heaviest-user
 </heaviest-user>
 <lightest-usage>
 lightest-usage
 </lightest-usage>
 <lightest-user>
 lightest-user
 </lightest-user>
 </security-profile-all-resource-information>

```

**Description** Security profile information of all resources for logical system

#### <security-profile-appfw-rule-information>

##### Usage

```

<security-profile-appfw-rule-information>
 <security-profile-information>....</security-profile-information>
</security-profile-appfw-rule-information>

```

**Description** Appfw rule resource usage versus logical system's security profile

#### <security-profile-appfw-rule-set-information>

##### Usage

```

<security-profile-appfw-rule-set-information>
 <security-profile-information>....</security-profile-information>
</security-profile-appfw-rule-set-information>

```

**Description** Appfw rule set resource usage versus logical system's security profile

#### <security-profile-auth-entry-information>

##### Usage

```

<security-profile-auth-entry-information>
 <security-profile-information>....</security-profile-information>
</security-profile-auth-entry-information>

```

**Description** Firewall authentication resource usage

### <security-profile-cpu-information>

**Usage**

```
<security-profile-cpu-information>
 <security-profile-information>....</security-profile-information>
</security-profile-cpu-information>
```

**Description** CPU utilization versus logical system's security profile

### <security-profile-dslite-software-initiator-information>

**Usage**

```
<security-profile-dslite-software-initiator-information>
 <security-profile-information>....</security-profile-information>
</security-profile-dslite-software-initiator-information>
```

**Description** Security ds-lite software initiator resource usage versus logical system's security profile

### <security-profile-flow-gate-information>

**Usage**

```
<security-profile-flow-gate-information>
 <security-profile-information>....</security-profile-information>
</security-profile-flow-gate-information>
```

**Description** Policy resource usage versus logical system's security profile

### <security-profile-flow-session-information>

**Usage**

```
<security-profile-flow-session-information>
 <security-profile-information>....</security-profile-information>
</security-profile-flow-session-information>
```

**Description** Policy resource usage versus logical system's security profile

### <security-profile-information>

**Usage**

```
<security-profile-information>
 <logical-system-name>
 logical-system-name
 </logical-system-name>
 <security-profile-name>
 security-profile-name
 </security-profile-name>
 <resources-used>
 resources-used
```

```

</resources-used>

```

**Description** Security profile information for logical system

### <security-profile-nat-cone-binding-information>

#### Usage

```

<security-profile-nat-cone-binding-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-cone-binding-information>

```

**Description** Nat cone binding resource usage versus logical system's security profile

### <security-profile-nat-destination-pool-information>

#### Usage

```

<security-profile-nat-destination-pool-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-destination-pool-information>

```

**Description** Nat destination pool resource usage versus logical system's security profile

### <security-profile-nat-destination-rule-information>

#### Usage

```

<security-profile-nat-destination-rule-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-destination-rule-information>

```

**Description** Nat destination rule resource usage versus logical system's security profile

### <security-profile-nat-nopat-address-information>

#### Usage

```

<security-profile-nat-nopat-address-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-nopat-address-information>

```

**Description** Nat IP address in src pool without PAT resource usage versus logical system's security profile

#### <security-profile-nat-pat-address-information>

**Usage**

```
<security-profile-nat-pat-address-information>
<security-profile-information>....</security-profile-information>
</security-profile-nat-pat-address-information>
```

**Description** Nat IP address in src pool with PAT resource usage versus logical system's security profile

#### <security-profile-nat-pat-portnum-information>

**Usage**

```
<security-profile-nat-pat-portnum-information>
<security-profile-information>....</security-profile-information>
</security-profile-nat-pat-portnum-information>
```

**Description** Nat port number in src pool with PAT resource usage versus logical system's security profile

#### <security-profile-nat-port-ol-ipnumber-information>

**Usage**

```
<security-profile-nat-port-ol-ipnumber-information>
<security-profile-information>....</security-profile-information>
</security-profile-nat-port-ol-ipnumber-information>
```

**Description** Nat port overloading ip number resource usage versus logical system's security profile

#### <security-profile-nat-rule-referenced-prefix-information>

**Usage**

```
<security-profile-nat-rule-referenced-prefix-information>
<security-profile-information>....</security-profile-information>
</security-profile-nat-rule-referenced-prefix-information>
```

**Description** Nat rule referenced IP-prefix usage versus logical system's security profile

#### <security-profile-nat-source-pool-information>

**Usage**

