CHAPTER 71

DTD for Chassis Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called junos-chassis.dtd. To review reference pages for the tags, see:

- Operational Response Tag Elements Applicable to All Platforms on page 2181
- Operational Response Tag Elements Common to M, MX, T Series, and SRX Series on page 7159
- Operational Response Tag Elements Common to EX Series, QFX Series, and SRX Series on page 7405
- Operational Response Tag Elements Specific to SRX Series on page 7565

```

CHAPTER 72

DTD for Clock Synchronization Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called junos-clksyncd.dtd. To review reference pages for the tags, see:

- Operational Response Tag Elements Applicable to All Platforms on page 2181
- Operational Response Tag Elements Common to M, MX, T Series, and SRX Series on page 7159
- Operational Response Tag Elements Common to EX Series, QFX Series, and SRX Series on page 7405
- Operational Response Tag Elements Specific to SRX Series on page 7565

CHAPTER 98

DTD for L2CP Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called junos-l2cp.dtd. To review reference pages for the tags, see:

- Operational Response Tag Elements Applicable to All Platforms on page 2181
- Operational Response Tag Elements Common to M, MX, T Series, and SRX Series on page 7159
- Operational Response Tag Elements Common to EX Series, QFX Series, and SRX Series on page 7405
- Operational Response Tag Elements Specific to SRX Series on page 7565

```
