

## set dhcp relay assign-giaddr-source-ip

---

**Syntax** [ no ] set dhcp relay assign-giaddr-source-ip

**Release Information** Command introduced in JUNOS Release 7.1.0.

**Description** Configures DHCP relay and DHCP relay proxy to assign the gateway IP address (giaddr) to the source IP address of traffic they send to DHCP servers. The **no** version restores the default, in which the DHCP relay and DHCP relay proxy do not assign the giaddr to the source IP address.

**Mode** Global Configuration