```
<security-profile-nat-source-pool-information>
<security-profile-information>....</security-profile-information>
</security-profile-nat-source-pool-information>
```

**Description** Nat source pool resource usage versus logical system's security profile

#### <security-profile-nat-source-rule-information>

**Usage**

```
<security-profile-nat-source-rule-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-source-rule-information>
```

**Description** Nat source rule resource usage versus logical system's security profile

#### <security-profile-nat-static-rule-information>

**Usage**

```
<security-profile-nat-static-rule-information>
 <security-profile-information>....</security-profile-information>
</security-profile-nat-static-rule-information>
```

**Description** Nat static rule resource usage versus logical system's security profile

#### <security-profile-policy-information>

**Usage**

```
<security-profile-policy-information>
 <security-profile-information>....</security-profile-information>
</security-profile-policy-information>
```

**Description** Policy resource usage versus logical system's security profile

#### <security-profile-policy-with-count-information>

**Usage**

```
<security-profile-policy-with-count-information>
 <security-profile-information>....</security-profile-information>
</security-profile-policy-with-count-information>
```

**Description** Policy with count resource usage versus logical system's security profile

#### <security-profile-scheduler-information>

**Usage**

```
<security-profile-scheduler-information>
 <security-profile-information>....</security-profile-information>
</security-profile-scheduler-information>
```

**Description** Scheduler resource usage versus logical system's security profile

### <security-profile-zone-information>

**Usage**

```
<security-profile-zone-information>
 <security-profile-information>....</security-profile-information>
</security-profile-zone-information>
```

**Description** Zone resource usage versus logical system's security profile

### <show-lcu-control>

**Usage**

```
<show-lcu-control>
 <cpu-control>
 cpu-control
 </cpu-control>
 <cpu-control-target>
 cpu-control-target
 </cpu-control-target>
</show-lcu-control>
```

**Description** Logical system cpu utilization settings

### <show-lcu-status>

**Usage**

```
<show-lcu-status>
 <lsys-name>
 lsys-name
 </lsys-name>
 <profile-name>
 profile-name
 </profile-name>
 <fpc-name>

#### Description

<utm-session-clear>

#### Usage

```
<utm-session-clear>
 <utm-session-clear-result>
 utm-session-clear-result
 </utm-session-clear-result>
</utm-session-clear>
```

**Description**    UTM clear session

### <utmd-status>

#### Usage

```

<utmd-status>
 <running>
 running
 </running>
</utmd-status>

```

**Description** Status of utmd service

### <utmd-web-filtering>

#### Usage

```

<utmd-web-filtering>
 <utmd-web-filtering-statistics>....</utmd-web-filtering-statistics>
 <utmd-web-filtering-status>....</utmd-web-filtering-status>
</utmd-web-filtering>

```

**Description** Statistics of web-filtering features

### <utmd-web-filtering-statistics>

#### Usage

```

<utmd-web-filtering>
 <utmd-web-filtering-statistics>
 <total-requests>
 total-requests
 </total-requests>
 <white-list-hit>
 white-list-hit
 </white-list-hit>

<site-reputation-block>
 site-reputation-block
</site-reputation-block>
<cache-hit-permit>
 cache-hit-permit
</cache-hit-permit>
<cache-hit-block>
 cache-hit-block
</cache-hit-block>
<safe-search-redirect>
 safe-search-redirect
</safe-search-redirect>
<web-filtering-session-total>
 web-filtering-session-total
</web-filtering-session-total>
<web-filtering-session-inuse>
 web-filtering-session-inuse
</web-filtering-session-inuse>
<web-filtering-fallback>....</web-filtering-fallback>
</utmd-web-filtering-statistics>
</utmd-web-filtering>
```

**Description** UTM web-filtering statistics

### <utmd-web-filtering-status>

#### Usage

```
<utmd-web-filtering>
 <utmd-web-filtering-status>
 <web-filtering-server-status>
 web-filtering-server-status
 </web-filtering-server-status>
 </utmd-web-filtering-status>
</utmd-web-filtering>
```

**Description** UTM web-filtering status

### <web-filter-clear>

#### Usage

```
<web-filter-clear>
 <web-filter-clear-result>
 web-filter-clear-result
 </web-filter-clear-result>
</web-filter-clear>
```

