

radius ignore

Syntax radius ignore *attributeName* { enable | disable }

no radius ignore *attributeName*

Release Information Command introduced before JUNOS Release 7.1.0.
pppoe-max-session keyword added in JUNOS Release 9.3.0.

Description Ignores the specified attribute in RADIUS Access-Accept messages. All attributes are disabled by default except for Framed-Ip-Netmask and Max-Clients-Per-Interface (pppoe-max-session). The **no** version restores the default.

- Options**
- *attributeName*—One of the following RADIUS attributes:
 - atm-mbs—Mbs, VSA 26-17
 - atm-pcr—Pcr, VSA 26-15
 - atm-scr—Scr, VSA 26-16
 - atm-service-category—Service-Category, VSA 26-14
 - egress-policy-name—Egress-Policy-Name, VSA 26-11
 - framed-ip-netmask—Framed-Ip-Netmask, attribute 9
 - pppoe-max-session—Max-Clients-Per-Interface, VSA 26-143
 - ingress-policy-name—Ingress-Policy-Name, VSA 26-10
 - virtual-router—Virtual-Router, VSA 26-1
 - enable—Specifies the feature; this is the default setting for **framed-ip-netmask** and **pppoe-max-session**
 - disable—Disables the feature; this is the default setting for all attributes except **framed-ip-netmask** and **pppoe-max-session**

Mode Global Configuration