**Description** UTM web-filter clear result

## <web-filtering-fallback>

### Usage

```

<utmd-web-filtering>
 <utmd-web-filtering-statistics>
 <web-filtering-fallback>
 <fallback-permit-default>
 fallback-permit-default
 </fallback-permit-default>
 <fallback-permit-timeout>
 fallback-permit-timeout
 </fallback-permit-timeout>
 <fallback-permit-connectivity>
 fallback-permit-connectivity
 </fallback-permit-connectivity>
 <fallback-permit-too-many-requests>
 fallback-permit-too-many-requests
 </fallback-permit-too-many-requests>
 <fallback-block-default>
 fallback-block-default
 </fallback-block-default>
 <fallback-block-timeout>
 fallback-block-timeout
 </fallback-block-timeout>
 <fallback-block-connectivity>
 fallback-block-connectivity
 </fallback-block-connectivity>
 <fallback-block-too-many-requests>
 fallback-block-too-many-requests
 </fallback-block-too-many-requests>
 </web-filtering-fallback>
 </utmd-web-filtering-statistics>
</utmd-web-filtering>

```

### Description

## <web-filtering-request-cache-flush>

### Usage

```

<web-filtering-request-cache-flush>
 <web-filtering-request-cache-flush-result>
 web-filtering-request-cache-flush-result
 </web-filtering-request-cache-flush-result>
</web-filtering-request-cache-flush>

```

**Description** UTM Web-Filtering request cache flush

## <web-filtering-test>

### Usage

```

<web-filtering-test>
 <web-filtering-test-result>
 web-filtering-test-result

```

```
</web-filtering-test-result>
</web-filtering-test>
```

**Description** UTM web-filtering test results

## Summary of Wireless LAN Access Points Response Tags

---

### <access-point-client-associations>

**Usage**

```
<access-point-client-associations>
 <access-point-name>
 access-point-name
 </access-point-name>
 <radio-id>
 radio-id
 </radio-id>
 <vap-id>
 vap-id
 </vap-id>
 <status-information>....</status-information>
</access-point-client-associations>
```

**Description** Information about client associations for a specified access point

### <access-point-client-associations>

**Usage**

```
<wlan-access-point-client-associations-list>
 <access-point-client-associations>
 <access-point-name>
 access-point-name
 </access-point-name>
 <radio-id>
 radio-id
 </radio-id>
 <vap-id>
 vap-id
 </vap-id>
 <status-information>....</status-information>
 </access-point-client-associations>
</wlan-access-point-client-associations-list>
```

**Description** Information about client associations for a specified access point

### <access-point-client-associations>

**Usage**

```
<wlan-access-point-client-associations-detail-list>
 <access-point-client-associations>
```

```
<access-point-name>
 access-point-name
</access-point-name>
<radio-id>
 radio-id
</radio-id>
<vap-id>
 vap-id
</vap-id>
<status-information>....</status-information>
</access-point-client-associations>
</wlan-access-point-client-associations-detail-list>
```

**Description** Information about client associations for a specified access point

### <access-point-client-display>

**Usage**

```
<access-point-client-display>
 <access-point-name>
 access-point-name
 </access-point-name>
</access-point-client-display>
```

**Description**

### <access-point-client-display>

**Usage**

```
<wlan-access-point-client-associations-list>
 <access-point-client-display>
 <access-point-name>
 access-point-name
 </access-point-name>
 </access-point-client-display>
</wlan-access-point-client-associations-list>
```

**Description**

### <access-point-client-display-detail>

**Usage**

```
<access-point-client-display-detail>
 <ap-empty>
 ap-empty
 </ap-empty>
</access-point-client-display-detail>
```

**Description**

### <access-point-client-display-detail>

#### Usage

```
<wlan-access-point-client-associations-detail-list>
 <access-point-client-display-detail>
 <ap-empty>
 ap-empty
 </ap-empty>
 </access-point-client-display-detail>
</wlan-access-point-client-associations-detail-list>
```

#### Description

### <access-point-neighbors>

#### Usage

```
<access-point-neighbors>
 <mac-address>
 mac-address
 </mac-address>
 <ssid>
 ssid
 </ssid>
 <security>
 security
 </security>
 <wpa>
 wpa
 </wpa>
 <band>
 band
 </band>
 <channel>
 channel
 </channel>
 <last-beacon>
 last-beacon
 </last-beacon>
 <signal>
 signal
 </signal>
</access-point-neighbors>
```

**Description** Information about neighboring access points

### <access-point-neighbors>

#### Usage

```
<wlan-access-point-neighbors-list>
 <access-point-neighbors>
 <mac-address>
 mac-address
 </mac-address>
```

```

 <ssid>
 ssid
 </ssid>
 <security>
 security
 </security>
 <wpa>
 wpa
 </wpa>
 <band>
 band
 </band>
 <channel>
 channel
 </channel>
 <last-beacon>
 last-beacon
 </last-beacon>
 <signal>
 signal
 </signal>
 </access-point-neighbors>
</wlan-access-point-neighbors-list>

```

**Description** Information about neighboring access points

## <access-points>

### Usage

```

<access-points>
 <access-point-name>
 access-point-name
 </access-point-name>
 <access-point-type>
 access-point-type
 </access-point-type>
 <access-interface>
 access-interface
 </access-interface>
 <system-time>
 system-time
 </system-time>
 <access-point-status>
 access-point-status
 </access-point-status>
 <radio-mode-channel>
 radio-mode-channel
 </radio-mode-channel>
 <location>
 location
 </location>
 <serial-number>
 serial-number
 </serial-number>

```

</wlan-access-points-list>

```

**Description** Information about access point

## <capture-local>

### Usage

```
<capture-local>
```

```
<capture-interface>
 capture-interface
</capture-interface>
<capture-file>
 capture-file
</capture-file>
<capture-duration>
 capture-duration
</capture-duration>
<capture-file-size>
 capture-file-size
</capture-file-size>
</capture-local>
```

**Description** Local packet capture operation

### <capture-local>

#### Usage

```
<wlan-access-point-packet-capture-start>
 <capture-local>
 <capture-interface>
 capture-interface
 </capture-interface>
 <capture-file>
 capture-file
 </capture-file>
 <capture-duration>
 capture-duration
 </capture-duration>
 <capture-file-size>
 capture-file-size
 </capture-file-size>
 </capture-local>
</wlan-access-point-packet-capture-start>
```

**Description** Local packet capture operation

### <capture-local>

#### Usage

```
<wlan-access-point-packet-capture-stop>
 <capture-local>
 <capture-interface>
 capture-interface
 </capture-interface>
 <capture-file>
 capture-file
 </capture-file>
 <capture-duration>
 capture-duration
 </capture-duration>
```

```
<capture-file-size>
 capture-file-size
</capture-file-size>
</capture-local>
</wlan-access-point-packet-capture-stop>
```

**Description** Local packet capture operation

### <cluster>

#### Usage

```
<cluster>
 <cluster-id>
 cluster-id
 </cluster-id>
 <access-point-name>
 access-point-name
 </access-point-name>
</cluster>
```

**Description** Cluster information

### <cluster>

#### Usage

```
<wlan-clusters-list>
 <cluster>
 <cluster-id>
 cluster-id
 </cluster-id>
 <access-point-name>
 access-point-name
 </access-point-name>
 </cluster>
</wlan-clusters-list>
```

**Description** Cluster information

### <diagnostics-info>

#### Usage

```
<diagnostics-info>
 <access-point-name>
 access-point-name
 </access-point-name>
 <pcap-status>
 pcap-status
 </pcap-status>
 <capture-interface>
 capture-interface
 </capture-interface>
```

```
<syslog-status>
 syslog-status
</syslog-status>
</diagnostics-info>
```

**Description** Diagnostics information about an access point

### <diagnostics-info>

#### Usage

```
<wlan-diagnostics-list>
 <diagnostics-info>
 <access-point-name>
 access-point-name
 </access-point-name>
 <pcap-status>
 pcap-status
 </pcap-status>
 <capture-interface>
 capture-interface
 </capture-interface>
 <syslog-status>
 syslog-status
 </syslog-status>
 </diagnostics-info>
</wlan-diagnostics-list>
```

**Description** Diagnostics information about an access point

### <dot1x>

#### Usage

```
<dot1x>
 <global-radius-setting>
 global-radius-setting
 </global-radius-setting>
 <radius-ip-address>
 radius-ip-address
 </radius-ip-address>
 <radius-ip-address-1>

 <session-key-refresh-rate>
 session-key-refresh-rate
 </session-key-refresh-rate>
</dotlx>
</virtual-access-points>
</radio-list>
</wlan-virtual-access-points-list>

```

**Description** Information about virtual access point dotlx-detail

### <ethernet-port-information>

#### Usage

```

<ethernet-port-information>
 <mac-address>
 mac-address
 </mac-address>
 <access-ipv4-address>
 access-ipv4-address
 </access-ipv4-address>
</ethernet-port-information>

```

**Description** Information about ethernet port

### <ethernet-port-information>

#### Usage

```

<access-points>
 <ethernet-port-information>
 <mac-address>
 mac-address
 </mac-address>
 <access-ipv4-address>
 access-ipv4-address
 </access-ipv4-address>
 </ethernet-port-information>

```

```
</ethernet-port-information>
</access-points>
```

**Description** Information about ethernet port

### <ethernet-port-information>

#### Usage

```
<wlan-access-points-list>
 <access-points>
 <ethernet-port-information>
 <mac-address>
 mac-address
 </mac-address>
 <access-ipv4-address>
 access-ipv4-address
 </access-ipv4-address>
 </ethernet-port-information>
 </access-points>
</wlan-access-points-list>
```

**Description** Information about ethernet port

### <radio-information>

#### Usage

```
<radio-information>
 <radio-id>
 radio-id
 </radio-id>
 <radio-mode>
 radio-mode
 </radio-mode>
 <channel>
 channel
 </channel>
</radio-information>
```

**Description** Information about radio

### <radio-information>

#### Usage

```
<access-points>
 <radio-information>
 <radio-id>
 radio-id
 </radio-id>
 <radio-mode>
 radio-mode
 </radio-mode>
```

```
<channel>
 channel
</channel>
</radio-information>
</access-points>
```

**Description** Information about radio

### <radio-information>

#### Usage

```
<wlan-access-points-list>
 <access-points>
 <radio-information>
 <radio-id>
 radio-id
 </radio-id>
 <radio-mode>
 radio-mode
 </radio-mode>
 <channel>
 channel
 </channel>
 </radio-information>
 </access-points>
</wlan-access-points-list>
```

**Description** Information about radio

### <radio-list>

#### Usage

```
<radio-list>
 <radio-id>
 radio-id
 </radio-id>
 <virtual-access-points>....</virtual-access-points>
 <virtual-access-points_detail>....</virtual-access-points_detail>
</radio-list>
```

**Description** Information about radio options

### <radio-list>

#### Usage

```
<wlan-virtual-access-points-list>
 <radio-list>
 <radio-id>
 radio-id
 </radio-id>
 <virtual-access-points>....</virtual-access-points>
```

```
 <virtual-access-points_detail>....</virtual-access-points_detail>
 </radio-list>
</wlan-virtual-access-points-list>
```

**Description** Information about radio options

### <radio-status-information>

#### Usage

```
<radio-status-information>
 <radio-id>
 radio-id
 </radio-id>
 <status>
 status
 </status>
 <mac-address>
 mac-address
 </mac-address>
 <radio-mode>
 radio-mode
 </radio-mode>
 <channel>
 channel
 </channel>
</radio-status-information>
```

**Description** Status information about radio

### <radio-status-information>

#### Usage

```
<access-points>
 <radio-status-information>
 <radio-id>
 radio-id
 </radio-id>
 <status>
 status
 </status>
 <mac-address>
 mac-address
 </mac-address>
 <radio-mode>
 radio-mode
 </radio-mode>
 <channel>
 channel
 </channel>
 </radio-status-information>
</access-points>
```

**Description** Status information about radio

### <radio-status-information>

#### Usage

```
<wlan-access-points-list>
 <access-points>
 <radio-status-information>
 <radio-id>
 radio-id
 </radio-id>
 <status>
 status
 </status>
 <mac-address>
 mac-address
 </mac-address>
 <radio-mode>
 radio-mode
 </radio-mode>
 <channel>
 channel
 </channel>
 </radio-status-information>
 </access-points>
</wlan-access-points-list>
```

**Description** Status information about radio

### <static-wep>

#### Usage

```
<static-wep>
 <transfer-key-index>
 transfer-key-index
 </transfer-key-index>
 <key-length>
 key-length
 </key-length>
 <key-type>
 key-type
 </key-type>
 <open-system>
 open-system
 </open-system>
 <shared-key>
 shared-key
 </shared-key>
</static-wep>
```

**Description** Information about virtual access point static-wep-detail

## <static-wep>

### Usage

```
<virtual-access-points>
 <static-wep>
 <transfer-key-index>
 transfer-key-index
 </transfer-key-index>

**Description** Information about WX Status

## Summary of Zones Response Tags

---

### <zones-functional>

#### Usage

```

 <zones-information>
 <zones-functional>
 <zones-management>....</zones-management>
 </zones-functional>
 </zones-information>

```

**Description** Information about one or more functional zones

### <zones-information>

#### Usage

```

 <zones-information>
 <zones-functional>....</zones-functional>
 <zones-security>....</zones-security>
 <zones-logical-system>....</zones-logical-system>
 </zones-information>

```

**Description** Information about one or more zones

### <zones-logical-system>

#### Usage

```

 <zones-information>
 <zones-logical-system>

```

```
<name>
 name
</name>
</zones-logical-system>
</zones-information>
```

**Description** Logical system

## <zones-management>

### Usage

```
<zones-information>
<zones-functional>
 <zones-management>
 <zones-management-zonename>
 zones-management-zonename
 </zones-management-zonename>
 <zones-management-description>
 zones-management-description
 </zones-management-description>
 <zones-management-policy-configurable>
 zones-management-policy-configurable
 </zones-management-policy-configurable>
 <zones-management-screen>
 zones-management-screen
 </zones-management-screen>
 <zones-management-interfaces-bound>
 zones-management-interfaces-bound
 </zones-management-interfaces-bound>
 <zones-management-interfaces>....</zones-management-interfaces>
 </zones-management>
</zones-functional>
</zones-information>
```

**Description** Information about management zone

## <zones-management-interfaces>

### Usage

```
<zones-information>
<zones-functional>
 <zones-management>
 <zones-management-interfaces>
 <zones-management-interface-name>
 zones-management-interface-name
 </zones-management-interface-name>
 </zones-management-interfaces>
 </zones-management>
</zones-functional>
</zones-information>
```

**Description** Interfaces bound to the zone

### <zones-security>

#### Usage

```
<zones-information>
 <zones-security>
 <zones-security-zonename>
 zones-security-zonename
 </zones-security-zonename>
 <zones-security-description>
 zones-security-description
 </zones-security-description>
 <zones-security-scope>
 zones-security-scope
 </zones-security-scope>
 <zones-security-send-reset>
 zones-security-send-reset
 </zones-security-send-reset>
 <zones-security-policy-configurable>
 zones-security-policy-configurable
 </zones-security-policy-configurable>
 <zones-security-screen>
 zones-security-screen
 </zones-security-screen>
 <zones-security-interfaces-bound>
 zones-security-interfaces-bound
 </zones-security-interfaces-bound>
 <zones-security-interfaces>....</zones-security-interfaces>
 </zones-security>
</zones-information>
```

**Description** Information about one or more security zone

### <zones-security-interfaces>

#### Usage

```
<zones-information>
 <zones-security>
 <zones-security-interfaces>
 <zones-security-interface-name>
 zones-security-interface-name
 </zones-security-interface-name>
 </zones-security-interfaces>
 </zones-security>
</zones-information>
```

**Description** Interfaces bound to the zone

## CHAPTER 60

# DTD for Accounting Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-accounting.dtd`. To review reference pages for the tags, see:

- [Operational Response Tag Elements Applicable to All Platforms on page 2179](#)
- [Operational Response Tag Elements Common to J Series, M, MX, and T Series, and SRX Series on page 7157](#)
- [Operational Response Tag Elements Common to EX Series, J Series, QFX Series, and SRX Series on page 7403](#)
- [Operational Response Tag Elements Specific to J Series and SRX Series on page 7563](#)

## CHAPTER 61

# DTD for Adaptive Services Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-adaptive-services.dtd`. To review reference pages for the tags, see:

- [Operational Response Tag Elements Applicable to All Platforms on page 2179](#)
- [Operational Response Tag Elements Common to J Series, M, MX, and T Series, and SRX Series on page 7157](#)
- [Operational Response Tag Elements Common to EX Series, J Series, QFX Series, and SRX Series on page 7403](#)
- [Operational Response Tag Elements Specific to J Series and SRX Series on page 7563](#)
